

- The energy released by a chemical reaction can be used to create useful products such as hand warmers, flameless heaters, and heating up food.
- Chemical reactions may need thermal energy to occur; example. a spark needed to ignite gasoline.
- A catalyst is something that reduces the amount of energy needed for a chemical reaction to occur.

III. Metabolic Reactions

A. Humans and Food

- The human body takes in food and breaks down the food by the process of digestion.
- Digestion allows carbohydrates, proteins, fats, and vitamins to become available to all the cells in the body.
- Disruption of the processes of digestion and cell respiration can lead to disorders of human health.
- Humans are omnivores and must eat plants or other animals to survive.
- Human health requires food and other substances such as vitamins and minerals.
- Balanced diet, e.g. the food pyramid or “MyPlate,” includes carbohydrates, proteins, fats, vitamins, and minerals.
- Humans must get vitamins from external sources.

B. Energy for Life

- Energy for most life on earth comes from the sun.
- Sunlight and the process of photosynthesis
- Glucose is the major source of chemical energy for living things.
- Food is both what we eat and the chemical substances cells need to perform chemical reactions.
- The three classes of chemicals that make up food are carbohydrates, proteins, and fats (lipids).
- Carbon, hydrogen, and oxygen (plus many others in lesser amounts) are the main constituents of cell chemistry.

C. Cellular Respiration

- Cellular respiration breaks down the sugar glucose and uses released chemical energy to allow all chemical reactions in the cell.
- Only plants photosynthesize, but all living things (including plants) have cellular respiration.
- While most living things use oxygen for cellular respiration, some do not.
- Animals must eat organic compounds from plants or other animals for energy.
- Humans need oxygen for most types of cellular respiration.
- Oxygen is transported from the lungs to the cells through hemoglobin in the blood.
- The interdependence and balance between plant and animal life is bound to the processes of photosynthesis and respiration.

IV. Matter Cycling and Photosynthesis

A. Photosynthesis

- The energy for most life comes from the sun.
- Sunlight strikes the chemical chlorophyll, which is found in the leaf and stem tissues of plants.
- Sunlight energy is transformed into chemical energy by plant cells by a complex set of reactions called photosynthesis.

- The result of photosynthesis is the formation of the simple sugar glucose.
- Glucose is the chemical food of life on earth.

B. Matter and Energy in Ecosystems

- Glucose produced by plants is the food of all living things.
- Matter (glucose, food) flows from plants to all other organisms in the ecosystem in feeding chains.
- All the interacting food chains make up the food web of an ecosystem.
- About 10% of the food energy flows to the next level in food chain.
- Bacteria and fungi recycle chemical substances and return organic matter to an ecosystem using carbon, oxygen, and nitrogen cycles.

C. Cycles in Nature

- Cycles of matter occur throughout all of earth's spheres, including the atmosphere, biosphere, geosphere, and hydrosphere.
- Cycles of matter are called biogeochemical since they involve both abiotic and biotic elements of the earth.
- The carbon, oxygen, and phosphorus cycles are important biogeochemical cycles.

V. Ecosystem Dynamics

A. Ecosystems

- An ecosystem is all the biotic and abiotic factors that make up a defined area.
 - Abiotic: temperature, wind, precipitation, soil type, weather, water conditions
 - Biotic: all the living organisms in an area
- Range of size of ecosystems
- An ecosystem consists of individual organisms, of populations made up of members of the same species, and of all other populations of all the species in the area.
- Limited resources promote competition among individuals and species.
- Species can interact symbiotically by mutualism, commensalism, and parasitism.
- All ecosystems, regardless of size or nature, consist of interactions between producers and consumers and between predators and prey.
- Ecosystems vary widely in type, but all involve similar interaction of biotic and abiotic factors.

B. Changes in Ecosystems

- Biotic and abiotic aspects of an ecosystem can change.
- Ecosystem disruptions include: the immigration or emigration of new species, the arrival of prey organisms, long-term changes in precipitation, disasters such as flood or fire.
- Poor agricultural practices can damage ecosystems. Examples are the destruction of rain forests for the production of palm oil and monoculture farming that harm native prairies.
- Individuals and species may find the changes in conditions favorable or unfavorable.
- Humans can preserve an ecosystem's structure, e.g. by working to preserve biodiversity or eliminate invasive species.

VI. Earth's Resources and Human Impact

A. Natural Resources

- Humans use the energy inherent in natural resources to live.
- Renewable resources
 - Sunlight — solar panels and solar heating devices

- Wind — windmills
- Hydroelectric power uses the gravitational effect on water.
- Geothermal power uses thermal energy from Earth’s interior.
- Tidal power uses the movement of oceanic tides.
- Biofuels use raw materials, such as forest resources, and are renewable if produced sustainably.
- Nonrenewable resources:
 - Fossil fuels such as oil, natural gas, and coal
 - Nuclear power from uranium
- Nuclear power plants—monitored for safety and accidents such as Three Mile Island and Chernobyl

B. Environmental Protection

- The use of natural resources, while necessary for modern life, can have undesired environmental effects.
 - Fossil fuels — air pollution, including smog and greenhouse gases, causing atmospheric warming
 - Nuclear power generates radioactive waste.
 - Wind turbines can be noisy and may affect bird life.
- Human ingenuity and its uses to create a healthy environment.
- Scientific data and effective communication can be used to make informed decisions about the environment.

VII. Science Biographies

- Charles Darwin—the theory of evolution by natural selection
- Antoine Lavoisier—the process of oxidation
- Lise Meitner—helped establish the process of controlled nuclear fission
- Dmitri Mendeleev: first widely accepted periodic table
- Francis Crick, James Watson, Severo Ochoa, Barbara McClintock, etc., elucidated the hereditary workings of the cell

Grade 8

Overview of Topics

Grade 8

ENGLISH LANGUAGE ARTS

- I. Listening and Speaking
 - A. Classroom Discussion
 - B. Presentation of Ideas and Information
- II. Reading
 - A. Reading Comprehension and Response—All Texts
 - B. Reading Comprehension—Fiction, Drama, Poetry
 - C. Reading Comprehension—Nonfiction And Informational Text
- III. Writing
 - A. Writing to Reflect Audience, Purpose, and Task
 - B. Writing to Analyze and Understand Text
 - C. Conducting Research
 - D. Narrative Writing
 - E. Informative/Explanatory Writing
 - F. Persuasive Writing/Opinion
- IV. Language Conventions
 - A. Command of Language
 - B. Spelling
 - C. Grammar
 - D. Capitalization and Punctuation
 - E. Vocabulary
- V. Poetry
 - A. Poems
 - B. Elements of Poetry
- VI. Fiction, Nonfiction, and Drama
 - A. Short Stories
 - B. Novels
 - C. Elements of Fiction
 - D. Essays and Speeches
 - E. Autobiography
 - F. Drama
 - G. Literary Terms
- VII. Foreign Phrases Commonly Used in English

HISTORY AND GEOGRAPHY

WORLD HISTORY

- I. Mesopotamia
 - A. Geography
 - B. Background
- II. Ancient Egypt and Kush
 - A. Geography of Region
 - B. Government and Rulers
 - C. Belief Systems
 - D. Structures and Contributions
 - E. Decline of the Egyptian Empire
- III. The Israelites
 - A. Geography of Region
 - B. Background
- IV. The Ancient Greeks and Greek Civilization
 - A. Geography of Region
 - B. Background
 - C. Life in Greece

- V. Ancient India
 - A. Geography of South Asia
 - B. Background
 - C. Belief Systems
 - D. Rulers
- VI. Early China
 - A. Geography
 - B. Background
- VII. Rome: Republic to Empire and Roman Civilization
 - A. Geography
 - B. Background
 - C. Life in Ancient Rome
 - D. The Decline of the Republic and Fall of Western Empire
 - E. Byzantium
- VIII. Islamic Civilizations
 - A. Geography
 - B. Pre-Islamic Arabia
 - C. Muhammad
 - D. Islam
 - E. Islamic Civilization
- IX. Maya, Inca, and Aztec Civilizations
 - A. Geography
 - B. Background: Olmecs and Zapotecs
 - C. The Maya
 - D. The Aztec
- X. Imperial China
 - A. The Mongols
- XI. Europe and Russia in the Middle Ages
 - A. Geography
 - B. Ancient Korea
 - C. Ancient Japan
 - D. Imperial Japan
 - E. South East Asia
- XII. Europe and Russia in the Middle Ages
 - A. Geography
 - B. Background: Europe
 - C. Early Middle Ages
 - D. The Church
 - E. Charlemagne
 - F. High Middle Ages
 - G. Manorialism
 - H. Towns and Expanding Trade
 - I. High Middle Ages Church
 - J. The Crusades

 - A. Geography
 - B. Globalization
 - C. The Iron Curtain
 - D. The Atomic Age
 - E. European Development and Changes
 - F. The Soviet Union Collapses
 - G. The Break-up of Yugoslavia
 - H. Toward a United Europe
- XXII. Africa and the Middle East in the Second Half of the Twentieth Century
 - A. Geography
 - B. Background
 - C. Colonialism Ends
 - D. Struggles and Civil Wars
 - E. South Africa
 - F. Africa's Successes and Achievements
 - G. The Middle East
 - H. Israel and Regional Conflict
 - I. Egypt
 - J. Revolution in Iran
 - K. Conflicts in the Persian Gulf
- XXIII. Latin America in the Second Half of the Twentieth Century
 - A. Geography
 - B. Background
 - C. Guatemala
 - D. Panama
 - E. Nicaragua
 - F. El Salvador
 - G. South America: Brazil
 - H. Argentina
 - I. Columbia
 - J. Military Dictatorships in Latin America
 - K. Cuba
 - L. Haiti and the Dominican Republic

XXIV. Modern World Events, Challenges, and Successes

- A. Geography
- B. Globalization
- C. Population Challenges
- D. Migrating Populations
- E. Conflict and Revolution
- F. Climate Change
- G. Science, Technology, Medicine

VISUAL ARTS

I. Art History: Periods and Schools

- A. Modern Representational Painting
- B. 20th Century Photography
- C. 20th Century Sculpture
- D. Contemporary Art

II. Post-Modern Architecture

MUSIC

I. Elements of Music

II. Non-Western Music

III. Classical Music: Modern and Patriotic

- A. Music and National Identity
- B. Modern Music

IV. Modern Musical Performers

V. Vocal Music

- A. Opera
- B. American Musical Theater
- C. Song Ballads

MATHEMATICS

I. The Number System

II. Expressions and Equations

III. Functions

IV. Geometry

V. Statistics and Probability

SCIENCE

I. Contact Forces

- A. Motion
- B. Contact Forces
- C. Collisions

II. Sound Waves

- A. Sound Waves and Sound

III. Forces at a Distance

- A. Non-Contact Forces
- B. Magnetism and Electicity
- C. Gravity

IV. Earth in Space

- A. Earth, Moon, Sun
- B. Solar Systems
- C. Stars and Galaxies

V. Genetics

- A. Genetics
- B. Mutations
- C. Sexual and Asexual Reproduction

VI. Natural Selection and Common Ancestry

- A. Natural Selection
- B. Evidence of Common Ancestry
- C. Evolution

VII. Science Biographies

I. Listening and Speaking

A. Classroom Discussion

- Actively participate in discussions about a variety of Grade 8 topics, ideas, and texts in a variety of settings, including partners, small and large groups, and teacher-led groups.
- Prepare for discussions in advance, including researching the topic and organizing information for the discussion. Draw on preparations during the discussion to analyze ideas and explore the topic further.
- Manage goals and deadlines, and define specific roles appropriate to a discussion.
- Follow rules for productive social engagement among peers; follow decision-making protocols (e.g., rubrics or principles) that help build effective social skills related to public discussions.
- Ask relevant questions to clarify conversations and ideas and to build upon remarks made by others.
- Use details to elaborate and comment on a topic, text, or issue being discussed; add insight to discussions or move discussions forward.
- Integrate the ideas, evidence, and viewpoints of multiple speakers before responding or posing questions during a discussion.
- Craft responses to questions, as well as comments, so that ideas, insights, observations, and evidence are relevant to the topic or issue being discussed.
- Demonstrate the ability to defend one's own point of view when presented with new information; adjust one's own point of view, if necessary, when presented with new evidence during a discussion.
- Interpret information from an array of media formats, such as visual (paintings, pictures, and animations), quantitative (graphs, charts, and diagrams), videos, and recordings.
- Explain how information from media formats reflects, enhances, or is otherwise suitable for the discussion, issue, or topic at hand.
- Identify and interpret the purposes, motives, or intentions of an array of information from media formats, such as political, commercial, and social agendas.
- Explain a speaker's argument, distinguishing the claims, evidence, and reasons speakers give and whether the claims are adequately supported.
- Evaluate the overall quality of the reasoning used in an argument and the relevancy of the evidence provided; identify and explain when and why particular evidence may be unnecessary, unrelated, or inappropriate.

B. Presentation of Ideas and Information

- Give a presentation about a topic or text, tell a story, or orally relate a personal experience in a logical and organized manner, including relevant descriptions, details, and facts that support main ideas or themes.
- Orally present a claim-based argument supported by evidence, curated details, and solid reasoning that demonstrates a focused emphasis on the essential points.
- Speak clearly at an understandable volume and pace; maintain eye contact.
- Support claims in presentations by adding evidence from relevant multimedia such as displays, images, videos, graphics, music, and recordings.
- Use relevant multimedia to enhance presentations and capture viewers'/listeners' attention.
- Use information from several multimedia sources, synthesizing it to explain, crystalize, elaborate, or elucidate information for viewers/listeners.
- Switch between formal and informal English as appropriate to the situation or task; adapt speech to a variety of contexts.

- Show proficiency when using formal English, such as standard pronunciation when giving speeches or speaking to large groups and in formal circumstances, such as a job interview.

II. Reading

A. Reading Comprehension and Response—All Texts

- Independently and proficiently read and comprehend longer works of fiction (stories, plays, and poems) and literary nonfiction written at the high end of grades 6 through 8.

Grasping Specific Details and Key Ideas

- Identify and utilize the most appropriate supporting evidence from texts when explaining them or making inferences.
- Quote or cite accurately from texts when using evidence to explain them or make inferences.
- Identify the central ideas or themes in a text and explain how they develop.
- Understand how the component parts in literary works or supporting ideas in informational texts build themes or big ideas.
- Summarize texts objectively.

Observing Craft and Structure

- Determine the meaning of words and phrases in a literary or nonfiction text, including Tier 2 academic vocabulary and Tier 3 subject-area vocabulary.
- Consider the impact of word choices on meaning and tone.
- Analyze the structures of several texts to determine how structures create meaning and influence style; then, compare and contrast the texts, considering the impact on meaning and style each structure has.
- Evaluate in detail how sentences cooperate in paragraphs to build and organize key ideas, key concepts, and key details (versus extraneous information) and, in turn, how paragraphs cooperate to build ideas and organize information in texts.

Integrating Information and Evaluating Evidence

- Explore the advantages and disadvantages of various media, such as books or other printed materials, videos, digital photography, or recordings, to convey ideas or explore a topic.
- Compare and contrast different texts with the same topic, themes, or genre.

B. Reading Comprehension—Fiction, Drama, Poetry

- Analyze analogies, allusions to other texts, and figurative language, such as metaphors and similes, to determine meaning.
- Determine connotative meanings of words in literary texts.
- Consider the function of dialogue in stories and plays, focusing on how it moves a story forward, reveals aspects of a character's personality, causes characters to take action, influences how characters interact with each other, or otherwise affects the events of the plot.
- Compare and contrast a script or written version of a story to a filmed version or live performance, analyzing the extent of the departures from the original or faithfulness to it and the effectiveness of the artistic choices made by the director or actors.
- Explore how authors use dramatic irony to
 - create a different point of view for the audience or reader than the point of view of the characters in a story or drama.
 - create differing points of view and levels of awareness among characters in the same story or drama.

- involve or affect the reader or audience by creating differing points of view and levels of awareness for characters in the same story or drama.
- build suspense or humor by contrasting points of view and levels of awareness among characters or between the reader/audience and the characters in a story or drama.
- Analyze archetypal plot patterns, themes, and character types and other literary devices and allusions from foundational literary works used in modern fiction.
- Compare modern fiction with the sources it draws from for inspiration, such as traditional stories, epic poetry, mythology, and religious works (e.g., the Bible), with a focused discussion on how stories from the past are modernized.

C. Reading Comprehension—Nonfiction and Informational Text

- Effectively summarize all types of informational texts.
- Analyze technical meanings, analogies, and allusions to other texts to determine meaning.
- Understand and explain the relationships and interactions between two or more individuals, events, or ideas in a text and how the author integrates them.
- Identify the structure of a text at the sentence and paragraph level and how it helps develop and hone big ideas and key concepts.
- Identify an author's point of view and purpose in a text.
- Explain how an author distinguishes their own point of view from that of others in a text, focusing on how an author responds to evidence and/or viewpoints that conflict.
- Analyze the advantages and disadvantages of various mediums' (print, digital, video, and multimedia) ability to relate information to the reader or viewer about a particular topic or idea.
- Explain how an author supports arguments in a text by giving reasons (opinions) and evidence, such as facts, examples, and expert opinions from reliable sources.
- Distinguish between claims that are supported and those that are not.
- Examine the overall soundness of the reasoning in an argument and the quality of the evidence supporting it; identify unnecessary, unrelated, or inappropriate evidence.
- Compare and contrast texts containing conflicting information or arguments, identifying the conflict precisely and distinguishing whether the conflicting information is a matter of disparate facts, interpretations, or opinion/viewpoint.

III. Writing

Teachers: Students should be given opportunities to compose narratives, persuasive essays, and expository writing. Students should examine their work with attention to unity, coherence, and emphasis. Narratives should present a logical sequence of events, and include concrete details. Persuasive pieces should incorporate credible sources, support claims, and consider counter arguments. Expository essays should have a main point and stick to it, and have a coherent structure, typically following the pattern of introduction, body, and conclusion. Paragraphs should have a unified focus, be developed with evidence and examples, and have transitions between them. Essays should have appropriate tone and diction, as well as correct spelling and grammar in their final form. Standards for writing apply across the disciplines.

A. Writing to Reflect Audience, Purpose, and Task

- Write routinely, clearly, and coherently, completing both short-term and long-term assignments focused on a range of different tasks, purposes, and audiences.
- Strengthen existing writing skills (sentences, paragraphs, transitions, introductions, and conclusions) by applying them to longer and genre-specific writing assignments.
- Use the steps of the writing process to develop and strengthen writing: plan, draft, share, evaluate, revise, edit, and publish.
- Use conventional language standards when editing.

- Maintain a consistent style and tone appropriate to the genre of writing and audience.
- Use keyboards, tablets, the Internet, and other technologies to produce and publish writing and collaborate and communicate with others.
- Use the Internet to research and cite sources.

B. Writing to Analyze and Understand Text

- Analyze literature in writing: trace archetypal plot patterns, character types, and themes in modern fiction and compare and contrast them with the sources they draw on, such as epic poetry, the Bible and other religious works, traditional stories, and myths.
- Discuss and analyze, in writing, how authors modernize the archetypal source material they use for inspiration.
- Use literary elements as evidence for analyzing literature to strengthen reflection and analysis skills.
- Describe an analysis of informational texts in writing:
 - Explain how authors make and support their points or claims with reasons and factual evidence.
 - Explain how specific pieces of evidence support specific claims.
 - Discuss, in writing, whether the reasoning and evidence in an argument are valid and adequate.
 - Discuss, in writing, why evidence is invalid (e.g., unnecessary, unrelated, or inappropriate).
- Use details and facts as evidence for analyzing informational texts to strengthen research and analysis skills.

C. Conducting Research

- Conduct short research projects focused on answering a specific research question, especially one posed by the student.
- Gather relevant information from several different print and digital sources and use it to support research.
- Adjust the research question as appropriate throughout the information-gathering process.
- Use the information-gathering process to pose related questions and explore additional topics and avenues of inquiry requiring further research.
- Determine the credibility of information gathered from print and digital sources.
- Accurately quote or paraphrase from sources without plagiarizing.
- Practice honing keywords and key phrases to produce more effective online searches.
- Cite sources and provide a basic bibliography.

D. Narrative Writing

- Produce narrative pieces that reflect real-life or imagined experiences.
- Introduce a narrator, a situation, and characters, and develop them through dialogue, pacing, and exposition, including actions, thoughts, feelings, and reactions to events in the plot.
- Organize a well-structured logical or natural sequence of plot events following from the situation, using time-order and transitional words, phrases, and clauses to indicate and manage the event order.
- Incorporate shifts in time and multiple settings, interconnecting them with events and experiences that move character development forward.
- Include concrete and sensory details to make writing vivid and precise; convey a sense of experiences and/or the sensations that accompany experiences.
- Provide a sense of closure that follows logically or artfully from the situation, character responses, and sequence of events.

E. Informative/Explanatory Writing

- Write reports and other types of informational texts that clearly focus ideas and information.
- Introduce a topic with information organized in related sections or paragraphs and developed with well-curated facts, definitions, quotations, examples, and details.
- Organize ideas, concepts, and information using broad categories.
- Group related information logically and incorporate formatting features, such as headings, graphics, charts, and other multimedia.
- Include visual elements such as photos, drawings, or diagrams to help explain or present ideas or information when appropriate.
- Use a variety of transitions to connect ideas and concepts from distinct categories and to clarify relationships; use transitions to create an overall sense of cohesion.
- Establish and maintain a formal style.
- Use Tier 2 and/or Tier 3 domain-specific vocabulary to explain or elaborate topics.
- Write a conclusion that wraps up ideas in the text.

F. Persuasive Writing/Opinion

- Write persuasive essays with well-defined theses and arguments that use clear reasons, examples, and relevant evidence to support claims.
- Follow through with an organizational structure that supports the purpose of the text, grouping ideas, reasons, counterclaims, and evidence in a logical way.
- Demonstrate the use of logical reasoning to support claims throughout the essay.
- Demonstrate a clear understanding of the topic and argument.
- Anticipate and answer counterarguments.
- Distinguish evidence from opinion and claims from counterclaims.
- Use linking words, phrases, and clauses to connect opinions with reasons and evidence, distinguish a counterclaim, and create an overall sense of cohesion.
- Establish and maintain a formal style and reasonable tone.
- Identify and use accurate, credible sources.
- Write a conclusion that effectively and logically wraps up the argument.

IV. Language Conventions

A. Command of Language

- Use knowledge of language conventions when reading, writing, speaking, and listening.
- Use active and passive verbs and voice to portray the conditional and subjunctive mood—that is, states and actions tied to hypothetical scenarios (e.g., *if . . . then*, *wish*, *would*) of varying degrees of possibility.
- Use the conditional and subjunctive mood to create desired effects, express uncertainty, or communicate the fantastical.
- Use the conditional and subjunctive mood to emphasize both the person hypothesizing and the ideas being hypothesized.

B. Spelling

- Apply known spelling strategies when writing.
- Apply known morphology skills (roots, prefixes, suffixes, and spelling changes) to correctly spell words.
- Continue work with spelling, with special attention to commonly misspelled words.

C. Grammar

Teachers: Students should have a working understanding of the following terms and be able to use them to discuss and analyze writing.

- Understand and apply the basic rules of English grammar and conventions when writing or speaking.
- Know the function of verbals generally and how they are used in sentences, including:
 - Participles
 - Identify past, and present participles.
 - Identify participial phrases.
 - Find the noun modified.
 - Correctly use commas with participial phrases.
 - Gerunds and gerund phrases
 - Identify and tell its use in the sentence (subject, direct object, indirect object, appositive, predicate nominative, or object of preposition).
 - Infinitives and infinitive phrases
 - Adjective and adverb: find the word it modifies.
 - Noun: tell its use in the sentence.
- Form cohesive sentences using both passive and active verbs and voice.
- Form and use verbs in the indicative, imperative, interrogative, conditional, and subjunctive mood.
- Correct erroneous shifts in verb voice and mood.

D. Capitalization and Punctuation

- Understand and apply the basic rules of capitalization and punctuation when writing or speaking.
- Use punctuation (comma, dash, and ellipsis) to indicate a pause or break.
- Use an ellipsis to indicate an omission.

E. Vocabulary

- Figure out the meaning of Grade 8 words and phrases, using a variety of strategies such as the following:
 - context clues
 - examples
 - definitions
 - cause-and-effect relationships
 - comparisons
- Use the overall meaning of a sentence as a clue to the meaning of words within the sentence.
- Figure out the meaning of words based on the word's position and function within a sentence, such as part of speech, subject, predicate, object, etc.
- Use a dictionary, thesaurus, or glossary—print or digital—to answer questions about the meanings and usage of unfamiliar words.
- Know how to use a dictionary—print or digital—to pronounce words correctly and determine a word's part of speech.
- Use a dictionary to find the precise meaning of words and phrases.
- Infer the meaning of words by using context, and then confirm the meaning in a dictionary.
- Make accurate interpretations of similes and metaphors and other types of figurative language, such as personification, based on context.
- Interpret figures of speech based on context, especially verbal irony and puns.
- Discern nuances in word meanings.

- Recognize and use word relationships to better understand words, such as
 - cause/effect
 - item/category
 - part/whole
 - synonym/antonym
 - analogies
- Distinguish connotations, or shades of meaning, among words with similar denotations (e.g., *picky*, *fickle*, *discerning*, *sophisticated*, *fastidious*, *persnickety*).
- Acquire grade-level Tier 2 general academic and Tier 3 domain-specific words and phrases and use them with accuracy.
- Use knowledge of Greek and Latin roots and affixes to figure out the meaning of a new word, such as

Note: More Latin and Greek words and roots are listed in grades 6 and 7. In the listings here, L = Latin, G = Greek. No single form of the Latin or Greek words is consistently used here, but rather the form that is most similar to related English words.

<u>Latin /Greek Word</u>	<u>Meaning</u>	<u>Examples</u>
<i>aequus</i> [L]	equal	equal, equation
<i>ago, acta</i> [L]	do, things done	agent, enact, transact
<i>anthropos</i> [G]	man, human being	anthropology, misanthrope
<i>ars</i> [L]	art	artist, artifact
<i>brevis</i> [L]	short	brevity, abbreviate
<i>canto</i> [L]	sing	chant, cantor
<i>caput</i> [L]	head	captain, decapitate
<i>clino</i> [L]	to lean, bend	incline, decline
<i>cognito</i> [L]	know	cognizant, recognize
<i>copia</i> [L]	plenty	copy, copious
<i>credo</i> [L]	believe	credible, incredulous
<i>culpa</i> [L]	blame	culpable, culprit
<i>dominus</i> [L]	a lord, master	dominate, dominion
<i>duco</i> [L]	lead	abduct, introduce
<i>fido</i> [L]	to trust, believe	confide, infidel
<i>fundo, fustum</i> [L]	pour, thing poured	effusive, transfusion
<i>genus</i> [L]	kind, origin	generic, congenital
<i>holos</i> [G]	whole	holistic, catholic
<i>jungo</i> [L]	join	junction, conjugal
<i>lego, lectum</i> [L]	read, thing read	intellect, legible
<i>locus</i> [L]	a place	local, dislocate
<i>loquor</i> [L]	speak	eloquent, loquacious
<i>medius</i> [L]	middle	mediate, mediocrity
<i>missio</i> [L]	a sending	emissary, mission
<i>morior</i> [L]	die	mortal
<i>nego</i> [L]	deny	negate
<i>nihil</i> [L]	nothing	nihilism, annihilate
<i>occido</i> [L]	kill	homicide, suicide
<i>pathos</i> [G]	suffering, feeling	sympathy, apathy
<i>pendo</i> [L]	weigh, hang	depend, pendant
<i>per</i> [L]	through	perceive, persist, persevere
<i>phobos</i> [G]	fear	phobia, claustrophobia
<i>positum</i> [L]	placed	position, opposite
<i>porto</i> [L]	carry	transport, export
<i>possum</i> [L]	be able	possible, potent
<i>pugno</i> [L]	to fight	impugn, pugnacious

<u>Latin /Greek Word</u>	<u>Meaning</u>	<u>Examples</u>
<i>punctum</i> [L]	point	punctual, punctuation
<i>rego</i> [L]	to rule	regular, regency
<i>sanguis</i> [L]	blood	sanguine
<i>satis</i> [L]	enough	satisfy
<i>scio</i> [L]	know	science, conscious
<i>solus</i> [L]	alone	solo, desolate
<i>sonus</i> [L]	a sound	unison, consonant
<i>sophos</i> [G]	wise	philosophy, sophomore
<i>spiritus</i> [L]	breath	inspire, spirit
<i>totus</i> [L]	whole	totalitarianism
<i>tractum</i> [L]	drawn, pulled	distract, tractor
<i>usus</i> [L]	use	abuse, utensil
<i>vacuus</i> [L]	empty	evacuate, vacuum
<i>verbum</i> [L]	word	verbal
<i>verto</i> [L]	turn	avert, convert, anniversary
<i>via</i> [L]	way, road	deviate, viaduct

Note: The poems listed here constitute a selected core of poetry for this grade. You are encouraged to expose students to more poetry, old and new, and to have students write their own poems. Students should examine some poems in detail, discussing what the poems mean as well as asking questions about the poet's use of language.

Note: Due to the amount of content presented, you may need to select poems/stories/essays/etc., rather than attempt to teach everything.

II. Poetry

A. Poems

"Chicago" (Carl Sandburg)

"Do Not Go Gentle into That Good Night" (Dylan Thomas)

"The Lake Isle of Innisfree" (William Butler Yeats)

"Lucy Gray (or Solitude);" "My Heart Leaps Up" (William Wordsworth)

"Mending Wall;" "The Gift Outright" (Robert Frost)

Polonius's speech from *Hamlet*, "Neither a borrower nor a lender be . . ." (William Shakespeare)

"Ozymandias" (Percy Bysshe Shelley)

Sonnet 18, "Shall I compare thee. . ." (William Shakespeare)

"Spring and Fall" (Gerald Manley Hopkins)

"A Supermarket in California" (Allen Ginsberg)

"Theme for English B" (Langston Hughes)

"The Hill We Climb" (Amanda Gorman)

"To Julia de Burgos;" "Rio Grande de Lioza;" "I Was My Own Route" (Julia de Burgos)

"Flight;" "No Place on the Map;" "More & More Meanings" (Margarita Engle)

"English Con Salsa" (Gina Valdes)

"A Wreath for Emmett Till" (Marilyn Nelson)

"I Am Accused of Tending to the Past" (Lucille Clifton)

"Frederick Douglass" (Robert Hayden)

"Ballad of Birmingham" (Dudley Randall)

B. Elements of Poetry

- Review: meter, iamb, rhyme scheme, free verse, couplet, onomatopoeia, alliteration, assonance
- Review:
 - forms: ballad, sonnet, lyric, narrative, limerick, haiku
 - stanzas and refrains
 - types of rhyme: end, internal, slant, eye

- metaphor and simile
 - extended and mixed metaphors
- imagery, symbol, personification
- allusion

III. Fiction, Nonfiction, and Drama

A. Short Stories

"The Bet" (Anton Chekov)

"Dr. Heidegger's Experiment" (Nathaniel Hawthorne)

"God Sees the Truth But Waits" (Leo Tolstoy)

"An Honest Thief" (Fyodor Dostoyevsky)

"The Open Boat" (Stephen Crane)

Us, in Progress: Short Stories About Young Latinos (Lulu Delacre)

B. Novels

Frankenstein (Mary Shelley)

The Squatter and the Don (Maria Ruiz de Burton)

C. Elements of Fiction

- Review:
 - plot and setting
 - theme
 - point of view in narration: omniscient narrator, unreliable narrator, third person limited, first person
 - conflict: external and internal
 - suspense and climax
- Characterization
 - as delineated through a character's thoughts, words, and deeds; through the narrator's description; and through what other characters say
 - flat and round; static and dynamic
 - motivation
 - protagonist and antagonist
- Tone and diction

D. Essays and Speeches

"It Was a Great Day in Jersey" by Wendell Smith (1946)

From *Coming of Age in Mississippi* by Anne Moody (1968)

From *Rosa Parks: My Story* (1992) From *The Genius of the Harlem Renaissance*, Volume 2

"Don't Ride the Bus"—Leaflet by Jo Ann Robinson, Women's Political Council (1955)

"Sit Down Chillun, Sit Down!" by Wilma Dykeman and James Stokely (1960)

"I'm Not Free Unless My Brothers Are Free"—Freedom Rider Robert (1961)

"Which Side Are You On?" by James Farmer (1985)

"Letter from Birmingham Jail" by Martin Luther King, Jr. (1963)

President John F. Kennedy's Speech on Civil Rights (1963)

"I Have a Dream"—Speech by Dr. Martin Luther King, Jr. (1963)

From *Selma, Lord, Selma: Girlhood Memories of the Civil Rights Days* by Sheyann Webb (1980)

"The Ballot or the Bullet"—Speech by Malcolm X (1964)

Equal Rights for Women: A Speech to the U. S. House of Representatives by Shirley Chisholm (1969)

Note: See also History Grade 7: The Kennedy Years, re J. F. Kennedy; The Civil Rights Movement, re M. L. King, Jr.; and, The Rise of Social and Environmental Activism, re Rachel Carson.

"Together, You Can Redeem the Soul of Our Nation," by John Lewis (2020)
 "Ask not what your country can do for you" (John F. Kennedy's Inaugural Address)
 "I have a dream"; "Letter from Birmingham Jail" (Martin Luther King, Jr.)
 "The Marginal World" (Rachel Carson)
 "The World is Waking Up" (Greta Thunberg)

E. Autobiography

Narrative of the Life of Frederick Douglass (Frederick Douglass)

F. Drama

- *The Importance of Being Earnest* (Oscar Wilde)
- Elements of Drama
 - Review:
 - tragedy and comedy
 - aspects of conflict, suspense, and characterization
 - Farce and satire
 - Aspects of performance and staging
 - actors and directors
 - sets, costumes, props, lighting, music
 - presence of an audience

G. Literary Terms

- Irony: verbal, situational, dramatic
- Flashbacks and foreshadowing
- Hyperbole, oxymoron, parody

VII. Foreign Phrases Commonly Used in English

Teachers: Students should learn the meaning of the following French words and phrases that are commonly used in English speech and writing.

au revoir - goodbye, until we see each other again

avant-garde - a group developing new or experimental concepts, a vanguard

bête noire - a person or thing especially dreaded and avoided [literally, "black beast"]

c'est la vie - that's life, that's how things happen

carte blanche - full discretionary power [literally, "blank page"]

cause célèbre - a very controversial issue that generates fervent public debate [literally, a "celebrated case"]

coup de grâce - a decisive finishing blow

coup d'état - overthrow of a government by a group

déjà vu - something overly familiar [literally, "already seen"]

enfant terrible - one whose remarks or actions cause embarrassment, or someone strikingly unconventional [literally, "terrible child"]

fait accompli - an accomplished fact, presumably irreversible

faux pas - a social blunder [literally, "false step"]

Madame, Mademoiselle, Monsieur - Mrs., Miss, Mr.

merci - thank you

pièce de résistance - the principal part of the meal, a showpiece item

raison d'être - reason for being

savoir-faire - the ability to say or do the right thing in any situation, polished sureness in society [literally, "to know (how) to do"]

tête-à-tête - private conversation between two people [literally, "head to head"]

Grade 8 | History and Geography

We can better understand our own societies by learning about the many other societies that have existed at different times and in different places around the globe. Challenges that exist now are often rooted in the past—sometimes in the very distant past.

Understanding history can help us try to solve and prevent problems today. The study of history also allows us to understand and enjoy art, literature, and music. It teaches us about different perspectives and systems of belief.

In addition, the study of geography, aims at understanding the spatial relationship between nature and human culture and processes that change environments. Following the main outline of the history curriculum, middle school students study the geography of Europe including Russia, Japan, the Middle East, Southeast Asia, Asia, Africa, Mexico, and Central and South America. Students should learn locations as well as the relationships between physical and human systems.

World History

I. Mesopotamia

A. Geography

- Fertile Crescent
- A “cradle of civilization”
- Crossroads of trade, culture, and conquest
- Importance of Tigris and Euphrates Rivers, and River Valley

B. Background

- Farming methods including irrigation and organized settlements
- Scribes and development of cuneiform, a form of writing; clay tablets
- Discovery of key principles of astronomy, mathematics, physics, medicine, and art
- Technology including chariots, sailboats, and metallurgy
- Complex buildings including ziggurats
- Polytheism
- Primary sources
- Artifacts
- Priest-kings and eventual hereditary rule
- Civil servants
- Southern Sumerian city-states including Ur, Kish, and Uruk
- King Sargon, ruler of Akkad in northern Mesopotamia, conquered and joined together Sumerian city-states.
- Amorites, founders of Babylon
- Code of Hammurabi, early code of laws inscribed on stone and publically displayed; “an eye for an eye”
- Assyrian Empire, army included skilled engineers
- City of Nineveh, seat of Assyrian power
- Assyrian King Ashurbanipal built one of world’s first libraries.
- Epic of Gilgamesh, a surviving treasure from library of Nineveh
- King Nabopolassar and the Neo-Babylonian Empire
- Nebuchadnezzar, son of King Nabopolassar, rebuilt Babylon, including the Ishtar Gate

Timeline

II. Ancient Egypt and Kush

Timeline

A. Geography of region

- The Nile begins as two rivers—the White Nile and the Blue Nile
- Sahara Desert
- Importance of Nile River as highway for trade
- The Nile meets the Mediterranean and branches into a delta, an area of fertile marshland.
- Flooding brought silt onto land, allowed for farming crops such as wheat, barley, and flax
- Intensive farming began after 6000 BCE; plows and irrigation canals, and the shadoof
- Egyptians named their territory Kemet
- 4000 BCE two large settled areas of Egypt—Upper Egypt (south), Lower Egypt (north); Upper and Lower unified around 3000 BCE
- Memphis, the capital of unified kingdom

B. Government and Rulers

- Unified Egypt ruled by pharaohs
- Over 3000 years of dynasties; historians group this into three major periods—Old Kingdom, Middle Kingdom, and New Kingdom; 1600s BCE Middle Kingdom weakened
- Pharaoh Hyksos established a new dynasty, beginning Egypt's New Kingdom
- Hatshepsut, woman pharaoh, ruled Egypt from 1479 to 1458 BCE
- Tutankhamun (1300s BCE) ruled for ten years; his tomb discovered in 1922
- Ramses II and the Golden Age; Ramses held power between 1279–1213 BCE
- Ramses II built new capital city, temples, statues
- Ramses II, an expansionist ruler; conflict with Hittites
- Egyptians believed pharaohs chosen by the gods; pharaohs had a duty to uphold order, peace, and justice, a concept known as *ma'at*

C. Belief Systems

- *Ma'at* was the concept of harmony and the name of the goddess who oversaw this concept
- Belief in judgment after death; dead person's heart weighed on scale against *Ma'at's* feather of truth; a harmonious life earned a good afterlife
- Belief that gods and goddesses were active in the human world; gods sometimes depicted with human bodies and animal heads
- Osiris and Set
- Belief that a person's soul could not pass to the afterlife without its body; bodies preserved by mummification
- Societal social structure developed with a powerful ruling class; priests were part of powerful ruling class; the enslaved were bottom of social structure
- Role of women in Egyptian society
- Priests maintained temples to the gods and performed mummification; gained understanding of human anatomy; not all Egyptians mummified
- Royal and upper-class Egyptians built monuments and tombs to preserve their remains and their riches

D. Structures and Contributions

- Imhotep the architect; the pyramid structure
- The Great Pyramid and the Great Sphinx
- Pictorial writing system—hieroglyphics; over time developed into three broad types
- Egyptians wrote on stone, clay, and papyrus
- Rosetta Stone

E. Decline of the Egyptian Empire

- Egyptian decline; invasions
- During time of Hyksos, Kush expanded northwards
- Around 745 BCE Kush invaded and defeated Egypt
- Kushite King Piye became a pharaoh
- Kushites, under pressure from Assyrians, retreat to the south; established new capital, Meroë, which became a center for iron production
- Kushites established thriving trade network
- In 350 BCE Axum invaded and conquered Kush

III. The Israelites

A. Geography of region

- The Israelites lived in a historic region sometimes called the Levant; area corresponds to modern-day Israel, Jordan, Lebanon, and Syria; today is called Near East or Middle East

B. Background

- Originally a nomadic people, the Israelites settled in area called Canaan
- Over time, the city of Jerusalem became center of Jewish culture
- Monotheism
- Early collection of Jewish holy writings in work known as Tanakh or Hebrew Bible
- Abraham and his descendants; covenant
- Roots of three religions: Judaism, Christianity, and Islam
- Israelites in Egypt
- Moses, Exodus, Ten Commandments
- Promised land of Canaan
- Joshua and Jericho
- Tribes of Israel
- House of David
- Solomon and the First Temple
- Development of monotheistic society based on God's laws
- Phoenicians came into area by 3000 BCE; lived along eastern Mediterranean, in coastal areas of present-day Syria, Lebanon, and northern Israel
- Phoenician sailors, navigators, and trade
- Phoenicians developed an alphabet
- Philistines settle in region around 1200 BCE
- Assyrians
- Babylonian king Nebuchadnezzar conquered Jerusalem
- Nebuchadnezzar destroys Jerusalem and the temple
- Babylonian captivity
- Babylon conquered by Persian Empire
- Persian king Cyrus II allows Jews of Babylon to return to Judah
- Diaspora and the Second Temple
- Queen Esther
- Persians defeated by Alexander the Great
- Greek culture spreads throughout eastern Mediterranean
- 164 BCE Jewish leader Judas Maccabeus leads revolt
- Judas and followers known as Maccabees take power in Judah

Timeline

- Hanukkah and the menorah
- Roman Rule in Judaea
- Dead Sea Scrolls

IV. The Ancient Greeks and Greek Civilization

A. Geography of region

- Mainland of Greece is a peninsula surrounded by water on three sides; beyond mainland much of Greece is an archipelago; Crete is largest island
- Mainland has two major zones—central and northern zone is mountainous; southwest is the Peloponnese, a peninsula connected to rest of mainland by a narrow strip of land, or isthmus
- Eighty percent of land taken up by mountains
- Mediterranean and Aegean Seas

B. Background

- First civilizations in region were not Greek
- Minoans flourished on island of Crete between 2700 and 1500 BCE
- Minoan palace at Knossos on Crete; frescoes
- King Minos
- Mycenaean Civilization, named for city of Mycenae; dominant culture in the Peloponnese and several islands between 1700 and 1100 BCE
- Mycenaean settlements included Sparta, Thebes, Argos, Athens, and Tiryns
- Mycenaean civilization influenced Greek civilization
- Around 750 BCE, inhabitants of Greece known as Hellenes; ancient Greek culture came to be called Hellenic
- Greeks established small kingdoms; traded with Egyptians and Phoenicians
- Adapted Phoenician alphabet to create a Greek alphabet

C. Life in Greece

- Greeks practiced polytheism, belief in many gods
- Mount Olympus, home of most powerful and influential gods; court of Zeus, king of the gods
- Olympic Games, held at Olympia in honor of Zeus
- Establishment of city-states including Athens, Sparta, Corinth, Thebes, Syracuse, and Rhodes; polis
- Tyrants and Oligarchs
- Concept of citizenship and citizens
- Solon's reforms and the development of Athenian democracy
- Athenian culture; education, debate, philosophy, literature, and music; symposia
- The Assembly
- Cleisthenes increased power of Assembly; enabled men over eighteen who owned property to participate in government
- Sparta's military might; all men served in military
- Sparta led by two kings who ruled together
- Rivalry between Athens and Sparta
- Persian wars; Marathon, Thermopylae, and Salamis
- Herodotus, early historian
- Golden Age of Athens; Delian League
- Pericles, a strong military commander; oversaw construction of Parthenon

Timeline

- The Peloponnesian War: Sparta defeats Athens in 405 BCE
- Greek Literature and Drama; Greek tragedies; the *Iliad* and the *Odyssey*; Aesop's fables; Sophocles, Aeschylus, and Euripides
- Philosophers of Athens; Socrates and Socratic method; Plato and Plato's Republic; Plato's Academy; Aristotle
- Alexander the Great and the spread of Greek ("Hellenistic") culture

V. Ancient India

A. Geography of South Asia

- India lies on a peninsula called a subcontinent; relative separation from rest of Asia; part of separation created by Himalayas which stretch across northern part of region—highest mountains in world; Hindu Kush mountain range to the west; subcontinent also includes Pakistan, Nepal, Bangladesh, and Bhutan
- Indus River and Ganges River
- Mountains and plateau

B. Background

- Indus civilization arose in northwest part of subcontinent around 2600 BCE
- Covered much of area now known as Pakistan
- Farming and livestock; crops included rice, grains, dates, lentils, and sesame; fruit trees
- Farming methods, including crop rotation and irrigation; plow
- Numerous organized settlements, including Mohenjo-Daro and Harappa
- Cities designed on a grid system; courtyards; granaries, public baths, drains, and sewers
- Trade with other parts of the subcontinent
- Developed standardized weight system, written language called Indus or Harappan
- Many modern languages grew out of the Indo-European language group, including Hindi
- Vedic Period; small kingdoms; farming; agriculture around Ganges River Valley
- Sanskrit

C. Belief Systems

- Vedas, some of the oldest religious texts in the world; texts are considered to reflect divine truth and sacred knowledge; first transmitted orally, later written down; the four Vedas are called Rig Veda, Yagur Veda, Sama Veda, Atharva Veda; Rig Veda is the oldest
- Varnas and Jatis
- Hinduism Brahma, Vishnu, and Shiva; avatars
- Epic poems—Ramayana and Mahabharata
- Reincarnation; karma
- Buddhism and Prince Siddhartha Gautama; Buddha, "enlightened one"
- Nirvana
- Four Noble Truths and the Eightfold Path
- Jainism

D. Rulers

- The Mauryan Empire and Chandragupta Maurya
- King Ashoka (also spelled Asoka)
- Gupta Empire

VI. Early China

Timeline

A. Geography

- China's eastern border at the edge of the Pacific Ocean; to the north lies the Gobi Desert; to the southwest, China's border with India is formed by the Himalayas; geographical factors provide China with formidable physical borders
- Huang He (Yellow River) and Yangzi (Yangtze, Chang Jiang) River
- Early civilization arose in valley around the Huang He
- Farming methods; grains, rice, soybeans, tea, mulberry trees

B. Background

- Developed one of world's oldest writing system; at first, symbols represented objects
- Early Chinese civilization shaped by several dynasties with sophisticated political states
- Xia dynasty; Yu the Great
- Shang dynasty rose to power around 1766 BCE; King Tang
- Daoism
- Zhou dynasty 1046 BCE; promoted idea of divine right; first Zhou king, Wen; feudal system
- Spring and Autumn Period 770 BCE; semi-independent states
- Confucianism, influential product of Spring and Autumn period; named for Chinese philosopher Kong Qiu; Golden Rule; five basic relationships; filial piety
- Warring states period lasted from 481 to 221 BCE; first known military manual written at this time, known as *The Art of War*
- Qin Empire; Ying Zheng, took title Shihuangdi, meaning first emperor; tried to unify China; Lingqu Canal; begins construction of Great Wall; Terracotta Warriors
- Han dynasty ruled for more than four hundred years, from 202 BCE to 220 CE; Xiang Yu; Emperor Wu; trade in silk and spices, the Silk Road, invention of paper
- Increased trade, and contact with foreigners, enabled spread of Buddhism into China

VII. Rome: Republic to Empire and Roman Civilization

A. Geography

- Region where city of Rome established called Latium
- Mediterranean Sea, Aegean Sea, Adriatic Sea
- Apennine Mountains, Alps
- Greece, Italy (peninsula), France, Spain
- North Africa, Asia Minor (peninsula), Turkey
- Bosporus (strait), Black Sea, Istanbul (Constantinople)
- Red Sea, Tiber River, Persian Gulf

B. Background

- Etruscans
- Greek ruler Pyrrhus defeated by Romans in Southern Italy
- The Republic: Senate, Consuls, Patricians, Plebeians
- Plebeian Council
- Punic Wars: Carthage, Hannibal, Battle of Cannae, 216 BCE
- Scipio

C. Life in Ancient Rome

- The Forum: temples, marketplaces, etc.
- The Colosseum: circuses, gladiator combat, chariot races

- Theater and Poetry
- Roads, bridges, sewer system, public toilets, public baths and aqueducts
- Worship of gods and goddesses, largely based on Greek religion
- Most Romans spoke a version of Latin; Greek spoken also
- Greek philosophy, especially Stoicism and Epicureanism, influential in the Republic
- Cicero, Seneca, Pliny the Elder

D. The Decline of the Republic and Fall of Western Empire

- Conflicting interests of *optimates* and *populares*
- Gaius Julius Caesar, Gnaeus Pompeius Magnus (Pompey), Marcus Licinius Crassus held power as the First Triumvirate
- Caesar elected Consul, given command of Roman armies, aligned with *populares*
- Caesar crosses Rubicon, declares war on Pompey
 - Defeats Pompey
 - Pompey in Egypt
 - Caesar in Egypt
 - Caesar becomes Dictator for life in 44 BCE
 - Cleopatra of Egypt
 - Ides of March, Caesar assassinated in the Senate, Brutus, Cassius
 - Marcus Antonius and Octavian defeat Brutus and Cassius
 - Octavian becomes Augustus Caesar; *imperator*; period of peace and stability (Pax Romana) with integration of non-Romans into Roman society; reorganization of tax system
 - Virgil and the Aeneid
 - Ovid and *Metamorphoses*
- Expansion of empire, challenges the old Republican form of government
- Management and defense challenges of vast Roman empire; millions of inhabitants
- Emperor Diocletian (284 to 305 CE) split empire into two halves, each with its own emperor; western half ruled from Rome, eastern half ruled from Asia Minor
- Corruption and conflict over political power
- Constantine rises to power in 312 CE; moves capital to Byzantium
- Constantine adopts Christianity; makes Christianity Rome's official religion, ending persecution of Christians
- Weakened by outside attacks, particularly Germanic tribes
- City of Rome sacked in 410 CE
- Western Roman emperor defeated by Germanic chieftain, Odoacer

E. Byzantium

- The rise of the Eastern Roman Empire, known as the Byzantine Empire
- Trading Center
- Constantinople (now called Istanbul) merges diverse influences and cultures.
- Justinian (527 to 565 CE), Justinian's Code
- Outbreak of plague, depleting population
- Rise of Islamic Rulers

VIII. Islamic Civilizations

A. Geography

- Arabian Peninsula is the largest peninsula in the world; it is surrounded by the Red Sea; it is part of the continent of Asia
- Persian Gulf, Arabian Sea, Mediterranean Sea
- Plateau, Sandy Deserts, Dry Plains, Oases

B. Pre-Islamic Arabia

- Part of trade network linking ancient civilizations including Egypt, Kush, Mesopotamia, Persia, China, India, Greece, Rome
- Trees produced resins, frankincense and myrrh; Silk Road; Gold, Ivory, Silks, Spices
- Introduction of camels
- Growth of trading centers Mecca and Medina
- Nomadic herdsman
- The Nabataeans ruled for a time; built Petra; managed water with cisterns

C. Muhammad

- Much of the story of Muhammad, and early Islamic customs and practices come from the Hadith and the Sunna
- The Quran is Islam's most holy book.
- Muhammad: the last prophet, thought to have been born in Mecca, in present day Saudi Arabia around 570 CE; family part of Quraish tribe
- Orphaned and raised by relatives; traveled with uncle's trading caravan
- Married Khadija; became a merchant
- Sought spiritual understanding at age forty; went to a cave
- Muhammad believed God and angel Gabriel spoke to him through visions; instructed to spread Islam, a word meaning surrender or submission to God
- Muhammad shares revelations; meets opposition, especially in Mecca
- Muhammad and followers go to Medina (the Hijrah)
- Muhammad receives more revelations in Medina; begins new Islamic society
- Many Jewish residents leave Medina
- Muhammad organizes fighting force; takes over Mecca; rejects pagan gods; Mecca becomes important site of Islamic worship

D. Islam

- Main tenets of Islam called the five pillars: Profession of Faith; Prayer; Alms; Fasting; Pilgrimage
- After Muhammad's death around 632 CE, the first caliph was Abu Bakr; the second caliph was Umar; the third caliph was Osman
- Umar and Osman expand territory under Islamic control
- Osman creates administrative divisions of Islamic state; overseas official version of Quran
- Osman killed; Muhammad's cousin Ali becomes caliph
- Civil War breaks out with two opposing factions; Muslims become divided into two main groups—Shia, who followed Ali' Sunni who rejected Ali
- Islam expands into Africa, Asia, and Southern Spain

E. Islamic Civilization

- Spread of Arabic culture, including language, art and architecture
- Cities throughout Islamic Empire become centers of learning, including Damascus and Baghdad
- Conflict with external enemies; clashes with Christian leaders in Europe; the Crusades
- Islamic Golden Age; trade; banking; universities; scholars; mathematics, including algebra and calculus; medical knowledge
- Avicenna (Ibn Sina); Five-volume medical encyclopedia—*The Canon of Medicine*; *The Book of Healing*
- Baghdad site of House of Wisdom
- Works of literature such as *The Thousand and One Nights*
- Emergence of Ottoman Empire

Timeline

IX. Maya, Inca, and Aztec Civilizations

A. Geography

- Mesoamerica—a historical region stretching from northwest of modern Mexico southward into isthmus connecting North and South America
- Gulf of Mexico, Pacific Ocean
- Yucatán Peninsula
- Amazon River; river basin
- Andes Mountains
- Altiplano
- Guatemala, Belize, El Salvador, Honduras, Mexico, Peru, Bolivia, Brazil, Columbia, Ecuador, Venezuela, Chile, Argentina, Paraguay, Uruguay, Guyana, Suriname, French Guiana
- Rainforest
- Atacama Desert

B. Background: Olmecs and Zapotecs

- Olmec civilization arose around 1200 BCE along Mexico's Gulf Coast; name Olmec comes from Aztec language, Nahuatl
- Olmecs extracted latex from rubber trees
- Inhabited large settlements such as the now called San Lorenzo
- Trade goods such as obsidian, jade, rubber, skins, pottery found at San Lorenzo, Las Limas, island of La Venta
- Constructed pyramids; large, carved stone heads; Olmec cave art
- Zapotec civilization centered in Valley of Oaxaca dates back to 1600 BCE
- City of Monte Albán founded in 500 BCE
- Use of water diversion and irrigation
- Declined due to outside invasion

C. The Maya

- Large, prosperous realm of linked cities prior to Europeans
- Sophisticated architecture; advances in astronomy, mathematics
- Writing system; Classic Period writing system contains more than eight hundred symbols
- Cities contained palaces, temples, public spaces
- Main cities in late Classical Period include Chichén Itzá, on Mexico's Yucatán Peninsula; Palenque and Calakmul, in Mexico; Caracol, in Belize; Copán, in Honduras; and several large centers in Guatemala, including Tikal
- Construction of pyramids
- Religious beliefs—three distinct but linked realms—sky, earth, underworld
- Popol Vuh collection of Maya religious stories
- Human sacrifice
- Maya planned rituals on a regular schedule, using a calendar called the Tzolkin (the count of days)
- Used astronomical observation to plan buildings
- Decline began around 800 CE; unclear as to why

D. The Aztec

- After Maya Classic Period ended around 900 CE, Mesoamerica underwent transitions as new population centers arose
- After several centuries, a new civilization arose in Central Mexico

Timeline

- From around 1300 CE, the Aztec rose in power through military successes; united most of northern region of Mesoamerica into an empire containing millions of people
- The Aztec built an empire centered in capital city of Tenochtitlán, where Mexico City stands today; Templo Mayor
- Lake Texcoco site of Tenochtitlán
- The Aztec believed in Pantheon of gods
- Like the Maya, the Aztec had a calendar system
- Aztec army contained skilled soldiers
- Sophisticated taxation system
- Human sacrifice
- Montezuma came to power in 1502 CE; expanded Aztec empire
- Spanish arrive in 1519 CE led by Hernán Cortés
- Montezuma taken hostage; submits to Cortés; Montezuma killed
- Spanish conquer Tenochtitlán
- Spread of European diseases causes decline in Aztec population

E. The Inca

- The Inca—one of several groups who lived in the Andes region
- In late 1300s CE, they began to conquer neighbors.
- Between 1400 and 1533 CE they established largest empire in the Americas.
- Heart of Inca Empire was city of Cuzco, in modern Peru.
- Inca rulers used labor of those conquered to build infrastructure—roads and bridges that connected the empire
- Highly skilled stoneworkers
- Macchu Picchu
- Social structure; empire divided into four parts with four governors
- Tax system
- Use of a quipu used for communicating information
- Distinctive art style; geometric shapes
- Ruler Atahualpa held hostage and then killed.
- Spanish invaders led by Francisco Pizarro killed thousands of Inca.
- Conquered Cuzco in 1533
- European diseases weakened the Inca.
- Last Inca ruler captured and killed by Spanish in 1572; Inca realm absorbed by Spanish crown

X. Imperial China

- North and south finally united by northern general, Yang Jian, who became Emperor Wendi
- Rise of Sui dynasty in 581 CE
- China united and ruled once again from old capital, Chang'an
- Emperor Wendi establishes new administrative bureaucracy; exam based placement in civil service
- Sui dynasty falls due to failed military campaigns and financial excess
- Emperor Wendi's son, Emperor Yangdi, killed by government official in 618 CE
- Chang'an captured by general Li Yuan; Li Yuan becomes known as Gaozu; first emperor of new Tang dynasty
- Gaozu creates new legal code.
- The Tang rule from 618 to 907 CE.

Timeline

- Empress Wu Zhao a Tang ruler; only woman to have ruled China
- Golden age in China, particularly during reign of Emperor Xuanzong; cultural achievements; woodblock printing; poets Li Bai and Du Fu
- Tea merchants gain great wealth.
- World's first paper money and gunpowder
- Period after the Tang is called the Five Dynasties and Ten Kingdoms period.
- Zhao Kuangyin establishes Song dynasty; becomes Emperor Taizu
- Increasing use of machinery and advances in agriculture
- New technologies such as magnetic compass, sternpost ship rudders, and movable-type printing press

A. The Mongols

- Temüjin was born in the 1160s to nomads who lived on the steppe north of China, in the region now called Mongolia; better known as Genghis Khan; elected as ruler of all Mongolia
- Genghis Khan creates a law code; has Mongol language written down
- Mongols traveled, hunted, and fought on horseback.
- Launched successful assaults on cities in northern China; attacked Korean peninsula, and lands in modern-day Russia, Ukraine, and Poland
- Genghis Khan died in 1227; sons inherited parts of his empire; most powerful part inherited by grandson Kublai Khan
- Between 1260 and 1271 CE, Kublai Khan's forces conquered Song Empire in south China
- Kublai Khan declares himself emperor of China; establishes capital at Beijing; adopts imperial name Shizu; his dynasty known as Yuan
- Expansion of trade
- Marco Polo (c.1254–1324) visits China; later wrote of his adventures *Il milione* (*The million*)
- Yuan dynasty declines after death of Kublai Khan
- New emperor, Hongwu, establishes Ming dynasty; distinctive style of pottery
- Great Wall construction
- Construct new palace complex in Beijing, known as Forbidden City
- Zheng He's fleet
- Ming dynasty taken over by the Manchu; they establish China's final dynasty as the Qing.

XI. Civilizations of Korea, Japan, and Southeast Asia

A. Geography

- East Asia and Southeast Asia includes China and lands to the north, south, and east; present-day Korea and Japan typically considered part of East Asia, as well as Vietnam, Cambodia, Thailand, Laos, Malaysia, Indonesia, and the Philippines
- East and Southeast Asia lie in and along the coast of Pacific Ocean.
- Peninsulas and archipelagos; western curve of Ring of Fire
- Tsunamis; typhoons
- Mount Fuji

B. Ancient Korea

- Many early settlements emerged on or near coastline
- Agriculture developed in river valleys and limited plains regions.
- 2000 BCE, people began to live in more concentrated farming villages; dolmens
- 700 BCE rice is grown as a staple; 300s BCE bronze metalwork given way to iron; jade and pottery

- 700s to 400s BCE, some towns united into first complex state in the peninsula, Gojoseon
- 108 BCE north of Korea conquered by Han dynasty of China; later, four rival states emerged (18 BCE to 660 CE); referred to as Three Kingdoms period
- Societal class system
- Korea unified by Silla kingdom in late 600s CE, aided by Chinese Tang dynasty; called Unified Silla kingdom
- Unified Silla monarchs came from Kim clan; organized kingdom into nine provinces run by governors appointed by the king
- Unified Silla kingdom declines in 900s CE; replaced by Goryeo (or Koryo) dynasty

C. Ancient Japan

- Yayoi began in 300 BCE
- Increased rice and vegetable production due to introduction of irrigation
- Yayoi divided among clans
- Kofun period lasted from 250 to 538 CE; burial mounds; introduction of Shinto beliefs; *kami*
- Yamato clan establishes power in regions around present-day Kyoto, Nara, and Osaka

D. Imperial Japan

- Emperor Kimmei, 539 to 571 CE; beginning of Asuka period
- Japanese emperors believed to be direct descendants of sun goddess, Amaterasu
- Prince Shotoku ruled as regent when Empress Suiko was on throne
- Well organized bureaucratic government cap system
- Emperors ruled from city of Nara from 710 to 794 CE
- Emperor Shomu (724 to 749 CE), established Buddhist temple in every province in Japan
- Heian period established major central rule at city now called Kyoto
- Heian nobility and cultural achievements including establishment of Japanese writing system; *The Tale of Genji* by Murasaki Shikibu
- Regional landlords raise private armies of warriors, called *samurai*
- Samurai bound to serve regional lords, called *daimyo*
- *Genpei War* (1180 to 1185 CE); clash between rival *daimyo*
- Minamoto Yoritomo declares himself *shogun*; Kamakura period, improvements to infrastructure
- Samurai develop code of ethics and cultural practices known as *bushido*.
- Tea ceremony and ink-brush calligraphy developed in this period
- Mongols and dynastic changes
- Japan entered warring states period between 1467 to 1615 CE; ongoing civil war
- Portuguese trade; firearms; Christianity
- Tokugawa clan take power in early 1600s; ruled from Edo, present-day Tokyo
- Tokugawa shogunate closed off Japan to rest of world

E. South East Asia

- Modern country of Vietnam located on Indochinese peninsula
- Khmer ethnic group built an empire; Angkor Wat
- Khmer empire ended when capital Angkor captured by Thai people in 1432 CE
- 1350 CE, Thai kingdom called Ayutthaya rose to power; capital Bangkok
- Ayutthaya kingdom ruled over large area of Southeast Asia for four centuries
- Malay people emerged in Malay peninsula, now modern country of Indonesia; eventually rule of Java and Sumatra

XII. Europe and Russia in the Middle Ages

A. Geography

- Continent of Europe
- Russia
- Atlantic Ocean, Mediterranean Sea
- Middle East; north Africa
- Eastern Europe
- Moscow
- Novgorod and Kyiv
- Dnieper River

B. Background: Europe

- Also called the medieval period, the Middle Ages lasted from about 500 CE to 1500 CE
- The term *Middle Ages* designates an era of European history between the classical period of ancient Greece and Rome and the Renaissance
- Historians generally break the Middle Ages into three periods: the early Middle Ages (500 CE to 1000 CE), the High Middle Ages (1000 CE to 1300 CE), and the late Middle Ages (1300 CE to 1500 CE)
- Aristocracy originated from Roman nobles
- Aristocratic status was largely hereditary.
- Aristocracy held most of the land, and virtually all military and political power.

C. Early Middle Ages

- Roman Empire had established many aspects of social structure which largely fell apart after fall of Rome
- Groups such as the Alemanni, Franks, Angles, Saxons, Vandals, Visigoths, and others began to migrate into the empire's territory in the third century CE, establishing their own regional cultures.

D. The Church

- With the decline of the Western Roman Empire, the only European-wide system was the Christian Church.
- Constantine made Christianity the official religion of the Roman Empire in 380 CE.
- Most important bishop within the hierarchy of the Church was the bishop of Rome (pope).

E. Charlemagne

- In the eighth century CE, the kingdom of the Franks was one of the strongest in Europe; one of its kings rose to power—Charles the Great or Charlemagne.
- Under Charlemagne, monastic libraries grew.
- Growth of Charlemagne's empire
- Parts of Charlemagne's lands eventually became lands of Germany and France.

F. High Middle Ages

- New period of greater calm began in Europe in 1000 CE.
- Population increased, as did life expectancy.
- Growth of towns and economy
- High Middle Ages saw development of organized feudal system
- Feudalism evolved into complex hierarchy dominated by royals and nobles
- Europe was politically divided into kingdoms (ruled by a king) and principalities (ruled by a prince, duke, or count).
- Gatherings of political advisors evolved into parliaments.

Timeline

- Bond of loyalty a defining feature of feudalism
- Distribution of land, and expansion of agricultural lands
- Development of a new plow, and changing farming methods; three-field rotation
- Military structure of the High Middle Ages dominated by mounted, armored knights and infantry
- Castle strongholds
- The English introduced longbows into warfare.
- Introduction of gunpowder
- By the end of the thirteenth century there were over a dozen universities in Europe.

G. Manorialism

- A manor was a rural, self-contained farming unit.
- Peasants worked on the manorial lands and were bound to the manorial lands by contract
- Peasants had little social power (serfs).

H. Towns and Expanding Trade

- Inhabited by trades people, artisans, craftspeople
- By 1100s, many towns had established guilds.
- Apprenticeship system
- Merchants and expanded trade links across Europe
- Silk road continued to be an important trade route for goods and ideas.

I. High Middle Ages Church

- The Church reached its greatest influence in the High Middle Ages.
- Nearly everyone's life revolved around the Church.
- Clergy were the main source of education and held great social and political power.
- Church architecture began to change during this period; abbey church of Saint-Denis
- Mechanical clock developed for the Church in second half of thirteenth century

J. The Crusades

- In High Middle Ages Europeans had expanded interest in the Holy Land.
- Rise of Islam
- In 1096 CE, the pope called for a crusade to take back the Holy Land for Christianity.
- Christians captured Jerusalem in 1099 CE.
- Knights Templars were a Christian military order founded around 1118 CE.

K. Late Middle Ages

- Europe's population began to slow around 1300 CE.
- Crop failure, famine, and population decline
- Black Death, 1347 CE; drastic decline in population
- Social and Political upheaval
- Hundred Year's War (1337–1453 CE); Peasant's Revolt, 1381 CE
- System of feudalism began to decline.
- Johannes Gutenberg printing press 1440 CE

L. Medieval Russia: Background

- Some of the patterns that defined medieval Europe were also part of medieval Russia, but there were ways in which Russia was quite different.
- While many peoples lived in the region in and around Russia, the Slavs and the Rus were two groups that became important.
- Byzantine missionaries brought Christianity to Russia around 900 CE.

- By the eleventh century Russia incorporated more long-distance trade than the West, and the cultural touchstones of art, literature, and architecture were more developed.
- Mongols defeated Rus in 1223 CE.
- Mongols created the largest contiguous empire the world has ever known.
- The Mongol invasion of Kievan Rus in 1223 CE left Russia with only a few small areas, such as Novgorod, remaining outside of Mongol control.
- The prince of Novgorod, Alexander Nevsky, maintained independence by negotiating with the Mongols. From this arose a new country, the Grand Principality of Moscow, or Muscovy.
- A strong ruler named Ivan became the grand prince of Muscovy in 1462 CE (Ivan the Great).
- Ivan the Great demonstrated military and political strength; developed strong central government; foundations of modern Russia

XIII. West African Kingdoms

A. Geography

- Continent of Africa
- Great diversity of climate and geographical zones across the continent of Africa including grassy savannas
- Atlantic Ocean, Indian Ocean, Mediterranean Sea, Red Sea
- Middle East
- Sahara Desert; Kalahari Desert; Sahel
- Sinai Peninsula
- Nile, Niger, and Congo Rivers
- Atlas Mountains
- Mount Kilimanjaro
- Madagascar (fourth largest island on earth)

B. Background

The vast continent of Africa has a great diversity of landscapes, resources, and cultures. Between the sixth and sixteenth centuries CE, several civilizations in North and West Africa served as important centers of trade and cultural exchange. The three great West African empires of Ghana, Mali, and Songhai rose to power in part because they controlled gold mines, salt mines, and the trade routes that linked these valuable resources to the rest of the world.

C. Africa during Europe's Medieval Period

- Several African civilizations enjoyed incredible prosperity, growing trade, and cross-cultural connections.
- This growth was helped by greater contact between Africans and the empires that ruled the regions surrounding Africa.
- Spread of Christianity and Islam
- Trans-Saharan trade fueled the rise of three mighty empires in West Africa. The Ghana, Mali, and Songhai Empires emerged in succession between the 400s and the 1400s CE
- West Africa was an important regional trade center that connected different parts of Africa as well as China, India, Arabia, and Europe
- Each of the three empires benefited from the region's deposits of gold and salt

D. Ghana Empire

- Situated south of the Sahara in the relatively less arid region of the Sahel, the Ghana Empire began as a regional kingdom of the Soninke people, who were part of a larger ethnic and language group called the Mande.

Timeline

- Most of what is known about the Ghana Empire has been passed down through either oral tradition or texts written by Arab merchants.
- It is likely that the main city was Koumbi Saleh (located in present-day Mauritania), which was home to thousands of people.
- The people of the Ghana Empire originally practiced an animist religion, as was common throughout West Africa.
- As Islamic civilization began to spread in the 700s CE, more and more Muslim merchants, diplomats, and others made their way to the Ghana Empire.
- By the end of the twelfth century CE, the Ghana Empire was an Islamic society.
- Conflict with various external groups weakened the empire, as did a change in climate and weather patterns.

E. Mali Empire

- Rise of West African kingdom of Mali began in 1235 CE when Mandinka leader called Sundiata Keita (Lion Prince or Hungering Prince) became the *mansa*, or emperor
- Sundiata Keita fortified trade routes and took control of the gold mines.
- City of Timbuktu became an important cosmopolitan center of the Mali Empire.
- Mali Empire taxed the goods that came through Timbuktu and their other cities
- Most powerful ruler of the Mali Empire was Mansa Musa, who reigned from 1312 to 1337 CE; doubled size of the empire; became one of the richest men in the world
- Around 1324 CE, Mansa Musa undertook a pilgrimage to Mecca.
- Mansa Musa supported the construction of mosques, Islamic schools, libraries, and universities.
- A combination of factors led to the eventual decline of Mali's power.

F. Songhai Empire: Background

The vast continent of Africa has a great diversity of landscapes, resources, and cultures. Between the sixth and sixteenth centuries CE, several civilizations in North and West Africa served as important centers of trade and cultural exchange. The three great West African empires of Ghana, Mali, and Songhai rose to power in part because they controlled gold mines, salt mines, and the trade routes that linked these valuable resources to the rest of the world.

- Songhai kings attacked and raided Mali cities.
- One king, named Sunni Ali, used his strong army and naval force to control travel on the Niger.
- By 1468, Sunni Ali had conquered most of the territory once held by the Mali Empire.
- By 1500, the Songhai Empire stretched even farther to the north and east than Mali had.
- Askia Muhammad, the first Songhai emperor, developed more trade with Asia and Europe.
- Askia Muhammad sought to increase the influence of Islam in the empire; he supported the building of mosques and brought many Arab scholars to the university in Timbuktu, which created a golden age of learning in the region.
- The Tomb of Askia, a grand structure that is part of the Great Mosque of Gao, is said to be his place of burial. It is the largest historical monument in West Africa.
- In the late 1500s, internal strife, drought, and disease began to fray the Songhai Empire.

G. Europeans in Africa

- New influences entered West Africa as Portuguese and other European traders and explorers gained the ability to travel to the region in the 1400s.
- The arrival of Europeans changed the form and scale of the African slave trade.
- Portuguese explorers and traders began to set up trading posts on the African coast in the 1440s.

- The Portuguese traded in goods that the local trading networks produced; included trade of enslaved people

H. Ibn Battuta, Griots and Oral Traditions

- A geographer and avid traveler, Ibn Battuta was a fourteenth-century Muslim scholar from Morocco; his travels in West Africa took place from 1349 to 1354 CE.
- He wrote detailed accounts about his experiences and drew maps of his voyages.
- Griots are important figures in West African cultures.
- Griots serve as historians, genealogists, storytellers, poets, musicians, praise singers, and authority figures.
- The role of griot was hereditary and a position of honor.
- Griots told social and family histories that were passed down from one generation to the next through stories and songs.
- Instruments such as the kora (similar to a harp) and the balafon (similar to a xylophone) accompanied the words and lyrics.
- The tale of Sundiata Keita was preserved by griots for centuries.
- Griots also functioned as record keepers for births, deaths, and marriages.

XIV. Renaissance and Reformation

A. Geography

- Europe
- Africa
- Asia
- Arabia
- Persia
- Spain, Italy, England
- Atlantic Ocean, Mediterranean Sea, Arabian Sea, Adriatic Sea

B. Background

The word *Renaissance* means rebirth. It is used to describe the years 1300 to 1600 CE in Italy and 1450 to 1650 CE in northern Europe. This era was a “rebirth” because it involved the rediscovery of things learned in centuries past, particularly in ancient Greece and Rome.

The government of the Western Roman Empire fell apart in the fifth century CE. Its education system also collapsed. The new rulers of western Europe were warriors and warlords. After the fall of Rome, western Europe fell out of contact with the Greek-speaking Eastern Roman Empire. Greek was read and spoken less and less in the western part of the empire, and the knowledge of many subjects formerly taught in Greek faded. The Catholic Church was the main institution that survived the fall of Rome, and learning was preserved by Catholic monks in monasteries. By the twelfth century, the increasing wealth and power of European kingdoms had led to a new demand for learning.

- Monks in western Europe had preserved Latin writing; Greek texts were copied, read, and studied widely in areas under Muslim rule.
- Followers of Islam conquered most of the Eastern Roman Empire in the seventh and eighth centuries CE; they absorbed the Greek-speaking upper class of East Rome.
- Muslims prized Greek texts for their contributions to medicine, philosophy, and science. Schools flourished for centuries in the Islamic Middle East, North Africa, and Iberia.
- Muslim scholars translated the writings of Aristotle, Euclid, Ptolemy, and more into Arabic.
- Muslim scholars also wrote new works that advanced knowledge beyond that of the Greeks.

- European scholars traveled to places such as Córdoba in search of Greek texts; also impressed and influenced by Muslim thinkers and their texts
- European scholars brought texts from the Muslim world to European centers of learning (universities).

C. Trade and Power

- Europe's economy had begun to grow quickly during the eleventh century. Italian cities, especially the port cities of Venice and Genoa, were among the first to display this new wealth, which came from trade.
- Italy comprised of several kingdoms or states; each Italian city had its own government
- Trade caused more Italian cities to grow. Florence began to produce high-quality woolen fabric, often using wool from English sheep; rise of merchant class
- Venetians excelled in trade; dominated ports of eastern and southern Mediterranean Sea
- Florence developed an international trade in woolen cloth.
- Florentines and other Italian bankers developed international banking networks.
- Guilds were organizations formed by skilled laborers called artisans. The guilds of Florence were wealthy and influential.
- Rome remained capital of the Catholic Church administration; papacy was part of European politics

D. The Humanists

- Italy was the home of a new movement in literature and learning that transformed European thought.
- Humanists began reading, collecting, and translating ancient Greek texts. Works by Homer, Sophocles, Thucydides, and more became more available to readers across Europe.
- Francis Petrarch (1304–74) was an important early humanist.
- Humanist study of languages extended to Hebrew and, by the late fifteenth century, included new scholarship on the Bible.

E. New Art and Architecture

- The Renaissance is famous for its artistic developments, which were the product of wealth and growth in the Italian cities.
- Humanists influenced the development of new architectural styles based on ancient buildings.
- Painters of this era worked in shops and were members of guilds; learned by working as apprentices to a master painter
- Introduction of perspective in art

F. Renaissance Florence

- Banking made Cosimo de' Medici (1389–1464) the wealthiest and most powerful man in Florence.
- Medici family dominated politics in Florence
- Cosimo de' Medici (1389–1464) a patron of the arts
- Lorenzo de' Medici (1449–1492) patron to Sandro Botticelli (1445–1510), Andrea del Verrocchio (1435–88), Michelangelo Buonarroti (1475–1564), and Leonardo da Vinci (1452–1519)
- Leonardo da Vinci painted the *Last Supper*, *Mona Lisa*
- Michelangelo Buonarroti (1475–1564) carved the *Pietà* and marble statue of *David*
- Niccolò Machiavelli (1469–1527) known for his work the *The Prince*

G. The Printing Press

- Johannes Gutenberg (d. 1468), a German goldsmith by trade, began to print with movable type during the 1440s.
- The new printing process spread quickly to other cities; humanists welcomed the chance to print copies of ancient texts.
- Printing made all types of writing available to more people and enabled writers to profit from book sales.

H. Religious Reformation

- The most famous and influential religious reformer was Martin Luther (1483–1546); challenged the Roman Catholic Church
- Luther composed a list of ninety-five disagreements with Church doctrine (ninety-five theses); attached to church door October, 1517
- Luther condemned by Catholic Church as a heretic, someone who preaches heresy, in 1521
- Luther translated the New Testament into German and wrote works that were printed and widely read.
- Some of the princes who ruled areas of the Holy Roman Empire supported Luther's reforms.
- In the cities of northern Europe, other religious leaders preached reform and sought to change their regional church practices with the help of their local governments.
- John Calvin (1509–64) was the most important of the next generation of reformers.

I. Politics and Religion

- Era in which European religion was dominated by a single united church was over, allowing dozens of religious beliefs to emerge.
- During and after the Reformation, periods of unrest and violence ensued.
- Each Christian group often viewed others as heretical
- In order to obtain a divorce, Catholic monarch Henry VIII of England, declared himself head of the Church of England; Protestantism arose in England.
- As part of his reforms, Henry VIII dissolved England's monasteries and seized Church land and wealth.
- Astronomer and physicist, Galileo Galilei (1564–1642), supported theories held by Nicolaus Copernicus (1473–1543); confirming the Sun, not the Earth at the center of Solar System, conflicting with Roman theologians
- Roman court condemned Galileo

XV. Exploration, Trade, and Settlement

A. Geography

- Europe
- Portugal
- Spain
- England
- France
- The Netherlands
- Africa
- Mozambique, Kenya, Somalia
- Asia
- India

- Indonesia
- Malaysia
- Taiwan
- South America, Brazil
- North America
- Mexico
- Bolivia
- Isthmus of Panama
- Atlantic Ocean, Pacific Ocean, Indian Ocean
- Congo River
- Cape of Good Hope

B. The Age of Sail

- The age of exploration that began in the 1400s is also sometimes called the age of sail.
- New sailing ships (carrack, caravel) and advances in navigational technologies (compass) enabled explorers and traders to cross ever greater distances on the sea.
- The Portuguese were some of the most successful early European explorers; Henry the Navigator
- Portuguese in search of sea route to China; explored coasts of Africa
- Portuguese outposts or colonies in parts of Africa; enslavement of Africans
- Bartolomeu Dias, first European to find and pass the Cape of Good Hope, the southern tip of the African continent; his expedition establishes way east to India and Cathay (China) by navigating around Africa
- Vasco da Gama explored East Africa; arrived in Calicut, India, in 1498; Pedro Álvares Cabral follows, opens up trade in India for the Portuguese; aim to gain Portuguese control of all trade in the Indian Ocean
- Portuguese claim Brazil in South America.
- In search of Eastern sea route, Columbus sails west with three ships in 1492; *Niña*, the *Santa Maria*, and the *Pinta*
- Columbus landed on an island called Ayti—the root of the modern name Haiti; indigenous people—the Taino; Columbus assumes he is in or near India
- Spanish monarchs Ferdinand and Isabella declare sovereignty over lands and resources in the Americas.
- In 1494, Spanish and Portuguese representatives met at the city of Tordesillas in Spain to divide the ‘new world’ between themselves; the Treaty of Tordesillas declared that everything to the west of a line drawn at the Cape Verde Islands belonged to Spain and everything to the east belonged to Portugal; treaty later amended to make Portugal’s claim to Brazil official
- Spanish secure and extend control over further lands in the Americas; enslavement of indigenous peoples; European diseases devastate indigenous populations
- First stable settlement on the South American continent, Santa María de la Antigua, established in the Isthmus of Panama by Vasco Núñez de Balboa
- Hernán Cortés expedition to Mexico; brutal campaign, defeated the Aztec rulers, conquered capital of Tenochtitlán
- Inca Empire of the Andes invaded and conquered by the Pizarro brothers; *Conquistadors*
- Exploitation of natural resources (silver, gold) in the Americas
- Bartolomé de Las Casas denounces abuse of indigenous populations in the Americas by Spanish; King Charles V of Spain enacts the New Laws of the Indies for the Good Treatment and Preservation of Indians

- Portuguese explorer, Fernão de Magalhães, or Ferdinand Magellan, led the first expedition (1519–1521) that successfully circumnavigated the globe.
- England and France seek a “northwest passage” around the Americas through the Arctic Ocean.
- English king Henry VII funded expedition (1497) led by Giovanni Caboto, or John Cabot; landed in Newfoundland
- French funded (1524) Italian explorer Giovanni da Verrazzano sailed to the Americas (Cape Fear, now North Carolina); sailed north along the east coast of continental North America
- French established a colony in North America, Gallia Nova, or New France, in the region that is now Quebec.
- English established their first successful American colonies in lands they named Virginia.
- English merchants established East India Company; by 1612 the company secured its own rights to trade with India; enslavement of people in East Africa and Indonesia
- Expansion of Dutch naval power and Dutch East India Company in early 1600s; Dutch established base in Jakarta, Indonesia; expanded control to include modern Taiwan, Malaysia, and provinces in East India
- By 1645, the Dutch most powerful trading empire in Southeast Asia
- To secure trading routes, Dutch East India Company turned Cape of Good Hope, in present-day South Africa, into a Dutch colony.
- Overtime, Dutch in South Africa become known as Afrikaners (a South African of Dutch descent who speaks Afrikaans) or Boers (after the Dutch word for farmer)
- Dutch seek northwest passage; in 1609, the Dutch fund English explorer Henry Hudson to look for such a route; Hudson sails to North America; Hudson River in New York State; surveys modern states of New Jersey, New York, Delaware, Pennsylvania, Maryland, and Connecticut
- After conflict between the Netherlands and England, New Netherland taken over by the English; New Amsterdam, one of the largest and richest settlements of New Netherland, renamed New York

C. Transatlantic Slave Trade

- Slave trading and transportation became a major transatlantic activity in the 1600s and 1700s.
- Region of West Africa where many enslaved people were traded became known as the Slave Coast.
- Demand for enslaved labor grew due to the rise of profitable plantation crops in the Americas; Europeans began to lead raids deeper into Africa to find and capture people who could be enslaved and sold.
- Over centuries, the slave trade was active; many millions of Africans were taken on what was called the Middle Passage from Africa to the Americas and the Caribbean.
- Transatlantic trade in people and goods referred to as triangular trade; consisted of three directions of movement:
 - Europeans took goods such as weapons, alcohol, and clothes to Africa; goods exchanged for enslaved people; enslaved people taken to colonies in the Americas; goods produced by enslaved labor on colonial plantations taken back to Europe

XVI. The Scientific Revolution and the Enlightenment

A. Geography

- Europe

Timeline

B. Background

The 1500s, 1600s, and 1700s brought significant changes in the ways that Europeans thought of themselves and their place in the world. When historians look back at this period, they find an increased regard for the roles of science and human reason and growing efforts to use science and reason to address a wide variety of issues.

- 1500s and 1600s see dramatic changes in European politics as governments throughout Europe became more bureaucratic and more centralized
- Europeans experiencing a breakdown of their traditional views of the universe.
- Dutch astronomer Tycho Brahe and German astronomer Johannes Kepler further support Nicolaus Copernicus's theories with more proof of this emerging sun-centered worldview.
- In 1609, Galileo's telescope powerful enough to see that the moon is not a perfect sphere or a luminous object; reveals Moon has shadows, indicating valleys and mountains, just like on Earth; Jupiter has its own moons, similar to Earth's
- Scientific Revolution did not just look upward to the stars, it also looked inward, at the human body.
- William Harvey develops own theory of circulation of the blood
- Antoine-Laurent Lavoisier discovered the role of oxygen in the respiration (breathing) system.
- Ambroise Paré improved the treatment of wounds.
- Antonie van Leeuwenhoek created his own microscope, which he used to observe and describe bacteria.
- Francis Bacon, René Descartes, John Locke, Jean-Jacques Rousseau some of the influencers of the European Enlightenment (Bacon's life preceded the Enlightenment by several decades, but his writings served as one of its primary intellectual sources).
- Isaac Newton reformulated the scientific method; provides first coherent theory of the entire physical universe; matter infused with active forces; gravity produces all the motion in the universe

C. The European Enlightenment

- The Enlightenment was an intellectual movement centered in Europe and its colonies during the 1700s.
- Human institutions, including forms of government, came under increased scrutiny and analysis during the Enlightenment (Thomas Hobbes believed humans needed strong government; John Locke believed humans had right to create and direct governments; natural rights).
- Human nature increasingly the focus of scientific-like inquiry
- Emergence of the French *philosophes*, a group of thinkers and writers increasingly critical of the existing social, political, and cultural orders in France; the group included Voltaire, Denis Diderot, Baron de Montesquieu, and Jean-Jacques Rousseau
- Influence of the Enlightenment on form and structure of new government in the United States of America

XVII. Political and Industrial Revolutions

A. Geography

- Europe (France, Spain, England)
- Caribbean (Haiti)
- North America
- Mexico
- Central America
- South America

B. Background

The 1700s and 1800s launched a wave of change across Europe and the Americas. Some changes were political and social and included revolution. These political and social revolutions were accompanied by a revolution in technology and industry.

C. Origin of the French Revolution

- The ideals of the American Revolution gained traction in France.
- The Marquis de Lafayette (1757–1834), a member of the French royal court, pressed for the abolition, or end, of the slave trade, for toleration of different religious beliefs, and for France to become a constitutional monarchy.
- Influence in France of Thomas Paine’s publications *Common Sense* and *Rights of Man*
- Louis XVI (1754–93) the king of France during the French Revolution; Louis’s family, the House of Bourbon, had ruled France since 1589
- Louis was the ruler of the old order—*l’ancien regime* in French; he was the last king of the old order.
- The French population was divided into three “estates,” levels determined by status, wealth, and power; the majority of France’s population made up the third estate, but lacked power and representation.
- France’s population roughly doubled in size from the 1300s, from about twelve million people after the Black Death to about twenty-six million people just before the Revolution.
- Growing class of merchants, artisans, bankers, and others who lived in French towns and cities, known as the bourgeoisie; educated, wealthy, and attracted to the ideas of the Enlightenment
- In need of revenue, Louis XVI and his government attempt to tax his subjects from the first and second estates (the ‘notables’) who had previously been exempt from taxation; the notables refuse
- King Louis XVI agrees to call the Estates- General in 1789; representatives of the three estates meet
- Declaration of formation of a National Assembly
- Members of the National Assembly force the king and the other two estates to recognize its authority.
- Louis XVI plans to send his troops to dissolve the National Assembly; the people of Paris revolt.
- On July 14, 1789, a crowd of angry Parisians capture a fortified prison in the city, called the Bastille.
- Across France peasants rise up against economic hardships and their landlords.
- National Assembly issues sweeping range of reforms; end of the old order; Declaration of the Rights of Man and of the Citizen
- Marquis de Lafayette elected to lead a new armed force, the National Guard
- Crowd, led by women, march to the Palace of Versailles on October 5, 1789; force the king and his family back to Paris
- Louis XVI attempts to escape in June, 1791.
- In 1792, Louis XVI put under arrest by the citizens of Paris; the National Assembly declares that France is a republic and no longer a monarchy
- From 1792 to 1795, France governed by a new body, the National Convention
- Louis XVI accused of treason; tried, and sentenced to death by the National Convention
- Louis XVI and his wife, Marie Antoinette, both executed by guillotine in 1793
- Radical revolutionaries, including Robespierre (1758-94) embark on ambitious economic and social measures; heavy taxes on the rich; price controls; universal education
- Coalition of British, Prussian, and Austrian forces repeatedly defeat French forces in European wars.

Timeline

- New body, the Committee of Public Safety, founded in 1793 to organize the war effort and to defeat internal opposition to the Revolution; people accused of opposing the revolution tried and executed; Reign of Terror
- Creation of a vast army of more than a million soldiers committed to defending France and defeating its enemies; Napoleon Bonaparte

D. Napoleon Bonaparte

- Napoleon Bonaparte (1769–1821) initially a strong supporter and defender of the Revolution; leads French armies to defeat attempt to reinstate a monarch
- Napoleon given command of armies fighting the Austrians and their allies; in 1796 and 1797, he forces Austrians to surrender
- In 1799, Napoleon seizes control of the government; assumes full control over France as a dictator; in 1804, Napoleon declared emperor of France
- Between 1804 and 1814, Napoleon's French Empire involved in wars against Britain, Prussia, Portugal, and Spain; failed military effort in Russia
- On April 6, 1814, Napoleon gave up rule as emperor; enters into exile on the island of Elba
- On March 1, 1815, Napoleon returns to France; takes control of the nation and its armies
- A combined army of British and Prussian troops fight French troops at Waterloo, in Belgium, on June 18, 1815; Napoleon defeated and removed from power

E. Haitian Revolution

- In 1791, Haiti (western part of the island, Saint-Dominique) controlled by France
- Previously colonized by Spain (Hispaniola); under the Spanish, thousands of enslaved Africans and indigenous people forced to work in gold mines
- Saint-Domingue society based on classifying people by color and race
- Enslaved people have no rights; people of mixed heritage called *affranchise*
- In 1791, following the overthrow of the French king, the new French government extends citizenship rights to some *affranchise*; ruling classes of Saint-Domingue ignore this order; large number of enslaved people revolt
- French government sends official to restore order.
- In 1794, French government agree to abolish slavery; rebelling enslaved population want independence; revolution
- Toussaint L'Ouverture (1743–1803) becomes leader of the revolutionaries; several victories over the French
- By 1794, rebels supported by British and the Spanish on the eastern half of the island (which today is the Dominican Republic)
- Toussaint makes a deal with the French; he becomes lieutenant-governor of Saint-Domingue; slavery abolished in exchange for an end to the rebellion
- Agreement with Saint-Domingue broken by Napoleon Bonaparte; he tries to restore total French control between 1801 and 1803
- Toussaint imprisoned by the French; died in 1803
- France eventually defeated; the nation of Haiti established in 1804
- France demands that the former colony pay 150 million francs in exchange for its independence—roughly 21 billion dollars in modern currency

F. Independence Movements in Latin America

- Beginning of the 1800s, independence movements sweep through the Spanish Empire in the Americas; events in Europe in the 1800s trigger revolutionary movements in the Americas
- Between 1808 and 1826, Spain loses control of all its possessions except Cuba and Puerto Rico.

- Brazil becomes independent of Portugal in 1822 with Dom Pedro (1798–1834) as its first emperor
- Simón Bolívar (1783–1830), known as EL Libertador (the Liberator), and José de San Martín (1778–1850), successful leaders of the revolutions against Spanish rule
- San Martín helped Argentina, Chile, and Peru achieve independence by 1821.
- Between 1817 and 1819, Bolívar took control of the colony of New Granada, which was renamed Gran Colombia.
- Bolívar dreamed of a large, independent state, but by 1830, Gran Colombia had fractured into smaller nations: Venezuela, Ecuador, Colombia, and Panama

G. Mexico

- Mexico was known as New Spain under Spanish rule.
- The push for Mexican independence was driven by political developments in Spain.
- New Mexican Empire became independent on August 24, 1821; lasts for two years
- Mexican revolutionaries such as, Antonio López de Santa Anna (1794–1876), believe Mexico should become a republic.
- Mexico adopts a new republican constitution.
- Two factions compete to control the direction of the country: Centralists, who want a strong government and support the Catholic religion as central to Mexico's identity; Federalists, who want Mexican states to have the power to rule themselves
- Santa Anna becomes president of Mexico for the first time in 1833.
- Texas declared its independence from Mexico in 1835.
- In 1836, Santa Anna leads a large army into Texas; he is defeated by smaller Texan forces.
- Santa Anna removed from power in Mexico
- The United States declares war on Mexico.
- Benito Juárez rises to the forefront of Mexican politics.
- A new constitution put in place in Mexico in 1857, creating a representative democratic republic with a strong executive
- The Church and other conservatives oppose the new constitution; civil war breaks out.
- Benito Juárez becomes president; United States supports Juárez.
- Juárez reelected in 1867 and 1871; political reform
- In 1876, Porfirio Díaz becomes president of Mexico, beginning a thirty-five-year career of government domination; reinstates the power of the Church in Mexican affairs; economic reforms
- The elite once again dominate in political and economic power; opposition to Díaz grows.

H. The Mexican Revolution and Continuing Conflict

- In 1910, Francisco Madero campaigns for the presidency against Díaz; Madero arrested and jailed
- Pancho Villa and Emiliano Zapata lead revolutionary forces, eventually removing Díaz from power.
- Madero named president; US opposes Madero.
- Madero overthrown when revolutionaries, including Villa, Zapata, and Venustiano Carranza, continue armed resistance.
- Civil war continues until 1917; Carranza becomes president and oversees the rewriting of the constitution, making the president a dictator.
- Violence continues until 1920, when Carranza is overthrown; order and constitutional government restored under the presidency of Lázaro Cárdenas

I. Revolutions in Industry, Agriculture, and New Technology: Background

Political revolutions were just one of the forces transforming the world during the 1700s and 1800s. New developments in technology and the organization of labor also took place during this period in what is known as the Industrial Revolution. The Industrial Revolution is difficult to pin down to specific dates and events. In some ways, the name refers to long-term trends that developed over many decades.

- By the 1700s, new crops, techniques, and technologies were widely used to feed Europe's population; new technologies improve the food supply.
- The new crops included staple goods like potatoes and corn from the Americas.
- In Europe, older ways of organizing and owning land transformed by the process of enclosure
- Enclosure increased the power and wealth of landlords and limited that of peasants.
- Improvements in both agriculture and industry were linked to developments in science and technology.
- Discoveries and inventions were applied to many different areas of economic activity—mining, production of goods, farming, and transport—by people who were focused on profit.
- The Industrial Revolution brought new means of generating power, such as the steam engine; Scottish engineer James Watt (1736–1819)
- Industrialization was the process of applying new technologies and processes to make the production of goods more efficient.
- In the 1700s, several inventions and innovations were applied to the wool-and-cloth-making industry to make it more efficient and maximize profits; Spinning Jenny invented by English inventor James Hargreaves (1721–78); American inventor, Eli Whitney (1765–1825), creates the cotton gin
- Establishment of the factory system and subsequent urbanization
- Rise of capitalism
- Scottish Enlightenment philosopher and political economist Adam Smith (1723–90), one of the first theorists to describe the way free markets work; *An Inquiry into the Nature and Causes of the Wealth of Nations* (1776)
- This revolutionary period led to transformation of much of the world's political, social, and economic systems.

XVIII. A World At War

A. Geography

- Europe (France, Belgium, Italy, Austria, Germany, Great Britain, Hungary, Serbia, Bulgaria, Montenegro, Greece, Russia)
- Turkey
- India
- Africa (Egypt, South Africa, Algeria, Democratic Republic of Congo)
- Southeast Asia (Cambodia, Laos, Vietnam)
- Asia/East Asia (China, Japan, Korea)
- North America (California, Hawaii)
- Atlantic Ocean
- Pacific Ocean
- Indian Ocean
- Mediterranean Sea

B. Background

In the late 1800s and early 1900s, nations around the globe were expanding. Sometimes this expansion was peaceful. Nations used trade and diplomacy to acquire resources

and expand their power. In many cases, expansion meant war. Countries competed with their rivals to acquire territory and resources. These resources were used to fuel more expansion and more wars. The mightiest nations created global empires. They ruled faraway peoples and places, waged war around the world, and supplied their home populations with goods and luxuries from far afield.

- Nations built empires and engaged in imperialism.
- Imperialism also driven by competition between rival nations and the rise of nationalism globally
- The drive for expansion of empire grew along with the Industrial Revolution and the need for raw materials such as rubber, timber, cotton, gold, diamonds.
- Countries that controlled trade routes could ensure they had buyers for their goods, both at home and in the lands they controlled.
- New methods of transportation, weapons, and communication changed how Europe interacted with other parts of the globe.
- Religion played a role in this era of imperialism; Christian missionaries from Britain, France, Belgium, and the United States traveled throughout Africa and Asia with the aim of converting people to Christianity.
- In Japan, nationalism grew among those who wanted Japan to industrialize and build its own empire.

C. British Rule in India

- Britain had the largest and richest empire in the world during the 1800s and well into the 1900s.
- The British Empire was at the height of its power during the reign of Queen Victoria, which lasted sixty-three years, from 1837 to 1901; during this time India, South Africa, Hong Kong, Egypt, and large parts of West and East Africa were added to the British Empire.
- India most economically important part of the British Empire
- In 1857, people in India rebel against British attempt to expand control of India
- Rebellion fails and British government take direct control of India; established the Raj
- The Raj was responsible for collecting taxes, enforcing laws, and ensuring that British rules about trade and agriculture were followed.
- British traders and business owners founded plantations in India to grow tea, indigo, and cotton; large areas of land no longer available to Indian population to grow crops; famine
- The Raj created considerable wealth for Britain; wealth not shared by most Indians; construction of thousands of miles of railroad

D. Europeans in Africa

- David Livingstone traveled back and forth across Africa; believed that by spreading Christianity, finding trade routes, he could help abolish slavery
- In 1869, journalist Henry Stanley went into Central Africa in search of Livingstone. Two years later, Stanley found Livingstone; "Dr. Livingstone, I presume?"
- In 1869 the Suez Canal, constructed and controlled by the British and French, was opened in Egypt; enabled ships to sail from the Mediterranean Sea to the Indian Ocean
- Civil unrest in Egypt led by nationalists leads to new nationalist Egyptian government; British forces attack Egypt and force revolutionaries out of power; Britain takes direct control of Suez Canal
- French invasion of Algeria begins a lengthy, violent conquest; France encourages Europeans to move to Algeria; French citizens have more rights than native Algerians
- First permanent European settlement in South Africa created by the Dutch East India Company in 1682; Dutch settlers known as Boers; soon joined by British settlers

Timeline

- Diamonds were discovered in South Africa in 1867 and gold in 1886; gold deposits in area largely controlled by Boers
- South African War (1899–1902), also known as the Anglo-Boer War, developed out of the competition for South Africa’s resources; British responded with harsh new tactics; burned the farmland of Boer settlers and put civilians into concentration camps

E. Berlin Conference

- In 1884, Germany hosted the Berlin Conference; conference designed to allow imperialist nations to decide how to divide Africa among themselves; no African nations invited to the conference
- Before the Berlin Conference, 80 percent of Africa was controlled by Africans; after the Berlin Conference, European powers expand their control
- European nations divided Africa into units that were easy for colonial governments to control; units often ignored the boundaries and divisions set by the African populations
- King Leopold II of Belgium created the Congo Free State in 1885 and turned it into a personal possession; Leopold’s rule brutalized the people of the Congo; resources of rubber and ivory were extracted using forced labor by the Congolese under Belgian direction

F. Italy Becomes a Nation

- The modern nation of Italy was created in the middle of the nineteenth century as a result of the desire for unification.
- In 1860, an Italian nationalist named Giuseppe Garibaldi (1807–82) led an army of Italian nationalists, the Thousand, on a march to Sicily; the Thousand conquered Sicily and marched on Naples; efforts of Garibaldi unified most of Italy
- Nationalist leaders elected a new parliament; made Victor Emmanuel II the first king of modern Italy in 1861
- Between 1866 and 1870, Rome and Venice were added to the new Italian nation; Rome was made the nation’s capital shortly afterward.

G. German Unification, the Triple Alliance, and the Triple Entente

- The modern nation of Germany was created in the late 1800s.
- The German Empire was formally established on January 18, 1871.
- Unifying the states into one German nation was the goal of the Prussian prime minister, Otto von Bismarck (1815–98).
- To weaken France, Bismarck secretly formed the Triple Alliance with Austria-Hungary and Italy in 1882; the three nations pledged to help each other if invaded by France; Bismarck also reached agreements with Russian and Britain
- Though Bismarck shaped German foreign policy, the German Empire was ruled by an unelected emperor, called the Kaiser; in 1888, a new emperor named Wilhelm II came to the throne.
- German social problems, desire for more democracy, leads to removal of Bismarck from power; change in Germany’s alliances
- Wilhelm II does not renew the treaty with Russia; France and Russia create a military alliance in 1894
- Wilhelm expands German colonial aims and German navy
- In 1907, Britain, France, and Russia form a new pact called the Triple Entente; the major powers in Europe now divided into two sides; the Triple Entente united Britain, France, and Russia; the Triple Alliance bound together Germany, Austria-Hungary, and Italy

H. The Opening of Japan and the Russo-Japanese War

- In 1853, American naval officer, Commodore Matthew Perry, sailed to Japan to open diplomatic relations with the nation; Perry claimed two of Japan's southern islands for the United States; he sailed four warships into Tokyo Bay; presented a letter and gifts to the government of Japan
- Japanese government made new arrangements that opened Japan's ports to American naval and trading ships.
- Having annexed California and Hawaii, the United States wanted to increase trade with Asia; wanted access to Japan in order to refuel and repair their ships after long voyages across the Pacific Ocean
- The opening of Japan to European and American trade motivated Japan to industrialize its economy and modernize its military.
- In the late 1800s, Japan began building its empire in Asia, starting with with Korea, an important ally of China.
- In 1875, Japan forced Korea to open its borders to Japanese trade.
- Between 1894 and 1895, Japan and China are at war; Japan's modern military defeated the large Chinese army; China forced to give Korea its independence and offer special trade privileges to Japan
- Russian treaty with China, promising to defend China's independence
- In 1904, Japan attacked a Russian warship, starting the Russo-Japanese War; Russian naval fleet largely destroyed by Japanese navy; both sides sign a peace treaty to end the fighting in 1905; the Russo-Japanese War marked the first time in modern history that an Asian nation defeated a European nation

I. Opium Wars and Revolt in China

- In the late 1800s, Britain pressured the Qing dynasty for more access to China's economy; the British used trade in an addictive drug, opium, to force open trade with China.
- The opium trade increased dramatically in the 1820s after Britain took control of some Chinese ports by military force.
- In 1839, Chinese officials destroyed a warehouse full of opium belonging to a British trader; the British reacted with force; this began the First Opium War; at end of war Britain has gained more control over China; gained control over Hong Kong
- In control of Chinese ports, Britain opened them to American, French, German, and Japanese trade ships
- China gave Christian missionaries access to the nation's interior
- The Taiping Rebellion takes place between 1850 to 1864; rebels motivated by hunger and China's economic problems, and religion; rebellion eventually defeated with help from British and American military leaders
- Russia claims land in the north of China.
- Second Opium War launched in 1856; Britain gains even more power in China; opium becomes legal
- Boxer rebellion began in 1899; leaders aimed to remove foreigners from China and preserve Chinese culture; opposed Christian missionaries
- Boxer rebels overwhelmed by foreign troops; peace treaty signed in 1901
- Revolutionary Alliance takes shape outside of China; led by Sun Yat-sen (1866–1925); Sun leads unsuccessful revolts in south of China
- In 1908, the Qing rulers, Empress Cixi and Emperor Guangxu, died; control of the country was passed to three-year-old Emperor Puyi; Revolutionary Alliance continues to attack Qing government; in 1911 forces Qing dynasty to adopt a constitution; Emperor Puyi abdicates; Sun elected leader of new Republic of China

J. French Indochina

- The present-day Southeast Asian countries of Cambodia, Laos, and Vietnam were once called Indochina.
- France took control of Indochina between 1858 and 1893.
- Society during period of French rule in Indochina dominated by the French and small class of wealthy people; in Vietnam, land was primarily owned by French landlords
- Nationalist movements grew in Vietnam in the late 1800s; in 1908, Vietnamese citizens protested taxes
- French control of Vietnam did not end until 1954.

K. Ottomans on the Decline

- At its height, the Ottoman Empire spanned eastern Europe, North Africa, and Southwest Asia; the empire's center was present-day Turkey.
- In the 1800s, the Ottoman Empire was not as industrialized as its European neighbors.
- By the second half of the 1800s, Ottoman empire in debt to European powers; by the late 1800s, the Ottomans defaulted on their loans; loss of territory in eastern Europe to nationalist uprisings; Britain and other European nations took control of a large portion of the Ottoman financial system in 1881
- Ottoman ruler Sultan Abdulhamid II (1842–1918) ruled from 1876 to 1909; he attempted modernization and reorganization of government; in 1908 Young Turks stage a revolt; demand a new constitution and more reforms
- Ottoman empire loses territory in North Africa to Italy in 1912; between 1912 and 1913, an alliance of Serbia, Bulgaria, Montenegro, and Greece removed the Ottomans from the Balkans

L. World War I (1914–1918)

- Tensions in the Balkans, located in southern Europe, led to the outbreak of the First World War
- Tension over whether Serbs living inside Austria-Hungary would become part of the neighboring small Serbian state; Austria-Hungary's ruler opposed this; sent Archduke Franz Ferdinand, heir of Austria-Hungary, to Sarajevo, Bosnia, to attend a military parade
- On June 28, 1914, Serbian nationalist, Gavrilo Princip, shot and killed the archduke and his wife.
- On July 28, 1914, Austria-Hungary declared war on Serbia; sets off chain of alliances; Allied Powers fight against Central Powers.
- Germany invaded Belgium and marched to within 30 miles of Paris; eventually halted at Marne River by French and British soldiers; the First Battle of the Marne marked the beginning of trench warfare
- Central Powers fought a two-front war; Eastern Front and Western Front
- In October 1914, Ottoman Empire joined the Central Powers
- In 1915, Allied Forces engaged in sea and land assault on Ottoman controlled Gallipoli
- In 1915, Italy agreed to join the Allies.
- Germany declared the waters around Britain to be a war zone; threatened to sink any ships that entered British waters; September 1915, German submarine fired torpedoes to sink the American passenger ship *Lusitania*, killing more than 1,200 people, including around 120 Americans
- In 1916, Germany and Allied troops from France and Britain fought at the Battle of the Somme in France, one of the deadliest battles of the war.
- In 1917, the United States entered the war, fighting on the side of the Allied Forces.
- In 1917, Russian armed forces revolt and bring down the Czar of Russia and his government; second revolution in Russia occurs, resulting in Russia leaving the war
- Central Powers move troops to the Western Front; Allied Forces reinforced by American troops

- In July 1918, Germans began their final attack of the war in the Second Battle of the Marne.
- On November 11, 1918, the war officially ended with an armistice agreement.
- World War I was fought on land, sea, and in the air; when war declared, Britain had largest navy in the world
- At the time, World War I (the Great War) was the largest and deadliest war ever fought; lasted from 1914 to 1918; sixteen million soldiers and civilians killed
- Treaty of Versailles, an agreement between the Allied Powers and Germany, officially ended World War I; treaty weakened and punished Germany; Germany forced to accept treaty terms on June 28, 1919; unable to pay vast reparations
- Full force of industrial economies used to supply massive armies; science, engineering, new technologies, modern weaponry used by both sides; Germany the first to use poison gas; British used a new armored vehicle called a tank

M. The Russian Revolution

- At the beginning of World War I, Russia not as industrialized as other powerful nations in Europe
- Russia suffered more military deaths in World War I than any other nation.
- The Russian revolution began because of strikes in the city of Petrograd, (St. Petersburg), and a march led by women on International Women's Day; Russians were hungry and tired of the war; Soldiers in the city refused to oppose the striking workers
- Bands of workers and soldiers formed self-governing groups called soviets; the soviet in Petrograd took over the city
- Czar Nicholas II removed; new Provisional Government organized to rule Russia
- Government's new leader, Aleksandr Kerensky (1881–1970), wrote new laws, including ones that protected freedom of speech and equal rights.
- Riots of hungry workers break out; discontent sparks Bolshevik Revolution on November 6 and 7, 1917.
- The Bolsheviks were a revolutionary communist party; Bolshevik leader, Vladimir Lenin (1870–1924), aimed to overthrow the czar's regime.
- Bolsheviks believed in a communist society in which private property is abolished; all people work together to meet society's needs; Bolsheviks overthrow Provisional Government
- Lenin and the Bolsheviks turned the Russian Empire into the Union of Soviet Socialist Republics (USSR).
- The USSR became the world's first communist nation.
- Lenin's government made a peace deal with Germany in 1918; the Treaty of Brest-Litovsk
- Supporters of the czar, the Whites, take up arms; Bolsheviks form the Red Army; Russian Civil War (1918–20) resulted in victory for the Bolsheviks; Czar Nicholas, his wife, and their five children executed by the Bolsheviks in July, 1918; millions of Russians died in the Civil War

XIX. World War II and the Postwar World

A. Geography

- Europe (France, Belgium, Italy, Austria, Germany, Spain, Great Britain, Lithuania, Estonia, Poland, Czech Republic, Finland, Denmark, Norway, Greece, Russia)
- India
- Pakistan
- Africa (Ethiopia, Algeria, Egypt, North Africa)
- Southeast Asia (Philippines)
- Asia/East Asia (China, Japan, Korea)
- North America (California, Hawaii)

- Atlantic Ocean
- Pacific Ocean
- Indian Ocean
- Mediterranean Sea

B. Globalization

World War II (1939–45) was the largest and most destructive conflict in history. Fifty million people died during the war; millions of others were wounded or driven from their homes. Two opposing factions battled around the world for global supremacy. Great Britain and France led the Allied Powers until 1941, when they were joined by the Soviet Union and the United States. The Axis Powers were led by Germany, Italy, and Japan. The stakes of World War II were huge. The very existence of free, tolerant, and democratic nations was threatened, as were the lives of millions.

C. Crisis in Weimar

- Origins of World War II rooted in the ending of World War I; emperor of Germany, Kaiser Wilhelm II, forced to step down as the German leader on November 9, 1918
- People of Germany proclaimed a new, democratic republic—the Weimar Republic.
- German economy battered by World War I; new republic owed 132 billion marks to the Allies for damages; Germany's inability to pay caused political and economic crisis; hyperinflation
- Economic and political crises prompted people to take extreme political options.
- Far-right leader, Adolf Hitler (1889–1945) joined the German Worker's Party in 1919; party name changed to the National Socialist German Worker's Party; became known as Nazis; by 1921, Hitler leader of Nazis; saw real Socialists as enemies
- Hitler and followers tried to seize control of the government of Bavaria; Hitler arrested, tried, and jailed for nine months; in jail Hitler writes *Mein Kampf*, or *My Struggle*; described his hatred of Jewish people; outlined the destiny of the "master race"
- Hitler wanted to reunite Germany with territories it had lost and with other German-speaking nations; wanted Germany to expand eastward; called for *Lebensraum*, a country for "pure" Germans
- Hitler wanted to remove multiple groups from Germany, including Jews, Roma, people with disabilities, communists, and anyone considered the enemy of the state.
- The ideology of fascism, which Hitler followed, promotes the supremacy of the nation-state and its primary ethnic group above all else.
- Hitler elected to the parliament of the Weimar Republic, the Reichstag, in 1932
- U.S. stock market crashed in October 1929; resulting global economic depression hit Germany hard; U.S. government demanded money owed by Germany be repaid; German banks failed and economy crumbled
- In 1933, Hitler named chancellor of the Weimar Republic
- Hitler put the constitution of the Weimar Republic on hold; stripped citizens of their legal rights; proclaimed Germany to be the Third Reich; took direct control of education, the economy, and the legal system
- Hitler proclaimed himself *Führer* (leader) of Germany in 1934.
- Hitler's government used a mixture of laws and direct intimidation and violence to attack Jewish people and strip them of their rights and property.
- November 9–10, 1938, *Kristallnacht*

D. Italy

- Benito Mussolini (1853–1945) ruled Italy from 1922 until 1943; authoritarian dictatorship; political ideology of Fascism established in Italy
- Armed gangs of Fascists, called Blackshirts, maintained order.

- Mussolini's government shared several Nazi ideals; hatred of democracy; belief in strong nationalism; used propaganda and education to promote ideology
- Italy invaded the African nation of Ethiopia.
- In 1939, Mussolini and Hitler signed the Pact of Steel; Italy and Germany agreed to support one another in event of war

E. The Soviet Union

- Josef Stalin (1878–1953), leader of the Soviet Union before and during World War II
- Stalin wanted to end capitalism in the Soviet Union; wanted the Soviet Union to be an industrial power; ordered farms to be collectivized
- To build up industry, Stalin set high expectations for workers; those who failed, as well as political prisoners, sent to brutal work camps called gulags
- Stalin understood the Nazi threat to Russia; to gain time and build up Soviet industry and armed forces, signed a peace deal with Germany

F. Countries at War Before World War II

- Spain, China, and Japan were already involved in their own wars when World War II began in September, 1939.
- Spanish Civil War: Hitler and Mussolini supported Spanish nationalists; Stalin supported Spanish Republicans
- Francisco Franco became dictator of Spain; ruled until his death in 1975.
- Japan invaded China in 1931, taking control of Manchuria; by 1937, war had broken out between both countries.

G. German Expansion and Beginning of World War II

- German annexation of Austria in March, 1938
- Initial policy of appeasement in relation to German expansion
- In 1938, Germany, Italy, Great Britain, and France agree that Czechoslovakia must give up the Sudetenland to Germany; Germany invades rest of Czechoslovakia in March, 1939
- Germany invades Poland from west on September 1, 1939
- France and Great Britain declared war on Germany on September 3, 1939; Allied Powers (France, Great Britain, United States, Soviet Union, China); Axis Powers (Germany, Italy, Japan)
- Soviet Union invaded Poland from east; Stalin and Hitler agree to divide Poland between their two nations; Hitler allows Soviet Union to claim Lithuania, Latvia, Estonia, and occupation of southeastern Finland
- German invasions of western Europe used new equipment and tactics; fast armored tanks helped Germany employ a military tactic called *Blitzkrieg* (lightning war).
- France had largest army in Europe at start of World War II
- Germany invades and captures Denmark and Norway, April, 1940
- German forces invade France; enter Paris on June 14, 1940; French government surrenders; France divided into two territories
- Battle of Britain

H. Eastern Front

- Germany invades Soviet Union in June, 1941.
- Battle of Stalingrad (1942–1943); one of largest battles in history; ultimately first major defeat for Germany

I. North Africa and Italy

- British, French, German, and Italian forces engaged in battles in North Africa.
- In July, 1942, British and German forces clash in El Alamein, Egypt; Germans defeated

- In November, 1942, Britain and US forces reclaim areas under German control; by summer 1943, German and Italian forces in Africa completely defeated

J. The Holocaust

- At first, many Jewish people sent to labor camps; in 1942, Nazis leaders set in motion plan to kill Jewish people en masse; concentration camps set up to do so; “final solution”
- Six million Jewish people killed in the Holocaust
- In 1943, Great Britain, the Soviet Union, and the United States signed the Moscow Declaration of German Atrocities; the nations pledged to punish Germany for the crimes it committed during the Holocaust.

K. D-Day to V-E Day

- The United States entered World War II in December, 1941, after Japanese attack on Pearl Harbor.
- Allied leaders developed Operation Overlord, a plan to invade German-occupied France from Great Britain; Allied troops would cross the English Channel and land on French shores; U.S. general Dwight Eisenhower led the operation
- Allied troops invaded German-occupied France on June 6, 1944, also known as D-Day.
- Paris liberated from Nazi occupation on August 25, 1944
- Battle of the Bulge (1944–1945); Germany loses; Allied troops begin march to Berlin, Germany
- Stalin, Churchill, and Roosevelt meet at the Russian town of Yalta in February 1945; agree that Soviet Union could ensure eastern Europe establishes governments friendly to the Soviet Union; Soviet Union agrees to free elections in those countries; France to take part in German occupation
- Soviet Union agrees to enter war in the Pacific to help defeat China in exchange for Japan’s territory in China.
- With Allied troops closing in on Berlin, Hitler and his closest advisors fled to an underground bunker; on April 30, 1945, Hitler committed suicide.
- The Nazis finally surrendered to the Soviet army in Berlin on May 8, 1945; this date is celebrated as Victory in Europe Day, or V-E Day.

L. War in the Pacific

- In April 1942, American and Filipino soldiers on the Bataan Peninsula, Philippines, defeated by the Japanese; resulted in the Bataan Death March
- The Battle of Midway, June 3–6, 1942, helped slow Japan’s takeover of the Pacific
- Japan captured Guadalcanal on July 6, 1942, and began building an air force base.
- American troops landed on Guadalcanal on August 7; six-month battle resulted in American control of the island
- The Allies attacked Iwo Jima, site of crucial Japanese military base, by air and by sea on February 19, 1945

M. The Atom Bomb

- On August 6, 1945, the United States dropped a nuclear bomb on the Japanese city of Hiroshima; three days later, after the Japanese government refused to surrender, the United States dropped a nuclear bomb on the city of Nagasaki.
- Japan surrendered on September 2, 1945; the Second World War ended.

N. After World War II

- On August 1, 1945, the leaders of Great Britain, the Soviet Union, and the United States announced the Potsdam Agreement; Germany split into four occupation zones, with France, Great Britain, the Soviet Union, and the United States each overseeing one zone;

Allies took measures to weaken Germany's military and limit its industry; canceled Nazi-era laws and captured and tried Nazi war criminals

- The peacemaking process with Japan was led by the United States; Japan's emperor allowed to remain in power, but he had to declare that he was not a god; the United States helped establish a democracy and put into place a new constitution that established a House of Representatives elected by both men and women
- Led by U.S. president Franklin Roosevelt and British prime minister Winston Churchill, the Allied nations signed the Atlantic Charter in 1941; this document calls for nations to cooperate to ensure world peace; the organization known as the United Nations was born in 1945 with the UN Charter
- The General Assembly created; a legislature made up of representatives from nations around the world; five most powerful Allied nations—China, France, Great Britain, the Soviet Union, and the United States—were made permanent members of the Security Council, which would also have rotating representation from smaller nations
- In 1948, the UN created the Universal Declaration of Human Rights.
- Mohandas Gandhi (1869–1948) leader of Indian Congress Party; Indian independence negotiated in 1947; resulted in creation of two nations—India and Pakistan
- In 1917, Great Britain issued the Balfour Declaration, which formalized the British government's support for the creation of a national home for Jewish people in Palestine.
- Soviet Union and the United States emerged as the world's superpowers.

XX. East and Southeast Asia in the Second Half of Twentieth Century

A. Geography

- East and Southeast Asia
- China
- Taiwan
- Japan
- North Korea
- South Korea
- Vietnam
- North America
- Atlantic Ocean
- Pacific Ocean
- Sea of Japan (East Sea)

B. Globalization

Communist governments rose to power in several Southeast Asian countries after World War II. Communist ideals appealed to people who had experienced little opportunity under the colonial system in Southeast Asia. Others in those countries, however, rejected communism and actively fought against it. Wars in Southeast Asia became theaters of conflict in the Cold War.

- Inspired by the ideas of Marx and Lenin, the Chinese Communist Party was formed; Mao Zedong was a leading member.
- Outbreak of Chinese Civil War (1927–1949) in which National Party and Communist Party opposed each other
- Jiang Jieshi leader of the Nationalist Party
- Mao became the leader of the Communist Party; led his army on the longest wartime military march ever recorded (the Long March).
- Chinese Civil War paused in 1937; Nationalists and Communists united to fight expansionist aggression from Japan.

Timeline

- Major part of World War II in Asia, the Second Sino-Japanese War, began with attacks on Chinese cities such as Beijing, Shanghai, and Nanjing; alliance between Nationalists and Communists continued through World War II; the civil war resumed after 1945
- After four years of post-World War II fighting, Mao's forces won; declared China to be the People's Republic of China
- Jiang's Nationalists fled to the island of Taiwan; set up an anti-communist, authoritarian government and continued calling it the Republic of China

C. People's Republic of China

- Mao remakes China into a communist nation; seized lands from private ownership; collectivization; forced increase of coal mining and steel production.
- Communist Party outlawed Confucianism, Buddhism, Christianity, and other religions.
- Implementation of the Great Leap Forward in late 1950s; five-year plan; use of untested methods in irrigation and farming; people forced to join communes; crop yields fell; millions of people died during period of famine; changes in industrial production also failed; five-year plan halted after three years
- Mao resigned as chairman of the People's Republic of China; remained chairman of the Chinese Communist Party, a more powerful role than chairman of the country

D. The Cultural Revolution

- Mao embarked on the Great Proletarian Cultural Revolution; aimed to defeat enemies and remake Chinese society; schools closed; young people told to speak out against bourgeois values and the people who represented them; youths organized into paramilitary groups called the Red Guards; Red Guards dispersed to rural areas
- Lin Biao named as Mao's successor; Lin Biao and other military leaders planned coup to unseat Mao; Lin Biao died in 1971; Mao dies in 1976
- Starting in 1977, Mao's successor, Deng Xiaoping, favored allowing more free market practices to guide China's development; he led the country for the next twenty years, opening its market to trade with the United States and other Western countries; allowed more personal liberty; quashed democratic movements
- In 1989, students gathered in Beijing's Tiananmen Square to peacefully demonstrate for greater freedom; Deng sent in military forces to control the crowd; hundreds of peaceful demonstrators killed
- China became the largest manufacturing country and the second-largest economy in the world.

E. Korea's Civil War

- After its World War II defeat, Japan surrendered Korea, which it had occupied since the early 1900s, to the Soviet Union and the United States; the Soviets occupied the northern half; the United States took control of the southern half
- By the end of the 1940s, the North was a communist country and the South was an anti-communist nation; both led by dictators
- In 1950, North Korean leader Kim Il-sung sent troops to invade South Korea; North Korean troops, with the support of the Soviet Union, quickly conquered almost all the peninsula.
- The United Nations sent military forces to assist South Korea; mostly American troops led by United States general Douglas MacArthur
- Concerned UN forces might cross the border, Mao Zedong sent Chinese troops to assist the North Koreans; by early 1951, the communists had pushed UN forces back to the thirty-eighth parallel
- In 1953, two sides agreed to a cease-fire; South Korea, which encompassed all Korean territory south of the thirty-eighth parallel, continued to be a key ally of the United States in East Asia; North Korea, called the Democratic People's Republic of Korea, remained communist; both Koreas were simultaneously admitted to the United Nations in 1991

F. Life in North and South Korea

- First president of South Korea, Syngman Rhee, was anti-communist, but an authoritarian; political and economic instability caused by growing opposition forced Rhee out of power in 1960.
- Land reforms approved during Rhee's reign opened property ownership to more people and helped create strong economic growth from the 1960s onward; population boomed; more people gained an education; a middle class emerged; growth of urbanization; enormous population growth of South Korea's capital, Seoul
- People of South Korea lived under repressive rule for decades; South Koreans directly elected a president for the first time in 1987.
- In 1988, the Olympic Games were held in Seoul; changed the world view of South Korea
- Today, South Korea is one of the ten largest economies in the world.
- Dictator Kim Il-sung continued to rule North Korea after the Korean War.
- Propaganda glorified Kim as the "Great Leader"; he isolated North Korea from the rest of the world.
- Kim Il-sung died in 1994; he was replaced by his son Kim Jong-il; collapse of Soviet Union impacted North Korea's economy; economic hardship and starvation
- Kim Jong-il died in 2011; replaced by his son Kim Jong-un

G. Vietnam

- Vietnam became a colony of France in the late 1800s; after World War II, communist Vietnamese leader Ho Chi Minh led an independence movement to end French rule; during the war, Ho led opposition forces in the use of guerilla tactics against occupying Japanese troops
- In 1954, Ho's forces defeated the French at the Battle of Dien Bien Phu; France withdrew and Vietnam gained independence.
- Vietnam split into two countries; communist government in the North; anti-communist government in the South; leaders from both agreed to hold elections to reunite Vietnam; not supported by United States; in 1959, Ho Chi Minh and North Korea declared war on South Korea
- United States viewed Vietnam as part of larger Cold War struggle against communism; U.S. president Dwight Eisenhower believed that the fall of Vietnam to communists would lead to the spread of communism across Southeast Asia
- U.S. Congress sent hundreds of millions of dollars to help the South Vietnamese government of Ngo Dinh Diem fight communist guerillas (Viet Cong).
- In 1964, the United States' involvement increased in 1964; an American warship in the Gulf of Tonkin reported it had been attacked by the North Vietnamese (Historians now accept that this attack never happened).
- U.S. forces began bombing North Vietnam.
- In January 1968, the Viet Cong launched the Tet Offensive; series of attacks on South Vietnamese cities conducted during Tet, the Vietnamese new year
- American soldiers brutally killed and tortured more than five hundred people in the My Lai massacre; public opinion in the United States began to turn against the war
- President Lyndon Johnson succeeded by Richard Nixon in 1968
- Cease-fire agreement finally reached in 1973; the United States began to pull its troops out of Vietnam; two years later, the South Vietnamese capital of Saigon fell to communist forces; North and South Vietnam united under communist rule
- Saigon renamed Ho Chi Minh City
- Many Vietnamese people who opposed communism fled the country.
- Vietnam opened its doors to Western countries in 1986.

H. Japan

- After World War II, the Allies placed Japan under military occupation for seven years; occupation largely directed by the United State under leadership of General Douglas MacArthur
- During the occupation, the political system of Japan was transformed; new constitution included a bill of rights that said the country would no longer maintain a military, except for self-defense
- Land reforms included the transfer of ownership of farmland from landlords to farmers, ended last remnants of feudal system
- Workers granted more rights; establishment of unions; women granted right to vote; academic freedom guaranteed
- Population moved from countryside to cities such as Tokyo
- Economy of Japan experienced rapid growth as mechanization led to greater efficiencies in industry and agriculture; huge success producing goods for export such as cars, cameras, and televisions
- Japan experienced recession and recovery; remains one of world's economic powerhouses

XXI. Europe in the Second Half of the Twentieth Century

A. Geography

- Europe
- Balkans
- Russia, Great Britain, Germany, France, Belgium, Italy, Luxembourg, the Netherlands, Norway, Portugal, Greece, Estonia, Armenia, Belarus, Albania, Bulgaria, Serbia, Croatia, Bosnia and Herzegovina, Kosovo, North Macedonia, Slovenia, Czechoslovakia, Hungary, Poland, Romania, Ireland, Northern Ireland
- Turkey
- Afghanistan
- Pakistan
- United States
- Canada

B. Globalization

The end of World War II did not mean the end of conflict and competition in Europe. After the war's end, the clash of ideas between democratic capitalism and authoritarian communism threatened to plunge Europe into another conflict. The next forty-five years were characterized by a long-simmering tension between two armed camps. The Cold War shaped European politics through the early 1990s, and its consequences are still seen to this day.

C. The Iron Curtain

- In eastern Europe, after World War II, local communist parties gained support among the citizens.
- Western nations feared communist revolutions in Western countries; Western leaders, especially in the United States, viewed rebuilding Europe as way to counter the threat of communism
- Czechoslovak Communist Party won 39 percent of the vote in 1946 elections; seized full control in 1948; arrested their political opponents; Czechoslovakia fully under Soviet control
- Several countries, such as Estonia and Belarus, fully absorbed into Soviet Union
- In 1948, President Truman established the European Recovery Program, (the Marshall Plan), named for Truman's secretary of state, George C. Marshall (1880–1959).

Timeline

- European countries that took aid from the program saw their gross domestic product (GDP) grow during the three and a half years the Marshall Plan was in effect.
- In the West, in 1946, British leader Winston Churchill said that an “iron curtain” had been lowered across Europe, along the borders of the region under Soviet control; wanted western European and American leaders to strengthen themselves politically and militarily
- Stalin blamed World War II on problems within and between capitalist countries; argued that war was inevitable as long as capitalism existed; believed capitalist competition led to constant struggle for resources and caused “uneven development”

D. The Atomic Age

- Germany reflected this divide; had been divided in half by the occupying Allies; West Germany, officially known as the Federal Republic of Germany, was democratic, capitalist; East Germany, or the German Democratic Republic, was communist and part of the Soviet alliance
- In 1948, the Western alliance of the United States, Great Britain, and France began to plan a new West German state; began issuing deutsche marks in West Berlin; Soviet leaders, were not been consulted; responded by setting up a blockade of West Berlin; Western nations flew large quantities of food and supplies over East German territory to Berlin; blockaded East Germany; blockades lifted in 1949
- In 1949, creation of the North Atlantic Treaty Organization (NATO), a formal military alliance among the Western allied nations
- Communist countries of eastern Europe entered a similar agreement in 1955; the Warsaw Treaty Organization, or Warsaw Pact, originally consisted of Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania, and the Soviet Union.
- After the United States bombed Hiroshima and Nagasaki in August 1945, the Soviets launched a special project to develop nuclear technology; achieved success in 1949; other world powers joined the atomic race; Great Britain conducted its first nuclear test in 1952; France followed in 1960
- One rationale behind the development of nuclear weapons was deterrence.
- Tense first phase of the Cold War ended with the death of Joseph Stalin on March 5, 1953; Stalin’s successor, Nikita Khrushchev (1894–1971)
- In 1956, Hungarian prime minister Imre Nagy (1896–1958) declared that non-Communists would be allowed to participate in running the government; also declared Hungary’s neutrality in the contest between West and East; the Soviets invaded Hungary
- Construction of the Berlin Wall in 1961

E. European Development and Changes

- Baby boom of the postwar period, especially large number of births from 1945 to 1952, added millions of young people to Europe.
- Advertising, pop culture, and social events targeted young adults, viewed as the leaders of new cultural and social moment
- Youth culture and youth politics; in May 1968, a French student-led protest became an uprising that included participants from across society; in 1968, citizens of Czechoslovakia rose up during a period called the Prague Spring; Soviet troops and their allies invaded Czechoslovakia on August 20–21, 1968
- European economic boom led to the rise of European welfare states, in which governments provided benefits such as free university education, free health care, and generous pensions; Great Britain established the National Health Service to provide health care to all citizens.
- From 1968 to 1998, a conflict called the Troubles erupted in the six counties of Northern Ireland (part of Great Britain); unionist and republican paramilitaries fought campaigns of terrorism against each other and the British; the two sides agreed to end the conflict in 1998; peace deal, called the Good Friday Agreement

F. The Soviet Union Collapses

- Between 1989 and 1992, the Soviet Union was abolished, the Soviet bloc broke up, and the Cold War ended; reasons: economic, social, and political
- Soviet economic crisis put pressure on the Soviet government to enact reforms; resistance to change dominated by elderly Soviet men who prioritized building military power above the needs of Russian citizens; years of stagnation began after Leonid Brezhnev (1906–82) became leader of the Soviet Union in 1964
- In 1978, Afghanistan's government was replaced in a coup led by communist army officers; opposition resulted in Russian invasion in 1979; Soviet army failed to control anything beyond the major cities of Afghanistan; thousands of Afghans were killed, and millions more fled to neighboring countries such as Pakistan; Western powers sold weapons to Afghan fighters; Soviet Union withdrew in 1989
- Mikhail Gorbachev (b. 1931), became the leader of the Soviet Union in 1985; worked to modernize and streamline the Soviet economy and government; proposed a series of cultural reforms called *glasnost* (openness); eventually, Soviet leadership allowed democratic reforms, including contested elections and secret ballots, for the first time in its history
- In the 1980s, independent trade unions in Poland led campaigns for workers' rights and social change; the largest union, led by Lech Wałęsa (b. 1943), helped force the Polish government to restore a democratic parliament and hold elections in 1989
- November 9, 1989, Berlin Wall collapsed
- The Soviet Union reacted to popular movements by removing troops from countries that were becoming democratic, such as East Germany, Hungary, Czechoslovakia, and Poland; in 1990, Gorbachev agreed that East and West Germany should be reunited
- The former Soviet Union broke up into fifteen independent countries, including Russia, Armenia, and Estonia.
- New Russian president Boris Yeltsin (1931–2007) in charge of ending the Soviet system and beginning a transition to a liberal, democratic, and capitalist country

G. The Break-up of Yugoslavia

- Between June 1991 and May 1992, the five Yugoslavian regions—Slovenia, Croatia, Bosnia and Herzegovina, Serbia, and Macedonia—declared their independence; population came from many ethnicities
- Conflict arose between the majority and minority ethnic and religious populations; Serbs in Croatia wanted to join Serbia; Serbs in Bosnia and Herzegovina wanted independence from the Muslim majority
- After two years of fighting, the United Nations sent humanitarian aid to civilians and set up safe zones for refugees; UN forces did not defend safe zones; Serbian forces massacred their opponents; fighting stopped in 1995 after NATO agreed to send troops to stop Serbs from attacking Bosnian forces
- In Serbia, ethnically Albanian and Muslim citizens formed the Kosovo Liberation Army (KLA); rebellion prompted brutal attacks by the Yugoslav army, Serbian police, and Serbian soldiers; thousands of Kosovans driven from their homes; United Nations and NATO forces helped establish a fragile peace; Kosovo declared itself independent in 2008; neither Serbia nor Russia recognized its status as a separate state

H. Toward a United Europe

- The formation of the European Economic Community (EEC) in 1957 created a common market among the member nations; EEC also began process of creating Europe-wide institutions; the European Parliament has power to consult on European laws and policies; the European Court of Justice hears cases that affect member nations
- European Union (EU), the successor to the EEC, formed in 1993 and today has twenty-seven member countries; unit of currency the euro

XXII. Africa and the Middle East in the Second Half of the Twentieth Century

A. Geography

- Europe
- Russia
- United States
- Africa
 - Uganda, Kenya, South Africa, Zimbabwe, Chad, Gabon, the Republic of the Congo, the Central African Republic, Algeria, Ghana, Cameroon, Libya, Republic of Rwanda, Namibia, Egypt, Tunisia, Morocco, Egypt
- Balkans
- Middle East
- Turkey
- Afghanistan
- Saudi Arabia, Iran, Iraq, the United Arab Emirates, Kuwait, Israel, Palestine, Jordan, Syria, Lebanon
- Arabian Peninsula
- Sinai Peninsula

Timeline

B. Background

Before World War I, Africa and the Middle East were divided up among European empires. Following the collapse of these empires after World War II, a wave of independence movements in Africa and the Middle East brought new nations into existence. The colonial era had left some areas richer and more developed than others. Colonial governments had divided people along racial, religious, and ethnic lines. In the postcolonial era, the former empires—and the new superpowers, the United States and the Soviet Union—had business and military interests in Africa and the Middle East that caused them to interfere with the newly free nations.

- Colonization of Africa via private companies (British East Africa Company), governed directly by home nation (direct rule), indirect rule; settler colonies (South Africa, Zimbabwe)
- Infrastructure developed to transport valuable raw materials from mines and plantations to markets and ports

C. Colonialism Ends

- World War II weakened colonial rule in Africa; many Africans had fought as part of the Allied armies against the Axis Powers.
- In 1954, Algerian nationalists launched a war of independence; bloody war against French followed; in 1962, France accepted Algerian independence
- Kenyans seek independence from the British; *Mau Mau* independence fighters; fighting ended in 1960; British allowed elections to take place early the next year; elections created a government that wrote a new constitution for an independent Kenya
- Jomo Kenyatta (1894–1978), a leader in the movement for independence, became Kenya's first prime minister.
- Kwame Nkrumah (1909–72) formed the Convention People's Party (CPP), which gained mass support among the people of the Gold Coast.
- Nkrumah won election to the Gold Coast's new parliament and became prime minister in 1952; the CPP's independence platform gave the party a large majority of seats in the Gold Coast parliament; used this power to formally gain the Gold Coast's independence
- In 1957, the Gold Coast was recognized as an independent nation and renamed Ghana.
- Fourteen former French colonies in Africa became independent in 1960, as well as two British colonies and one Belgian colony; the year 1960 came to be known as the "Year of Africa."

D. Struggles and Civil Wars

- Newly independent African nations faced challenges; borders had been drawn by European powers; many of the new countries contained conflicting ethnic and religious groups
- New nations aimed to use independence to benefit their own people; continuing trade in African resources helped grow the economy; foreign nations, however, maintained economic and political influence
- Libya gained independence in 1951; in 1959 oil discovered; king of Libya favored western powers; Libya's military staged a coup in 1969, bringing Muammar al- Qaddafi (1942–2011) to power
- Rwanda gained independence in 1961; two main groups in Rwanda—the Tutsi and the Hutu; traditionally, the Tutsi are smaller, wealthier group; the Hutu majority poor farmers
- In 1994, Hutu extremists launched campaign of mass murder directed at Tutsis and moderate Hutus.
- Mobutu Sese Seko (1930–97) ruled the Democratic Republic of Congo (DRC) as a dictator from 1965 to 1997; Idi Amin (1924–2003) in Uganda
- In Ghana, Jerry Rawlings took power in a coup in 1981; was democratically elected in 1992; Rawlings brought political stability to the country and implemented economic reforms
- Namibia gained independence from South Africa in 1990; established politically stable democracy; has one of the strongest economies in Africa

E. South Africa

- South Africa won its independence from Great Britain in 1910, but most of its people were not free; Black population did not have the same rights and power as the white minority that controlled the government and the economy
- In 1913, South Africa's government passed the Land Act; led to the forced removal of Black South Africans from their land; their property sold by the government to white farmers at a reduced cost; Black South Africans were relocated to other areas, where they lived in poverty
- The white minority officially imposed a system called apartheid in 1948; under this system, white and non-white people were required to live in separate areas and could not use the same public facilities.
- Organization of Black South Africans, the African National Congress (ANC), fought apartheid policies
- South African government tried to silence the ANC; in 1960, police forces killed sixty-nine unarmed demonstrators (Sharpeville massacre); government outlawed the ANC
- Nelson Mandela, who had first led peaceful protests against apartheid, became the leader of an armed wing of the ANC, called *Umkhonto we Sizwe* (Spear of the Nation).
- In 1964, Mandela and other ANC leaders sentenced to life in prison
- South African police killed about six hundred Black South Africans during protests in the township of Soweto in 1976.
- International community outraged; began to pressure South African government to end apartheid and release Mandela from prison; introduction of sanctions
- President F. W. de Klerk, in 1990, legalized the ANC and freed Nelson Mandela and other ANC leaders.
- South African government began to end apartheid; in 1994 allowed South Africans of every race to vote; Nelson Mandela elected president
- Apartheid had done lasting damage to Black South Africans; by the early twenty-first century, white South Africans still controlled almost three-quarters of the country's farmland.

F. Africa's Successes and Achievements

- African cities and nations have emerged as global leaders in science and technology in the new millennium; the cities of Algiers in Algeria, Lagos in Nigeria, Nairobi in Kenya, and Johannesburg in South Africa are all considered major international centers for business and culture.
- Innovators across the continent have come up with new solutions to age-old problems: how to transport water and bring medical care to rural areas; addressed new challenges; expanding mobile and Internet access; many inventions rooted in computer and mobile technology, an area in which African nations are leading the rest of the world

G. The Middle East

- The Middle East is not a distinctive geographic zone or a continent; it is a region defined primarily by European and American observers in the nineteenth and twentieth centuries.
- Large proportion of the world's proven oil reserves are in the Middle East—principally in Saudi Arabia, Iran, Iraq, the United Arab Emirates, and Kuwait.

H. Israel and Regional Conflict

- Prior to World War I, the Ottoman Empire controlled the land of Palestine; Palestine had a large Arab population.
- European anti-Semitism and a desire for self-determination led some Jews to seek a national homeland.
- Great Britain received a mandate to rule Palestine; in 1917, during the First World War, the British issued the Balfour Declaration, which officially supported the creation of a Jewish homeland in Palestine.
- Many Jewish people fled to Palestine to escape persecution by the Nazis and their allies before and during World War II; Jewish population in Palestine grew to about six hundred thousand by 1945; Arabs numbered around a million; violence broke out between the two groups—and both sides attacked the British
- After World War II, British give up mandate in Palestine
- The UN created two states, one Jewish and one Arab, in 1947; the Jewish state declared its independence as Israel in 1948.
- After the signing of the Israeli Declaration of Independence in 1948, armies from neighboring Arab countries of Egypt, Jordan, Iraq, Syria, and Lebanon launched a war against Israel; Israelis also seized land from Palestinians; fighting lasted for ten months; when conflict ended, Israel had expanded its territory beyond the land that had been designated for the Jewish state; many people had been displaced
- The division of Palestine set up a long-running conflict between the Jewish state and the Arab population that is still ongoing, both within Israel and in surrounding countries.
- One trigger for violence is the status of Jerusalem; as part of the division, the holy city of Jerusalem was divided in half; Jews and Muslims both consider Jerusalem to be among the holiest cities in the world
- After the establishment of Israel in 1948 and the war that immediately followed, approximately 750,000 Palestinians fled the land they considered their home; Palestinians spread across different neighboring countries; were not organized politically; in 1964, Palestinian leaders formed the Palestine Liberation Organization (PLO); Yasser Arafat became the leader of the PLO in 1969
- In 1967, Israel fought the Six-Day War against Syria and Egypt.
- In 1973, Egypt launched a surprise attack on Israel during Yom Kippur.
- In 1979, Egypt and Israel signed a peace treaty to end the off-and-on war that had been fought for thirty years; Israel returned the Sinai Peninsula to Egypt; Egypt agreed that Israel had the right to exist

- From 1987 to 1991, Palestinians participated in a series of protests and riots called the first intifada to protest the occupation of Gaza and the West Bank; led to a peace agreement called the Oslo Accords, which established the Palestinian National Authority as the governing body of parts of Gaza and the West Bank
- Peace process halted during the second intifada—2000 to 2005; Israel withdrew from Gaza toward the end of 2005

I. Egypt

- Egyptian revolution, started in 1919, led to the end of British rule in Egypt in 1922.
- British and the French refused to give up control of the Suez Canal; caused tension over thirty year period; led to second revolution in 1952
- Gamal Abdel Nasser (1918–70) orchestrated the overthrow of King Farouk.
- In 1956, Nasser's government took control of the Suez Canal.
- Britain, France, and Israel invade Egypt to seize back control of the canal in October, 1956; eventual withdrawal of forces due to threat of sanctions
- Nasser died in 1970 and was succeeded by Anwar al-Sadat; he signed Camp David Accords with Israel in 1979; assassinated in 1981
- Hosni Mubarak ruled Egypt from 1981 until 2021; removed from office during Arab Spring

J. Revolution in Iran

- In 1941, Mohammad Reza Pahlavi became the shah, or king, of Iran; favored having strong ties with Great Britain and the United States
- Mohammad Mosaddegh disagreed with shah; wanted Iran's oil wealth to be used to fund development programs to benefit ordinary Iranians; Mosaddegh built political support for a program to nationalize Iran's oil company
- In 1951, Mosaddegh's oil nationalization law passed; the shah made him the country's premier.
- In 1953, the United States and Great Britain orchestrated a coup, overthrew Mosaddegh and returned the shah to total control of Iran; Iranian oil profits renegotiated; shah brutal ruler; secret police
- Ayatollah Ruhollah Khomeini, a fundamentalist, advocated the overthrow of the shah; wanted to transform Iran into an Islamic state; shah removed Ayatollah from the country
- In mid-1970s, Islamic leaders grew angrier with the rule of the shah; more members of the public support Ayatollah Khomeini
- In September, 1978, shah ordered security forces to fire into a crowd of demonstrators; hundreds killed, thousands wounded; riots broke out two months later; Khomeini called for the overthrow of the shah
- In December, 1978, the governing regime fell; the shah fled the country.
- Khomeini became the leader of the new Islamic Republic of Iran in 1979; new government set up a theocracy based on religious beliefs and implemented Islamic laws
- In late 1979, student revolutionaries stormed the United States embassy in Tehran; took more than fifty American hostages; were held for 444 days before their release

K. Conflicts in the Persian Gulf

- Iraq ruled from 1979 to 2003 by Saddam Hussein (1937–2006); Iraq's ruling party was secular
- Iraq and Iran hostile to each other throughout the 1970s
- In 1980, Saddam Hussein ordered an invasion of Iran; war lasted until 1988
- In 1990, Iraq invaded and annexed the neighboring country of Kuwait to claim its oil fields; United States–led coalition of international forces repelled Hussein's forces from Kuwait in the 1991 Persian Gulf War.

- On September 11, 2001, terrorists belonging to the Islamic fundamentalist group al-Qaeda launched attack on the United States; hijacked and flew planes into the twin towers of the World Trade Center in New York City, the Pentagon, and a field in Pennsylvania
- United States responded by launching a war against the Taliban, the de facto government of Afghanistan, which had allowed al-Qaeda to use the country as its headquarters.
- The United States removed the Taliban from power; set up new government friendly to its interests
- Concurrently, the United States invaded Iraq in 2003 based on claims that Iraq had weapons of mass destruction.
- Hussein forced from power, tried for war crimes, and eventually executed; Hussein's removal left Iraq without a strong leader; different factions of Shiites and Sunnis violently vied for power
- U.S. troops left Iraq in 2011; weapons of mass destruction never found
- In 2011, U.S. soldiers in Pakistan found Osama bin Laden, the al-Qaeda leader responsible for the September 11 attacks, and killed him.
- The war in Afghanistan continued until 2021, when the United States and Great Britain withdrew troops; the Taliban quickly returned to power.

XXIII. Latin America in the Second Half of the Twentieth Century

A. Geography

- North America
- Central America
- South America
- United States
- Mexico
- Guatemala
- Panama
- Nicaragua
- El Salvador
- Brazil
- Argentina (Falkland Islands/ Malvinas Islands)
- Columbia
- Chile
- Belize
- Cuba
- Haiti
- Dominican Republic
- Caribbean

B. Background

In the second half of the twentieth century, many Latin American nations began to transition from military dictatorships to democracies. Populist leaders tapped into the energy of the working classes and took control in many places. The United States continued its involvement in Latin America as the Cold War accelerated. In the 1970s, military dictatorships took control of many Latin American countries, but democracy eventually returned in most places.

The United States inserted itself into Central American and Caribbean commerce and governance in the early twentieth century. It intervened more than thirty times before

1933, at which point President Franklin Roosevelt adopted the Good Neighbor Policy, which called for an end to armed U.S. intervention in Latin America.

- Mexican Revolution veteran Venustiano Carranza (1859–1920) became the first president of the new Mexican republic in 1917; oversaw rewriting of Mexican constitution
- Carranza eventually succeeded by Lázaro Cárdenas (1895–1970) in 1934; Cárdenas was first Mexican president to truly implement the economic and social reforms outlined in the 1917 constitution
- Institutional Revolutionary Party (PRI) took over as the nation's dominant political force after Cárdenas's presidency ended in 1940.
- PRI eventually taken down by charges of corruption; devastating 1985 earthquake in Mexico City revealed political leaders' corruption
- In 2000, Vicente Fox, businessman and right-wing populist, won the presidency as a member of the National Action Party (PAN)
- Today, Mexico is an important economic and political player in Latin America; booming industry and service sectors; mineral resources

C. Guatemala

- First peaceful transition of power in Guatemala in 1950; Jacobo Arbenz replaced Juan José Arévalo as president; embraced idea of agrarian reform; in 1952, passed reform to redistribute uncultivated land from wealthy estates to rural workers
- Concept of land reform alarmed U.S. government; believed communists would use the policy to organize the population; instructed CIA to undermine and destabilize the Guatemalan government; authorized the U.S. Air Force to provide arms to Guatemalan military officer Colonel Carlos Castillo Armas (1914–57)
- Castillo Armas staged military coup against the democratically elected Arbenz in 1954; claimed the presidency; returned all confiscated land to the United Fruit Company; thwarted farmworkers' attempts to unionize; assassinated in 1957
- Military governments ruled Guatemala for several decades; 1996 peace agreement restored the nation's representative government
- Ernesto "Che" Guevara (1928–67), Argentine physician working in Guatemala, took up arms against the U.S.-backed Guatemalan military to fight for Arbenz; as well as Raúl Castro (b. 1931) and Fidel Castro (1926–2016); Guevara one of the leaders of the 1959 Cuban Revolution

D. Panama

- Recognized as independent nation by the United States in 1903 after it allowed joint control of the Canal Zone
- In 1977, U.S. president Jimmy Carter signed a treaty that promised to return the Canal Zone to Panama on December 31, 1999.
- In 1989, during the presidency of George H. W. Bush, the United States helped overthrow Panamanian military dictator Manuel Noriega.

E. Nicaragua

- Nicaragua subject to United States intervention many times during the nineteenth and twentieth centuries
- Between 1934 and 1979, Somoza dynasty ruled Nicaragua; known for violence against enemies and for corruption
- In 1979, rebel group called the Sandinistas carried out a successful socialist revolution against the Somoza regime
- Sandinistas confiscated and redistributed land owned by the Somoza family.
- President Ronald Reagan and his administration helped fund and train a counterrevolutionary military force called the Contras to defeat the Sandinistas.

- In the Nicaraguan presidential election of 1984, Sandinista leader Daniel Ortega (b. 1945) won 67 percent of vote; following year, the United States imposed a five-year trade embargo
- U.S. Congress passed bills that called for an end to Contra funding; Reagan administration continued to secretly support the counterrevolutionaries.
- In 1986, revealed that the U.S. National Security Council had illegally sold weapons to Iran at inflated prices; used profits to fund the Contras; the Iran-Contra Affair
- In 1990, Nicaraguans elected Violeta Barrios de Chamorro (b. 1929).
- Daniel Ortega re-elected in 2006; implementation of conservative laws, support for extreme right-wing ideology, and suppression of the press

F. El Salvador

- El Salvador's economy largely agricultural in the early twentieth century; rural workers exploited by influential landowners; Salvadorian students protested; Catholic priests worked to improve lives of rural population
- Catholic Church viewed as enemy of the ruling elite, the armed forces, and the landowning oligarchy
- In 1960s, guerrilla and anti-government forces in El Salvador drew support from the rural population; success of Sandinistas inspired Salvadorans to rise against oppressive government; between 1979 and 1985, rebel group called Farabundo Martí National Liberation Front (FMLN) almost overthrew Nicaragua's ruling elite
- Reagan administration supported the Salvadoran military in its fight against the FMLN guerrillas; between 1980 and 1992, the United States sent El Salvador's government more than \$4 billion in economic and military aid
- Assassination of Archbishop Óscar Romero in 1980 and murder of eight people, including six Catholic priests, in 1989, prompted international pressure
- United Nations brokered a peace agreement between the Salvadoran government and the FMLN in 1992

G. South America: Brazil

- Brazilian economy impacted by the global depression of 1930s
- Getúlio Vargas (1882–1954), Brazilian politician, represented the reform party in the 1930 presidential election; he lost; led armed revolution that overthrew Brazil's oligarchic government
- Vargas centralized power; replaced corrupt coffee barons who ruled southern part of the nation
- In 1937, with help of the Brazilian military, he assumed dictatorial powers; rewrote the country's constitution; period known as the New State
- Inspired by Mussolini's rule in Italy, Vargas imposed an authoritarian regime; prohibited political parties that opposed his government; made improvements to educational system; enacted social security laws; established a minimum wage; gave women the right to vote
- Vargas overthrown in 1945 military coup; still maintained widespread public support; was elected president of Brazil in 1951; until his death in 1954, led in a more democratic manner; this approach followed by subsequent presidents; in 1964, military took control of the country

H. Argentina

- Populist Juan Domingo Perón (1895–1974), Argentine military officer, rose to power during 1943 government coup; recognized workers as important political force; seen as a threat, Domingo Perón arrested and jailed; supporters protested; Perón freed on October 17, 1945; known in Argentina as Loyalty Day; elected president in 1946
- Perón rewrote Argentina's constitution in 1949; bill of rights; free speech restricted; authoritarian regime; prohibited opposing parties

- Eva “Evita” Duarte de Perón (1919–52), wife of Juan Perón, powerful female leader in Latin America; helped establish national vote for women in 1947
- Military overthrew Peron in 1955; attempted to “de-Perónize” society; prohibited any politician belonging to the Peronist party from holding office; Perón exiled to Spain
- Political tensions of Cold War, and economic turmoil of 1970s fragmented Argentine society; Peron returned to Argentina; reelected president in 1973; died in office

I. Columbia

- Colombia experienced waves of violence after assassination of popular leftist politician and presidential hopeful Jorge Eliécer Gaitán in 1948; period known as La Violencia, or the Era of Violence
- Laureano Gómez (1889–1965), conservative politician, accused of being involved in Gaitán’s assassination, elected president of Colombia in 1950; censored the press, restricted courts, persecuted Protestants; Gómez overthrown by Colombian military in 1953
- Gómez replaced by General Gustavo Rojas Pinilla (1900–75); corrupt authoritarian; his presidency even more restrictive than Gómez’s
- Guerrilla insurgent groups faded away in most of Latin America after the Cold War; not in Columbia; Revolutionary Armed Forces of Colombia (FARC) and other groups waged war in countryside
- Álvaro Uribe (b. 1952) elected president of Colombia in 2002; waged war against rebel groups; more than two hundred thousand Colombians died; millions displaced; Uribe reelected and served until 2010

J. Military Dictatorships in Latin America

- Democratic governments of several South American countries ruthlessly overthrown in the 1960s and 1970s; often political parties banned, legislatures shut down, and press censored; lawmaking by decree
- Dictators reversed populist policies that benefited workers; banned unions, strikes, and other public demonstrations; anti-communist
- Regimes set up special security forces to kidnap and kill anyone suspected of leftist or anti-government activities
- In Argentina, historians estimate up to thirty thousand people were “disappeared,” or kidnapped.
- United States worked to prevent spread of communist ideology across Latin America; between 1955 and 1976, Argentina received almost \$400 million in military support from the United States; in Chile, the U.S. Navy and CIA provided military support for September 11, 1973, coup that replaced socialist president Salvador Allende (1908–73) with dictator Augusto Pinochet (1915–2006)
- Pinochet embraced capitalism; rewrote the nation’s constitution; universities put under control of military men, who controlled course curricula and hiring and firing of faculty; by 1980, Chile the most privatized and unregulated economy in the world
- Pinochet lost the election in 1988; maintained role as head of the armed forces until 1998
- Falkland Islands, also called Malvinas Islands; conflict in 1982 between Argentina and Britain
- Raúl Alfonsín (1927–2009) democratically elected president of Argentina in 1983; created the National Commission on the Disappeared; Mothers of the Plaza de Mayo
- In Brazil, military regime began slow transition to democracy in the 1970s during period known as the *abertura*, or opening
- Across Latin America, Catholic Church turned against the military due to many human rights abuses
- Aftermath of dictatorships resulted in many challenges for South American countries

K. Cuba

- Cuban Revolution in 1959 highlighted Cold War tensions
- Cuban alliance with the Soviet Union during the Cold War; Cuba experienced four hundred years of Spanish colonialism, followed by U.S. involvement in its affairs
- In 1903, the United States passed the Platt Amendment; stated that the U.S. government had political authority over Cuba; authority lasted until 1934; ended by the Good Neighbor Policy; next quarter century, Cuba led by rulers friendly to American interests
- In 1933, Fulgencio Batista (1901–73) led coup that overthrew the government; maintained influence over next presidents for a period
- In 1940, Batista elected president; increasingly bound to the United States; after serving full term, moved to the United States; Batista returned to Cuba in 1952; staged successful coup with the support of Cuban military; worked with leaders of organized crime in the United States to promote tourism
- Middle-class law student, Fidel Castro, leading opponent of Batista; on July 26, 1953, Castro led failed insurrection in eastern Cuba; many Cubans killed; Fidel and his brother Raúl arrested; upon their release, in 1955, go into exile in Mexico; meet Ernesto “Che” Guevara; organize revolutionary group, the 26th of July Movement
- Castros, Guevara, and seventy-nine other revolutionaries sailed to Cuba from Mexico in 1956; many killed; three leaders and some revolutionaries survive; lived in the Sierra Maestra mountains and attracted more members; waged a guerilla battle against Batista’s forces; on January 1, 1959, the rebels entered Cuban capital, Havana
- Fidel Castro pushed back against U.S. economic dominance; in 1960, Castro made deal to sell Cuban sugar to Soviet Union; U.S. president Dwight D. Eisenhower’s administration retaliated; ended diplomatic relations with Castro; U.S. organize Cuban dissidents to return to Cuba; attempt to overthrow Castro—Bay of Pigs, April 17, 1961; attempt fails; U.S. operation Mongoose also fails
- Castro declares revolution socialist
- In October 1962, U.S. spy planes take satellite photos of installation of Soviet nuclear warheads in Cuba
- Soviet leader Nikita Khrushchev (1894–1971) had installed weapons in Cuba in response to U.S. weapons placed in Turkey
- President Kennedy demands withdrawal of Soviet nuclear warheads; Cuban missile crisis; Soviet Union withdraws missiles in exchange for U.S. assurance not to invade Cuba; thousands of Cubans migrate to the United States; Mariel boatlift, 1980
- Cuba entered period of economic hardship in 1990s; U.S. maintains economic embargo against Cuba
- Fidel Castro died in 2016; Raúl Castro becomes president

L. Haiti and the Dominican Republic

- United States Marines stationed in Haiti from 1915 until 1934
- In 1957, United States supported François “Papa Doc” Duvalier (1907–71) as Haiti’s president; supportive of U.S.; corruption; exploitation of Haitian resources; after his death, his son, Jean-Claude “Baby Doc” Duvalier (1951–2014) installed in office; ousted in 1986
- In 1965, the United States sent troops to the Dominican Republic to end a civil war and install an authoritarian government friendly to its interests.

XXIV. Modern World Events, Challenges, and Successes

A. Geography

- Map of the World

B. Globalization

- Modern globalized economy is result of end of the Cold War
- Networks of production, distribution, trade; fast communications technology; capacity for goods to crisscross the planet; just-in-time supply chain; opportunity for ideas and culture to spread around the world; global influence of American popular culture
- World Trade Organization (WTO) formed in 1995 to set standards for global trade and exchange
- Rise of China as industrial power
- China became world's leading exporter of textiles, furniture, toys
- China's industrial expansion shifted focus to infrastructure in 1999; high-speed rail, highways, building materials, ships
- China admitted into the WTO in 2001
- Growing use of offshore, or foreign, labor; business leaders investing in developing countries such as India and China; workers paid less than workers in the United States and Europe
- Developing countries had fewer safety and environmental regulations, favorable tax rates
- Type of labor performed overseas changed; developing nations had improved systems of education; produced greater numbers of skilled workers and university graduates; caused increase in the amount of skilled labor that was outsourced to the developing world
- Internet communications technology connects billions of people; satellites; mobile phones
- Criticism of globalization; blamed for weakening national economic strength
- Global financial crisis 2007-2009
- Global trade and travel contribute to spread of infectious diseases; COVID-19; vaccinations developed by international teams of scientists

C. Population Challenges

- Estimated 7.7 billion people lived on Earth in 2019; increase of 1 billion people since 2007 and 2 billion since 1994; growth slowing; birth rate decreasing
- United Nations predicts world's population will reach a peak of about 11 billion people by 2100
- Life expectancy increasing; aging population trends

D. Migrating Populations

- Larger global population and interconnected world economy have contributed to increased human migration
- Migration factors: economic, conflicts, wars, persecution, disasters in home countries; United Nations estimated in 2021, 26.6 million people in the world were refugees seeking safety from conflicts and disasters; increase in anti-immigrant rhetoric

E. Conflict and Revolution

- Major lingering issue from the end of the Cold War—the handling of the world's nuclear weapons
- Conflicts in former Russian regions of Chechnya, Georgia, Crimea, Ukraine
- Following global financial crisis of 2007–9, wave of pro-democracy protests in North Africa and Southwest Asia in 2010–11; protests triggered by economic crises and demands for political reform; in Tunisia, President Zine al-Abidine Ben Ali forced to resign in 2011; in Egypt, President Hosni Mubarak forced to resign in 2011; uprisings in Syria, Libya, and Yemen (Arab Spring)
- Arab Spring largely unable to replace authoritarian leaders with democratic governments

- In Syria, under government of Bashar al-Assad, rebel uprising turned into extended civil war; more than seven million Syrians have fled the country
- In Libya, dictator Muammar al-Qaddafi removed from power after European and U.S. forces gave military aid to Libyan rebels
- The Islamic State of Iraq and Syria (ISIS) emerged between 2011 and 2014; at the height of its power, the Islamic State controlled 30 percent of Syria and 40 percent of Iraq

F. Climate Change

- Changes in weather patterns; extremes; changing levels of individual gases impacts individual functions and capabilities of the atmosphere; carbon dioxide and methane
- Deforestation in world's rain forests (Amazon)
- Global initiatives have attempted to tackle issue by lowering emissions; making plans to transition to renewable, clean energy sources
- Kyoto Protocol, signed in 1997, put into effect in 2005, committed industrialized nations to cut greenhouse gas emissions; requested developing nations also do so
- Paris Agreement, signed in 2015, put into effect in 2016, commits all parties to reduction of emissions

G. Science, Technology, and Medicine

- Revived interest in space exploration
- Robotic explorer rover, *Curiosity*, landed on Mars in 2012; began to transmit images and data from the red planet's surface back to Earth; *Curiosity* mission followed by others; *Perseverance*, landed on Mars in 2021
- China showing increased interest in its space program; in 2020, *Chang'e-5* lander touched down on the moon's surface
- Medical breakthroughs in 21st Century helping to eradicate disease and illness around the world

Teachers: In schools, lessons on the visual arts should illustrate important elements of making and appreciating art, and emphasize important artists, works of art, and artistic concepts. When appropriate, topics in the visual arts may be linked to topics in other disciplines. The following guidelines specify a variety of artwork in different media and from various cultures in order to expose students to a wide range of art and artists. While the list is robust, it may require teachers to narrow the selection in order to adequately address the works and related skills within an academic year.

In studying the works of art specified below, and in creating their own art, students should review, develop, and apply concepts introduced in previous grades, such as line, shape, form, space, texture, color, light, design, and symmetry

I. Art History: Periods and Schools

Teachers: The guidelines here continue the organizational scheme established in sixth and seventh grades, which combined art history with analysis of specific illustrative works. Timelines may help students situate the artists, periods, and schools. Note that the periods and characteristics are not absolute distinctions but generally helpful categories (to which there are always exceptions) often used in discussions of art.

A. Modern Representational Painting (WWII-until about 1970)

- Examine representative artists and works, including
 - Regionalism, including:
 - Grant Wood, *American Gothic* (1930)
 - Edward Hopper, *Nighthawks* (1942)
 - Andrew Wyeth, *Christina's World* (1948)
 - Diego Rivera, *Detroit Industry*
 - Jacob Lawrence, a work from his *Builder* series (1947) or *Migration of Negroes* series (1941)
 - Horace Pippin, *Sunday Morning Breakfast*, (1943)
 - Charles Wilbert White, *The Contribution of the Negro to Democracy in America* (1943)
 - Norman Rockwell, *Triple Self-Portrait* (1960)
 - Pop art, including:
 - Andy Warhol, *Campbell's Soup Can, Marilyn* (1962)
 - Roy Lichtenstein, *Whaam* (1963)
 - Alice Neel, *Hartley* (1965)
 - Betye Saar, *Black Girl's Window* (1969)
 - Romare Bearden, *She-Ba* (1970)

B. 20th Century Photography

- Examine representative artists and works, including
 - Alfred Steiglitz, *The Steerage* (1907)
 - James VanDerZee, *Raccoon Couple in Car*, (1932)
 - Margaret Bourke-White, *Fort Peck Dam* (1936)
 - Dorothea Lange, *Migrant Mother, California* (1936)
 - Ansel Adams, *Moonrise, Hernandez, New Mexico* (1941)
 - Gordon Parks, *Washington, D.C. Government Charwoman (American Gothic)* (1942)
 - Henri Cartier-Bresson, *The Berlin Wall* (1962)
 - Graciela Iturbide, *Our Lady of Iguanas* (1979)
 - Cindy Sherman, a selection of her Film Stills, (1977–80)
 - Barbara Kruger, *When I hear the word culture I take out my checkbook* (1985)
 - Carrie Mae Weems, any from her *Kitchen Table Series*, 1989–90

C. 20th-Century Sculpture

- Examine representative artists and works, including
 - Auguste Rodin: *The Thinker*, *Monument to Balzac* (1898)
 - Constantin Brancusi, *Bird in Space* (1923)
 - Henry Moore, *Two Forms* (1934)
 - Meret Oppenheim, *Object* (1936)
 - Sargent Claude Johnson, *#2 Mask*, 1939/1941
 - Alexander Calder, *Lobster Trap and Fish Tail* (1939)
 - Pablo Picasso, *Bull's Head* (1942)
 - Louise Nevelson, *Black Wall* (1959)
 - Eva Hesse, *Repetition Nineteen III* (1968)
 - Judy Chicago, *The Dinner Party* (1974–79)
 - Claes Oldenburg, *Clothespin* (1976)
 - Maya Lin, *Vietnam Veterans Memorial* (1980s)
 - Damien Hirst, *The Physical Impossibility of Death in the Mind of Someone Living* (1991)
 - Louise Bourgeois, *Spider* (1994)

D. Contemporary Art (21st Century)

- Examine representative artists and works, including
 - Jean-Michel Basquiat, untitled, (1981)
 - Keith Haring (any of his works) (80s)
 - Anish Kapoor, *Descent into Limbo* (1992)
 - Kerry James Marshall, *De Style* (1993)
 - Shirin Neshat, from her photo series *Unveiling (Women of Allah series)* (1993)
 - Christo (and Jeanne-Claude), *Wrapped Reichstag* (1995)
 - Banksy, *Girl with Balloon* (also, *Balloon Girl* or *Girl and Balloon*) (2002)
 - Jeff Koons, *Balloon Rabbit* (Red) 2005–2010
 - Nick Cave, *Soundsuit* (2009)

II. Post-Modern Architecture

- Examine examples of Post-Modern Architecture, including
 - Robert Venturi, *Vanna House* (1964)
 - Peter Eisenman, *House VI* (1972)
 - Richard Rogers and Renzo Piano, *Center Pompidou* (1977)
 - James Stirling, *Neue Staatsgalerie, Stuttgart* (1984)
 - Peter Zumthor, *Baths of Vals* (1996)
 - Frank Gehry, *Guggenheim, Bilbao* (1997)
 - Zaha Hadid, *Phæno Science Center* (2005)
 - SOM, *Burj Kalifa, Dubai* (2009)

I. Elements of Music

Teachers: The Music guidelines for Grades 6–8 share a basic vocabulary of the elements of music that can inform the discussion, appreciation, and study of selected musical works. Following these guidelines are recommendations in each grade for a core of musical content, broadly organized as a history of music from early to modern times, with attention to specific periods, composers, and genres. While these guidelines focus on musical vocabulary, appreciation, and history, musical performance should be encouraged and emphasized as local resources allow.

- Review as necessary from earlier grades: The orchestra and families of instruments (strings, wind, brass, percussion); keyboard instruments Vocal ranges: soprano, mezzo-soprano, alto; tenor, baritone, bass
- Recognize (aurally) frequently used Italian terms:
 - Review
 - *grave* (very very slow)
 - *prestissimo* (as fast as you can go)
 - *ritardando* and *accelerando* (gradually slowing down and getting faster)
 - *crescendo* and *decrescendo* (gradually increasing and decreasing volume)
 - Introduce
 - *legato* (smoothly flowing progression of notes)
 - *staccato* (crisp, distinct notes)
- Recognize introduction, interlude, and coda in musical selections.
- Recognize theme and variations.
- Identify chords [such as I (tonic), IV (subdominant), V (dominant); V7]; major and minor chords; chord changes; intervals (third, fourth, fifth).
- Understand what an octave is.
- Understand the following notation and terms:
 - names of lines and spaces in the treble clef; middle C
 -  treble clef,  bass clef,  staff,  bar line,  double bar line, measure,  repeat signs
 -  whole note,  half note,  quarter note,  eighth note
 -  whole rest,  half rest,  quarter rest,  eighth rest
 -  grouped sixteenth notes
 -  tied notes,  dotted notes
 -  sharps,  flats,  naturals
 - *Da capo* [*dc*] *al fine*
 - *Dal segno* [*ds*] *al Fine*
 - *Dal segno* [*ds*] *al Coda*
 - meter signature $\frac{2}{4}$ $\frac{3}{4}$ $\frac{6}{8}$
 - common time $\frac{4}{4}$
 - *piano* *p* (soft), *mezzo piano* *mp* (moderately soft), *pianissimo* *pp* (very soft)
 - *forte* *f* (loud), *mezzo-forte* *mf* (moderately loud), *fortissimo* *ff* (very loud)

II. Non-Western Music

- Become familiar with scales, instruments, and works from various lands, for example: 12-tone scale, sitar from India, Caribbean steel drums, Japanese koto.
- Ravi Shankar and daughter Anoushka Shankar, sitar composers and virtuosos, *Pancham Se Gara*
- Zhao Jiping and son Zhao Lin, with Pipa Virtuoso, Wu Man, *Red Lantern*

III. Classical Music: Modern and Patriotic

Teachers: While these guidelines focus on musical vocabulary, appreciation, and history, musical performance should be encouraged and emphasized as resources allow. The focus here combines music history with appreciation of illustrative works, and continues from Grades 6 and 7 the idea of classifying Western music by periods, with examples of specific composers and works, as well as some associated musical terms. Timelines may help students situate the periods. The periods and their characteristics are not absolute distinctions but generally helpful categories often used in discussions of music.

Note: In Grade 7, students were introduced to works by Dvorák, Grieg, Tchaikovsky, and Ponce.

Note: Florence Beatrice Price was the first African American woman to be recognized as a symphonic composer

A. Music and National Identity

- Composers and works:
 - Jean Sibelius, *Finlandia*
 - Bela Bartók, folk-influenced piano music such as *Allegro barbaro*, selections from *Mikrokosmos* or *For Children*
 - Joaquin Rodrigo, *Concierto de Aranjuez*
 - Aaron Copland, *Appalachian Spring (Suite)*
 - Florence Beatrice Price, “My Soul’s Been Anchored in the Lord” (by Marian Anderson at the Lincoln Memorial)
 - Antônio Carlos Jobim, the founding father of bossa nova music and composer of the famous song, *The Girl From Ipanema*
 - Selections from Mikhail Glinka

B. Modern Music

- Composers and works: Claude Debussy, *La Mer*, first movement, “De l’aube à midi sur la mer,” Igor Stravinsky, *The Rite of Spring*, first performed in Paris, 1913

IV. Modern Musical Performers

Teachers: These guidelines focus on influential modern musicians, but this list is not intended to be exhaustive. Review lyrics and/or video performances of any song by these performers prior to sharing with students to ensure it is appropriate with the culture and standards of your classroom. When introducing the individual/band and work, highlight how this artist was influential and what examples from his/her/their music inspired later musicians.

Aretha Franklin
The Beatles
Bob Dylan
Carol King
Chuck Berry
Elvis Presley
James Brown
Joan Baez
Joni Mitchell
Little Richard
Miles Davis
Nat King Cole
Ray Charles

V. Vocal Music

A. Opera

- Terms: overture, solo, duet, trio, quartet, chorus, aria, recitative
- Composers and works:
 - Gioacchino Rossini, from *The Barber of Seville*: Overture and “Largo al factotum”
 - Giuseppe Verdi, from *Rigoletto*: aria, “Questa o quella”; duet, “Figlia! . . . Mio padre!”; aria, “La donna è mobile”; quartet, “Bella figlia dell’amore”

B. American Musical Theater

- Composers and popular songs:
 - Irving Berlin, "There's No Business Like Show Business," "Blue Skies"
 - Dorothy Fields, "The Way You Look Tonight," "Sunny Side of the Street"
 - George M. Cohan, "Give My Regards to Broadway," "Yankee Doodle Dandy"
 - Cole Porter, "Don't Fence Me In," "You're the Top"
- Broadway musicals: selections including
 - Jerome Kern, *Showboat*: "Ol' Man River"
 - Rodgers and Hammerstein, *Oklahoma!*: "Oh What a Beautiful Mornin'," "Oklahoma"
 - Leonard Bernstein and Stephen Sondheim, *West Side Story*: "Maria," "America"
 - Andrew Lloyd Weber, *Phantom of the Opera*: "The Music of the Night"; *Cats*: "Memory"
 - Stephen Schwartz, *Wicked*: "Defying Gravity"
 - Claude-Michel Schönberg, *Les Misérables*: "One Day More"
 - Lin-Manuel Miranda, *Hamilton*: "Satisfied"

C. Song Ballads

- "Ol' Man River" (Paul Robeson)
- "Day-O" (Harry Belafonte)

Also known as "Banana Boat (Day-O)"

Teachers: In learning the new concepts and procedures, students should use previously acquired mathematics to ensure that the procedures become automatic and habitual. Students should continue to master the use of measuring and drawing instruments, develop their mental arithmetic and their approximating abilities, become more familiar with deductive reasoning, and use calculators and computers in a thoughtful way.

While teaching methods may vary, it is worth keeping in mind the psychological principle that the most effective method for learning mathematics emphasizes frequent, varied practice, and encourages multiple approaches to solving varied types of problems.

I. The Number System

- Know that there are numbers that are not rational, and approximate them by rational numbers.
 - Know that numbers that are not rational are called irrational.
 - Understand (informally) that every number has a decimal expansion.
 - Show that for rational numbers the decimal expansion eventually repeats.
 - Convert a decimal expansion which repeats eventually into a rational number.
 - Use rational approximations of irrational numbers to compare the size of irrational numbers.
 - Identify approximate location on a number line diagram
 - Estimate the value of expressions

II. Expressions and Equations

- Work with radicals and integer exponents.
 - Know and apply the properties of integer exponents to generate equivalent numerical expressions.
 - Use square root and cube root symbols to represent solutions to equations of the form $x^2 = p$ and $x^3 = p$, where p is a positive rational number.
 - Evaluate square roots of small perfect squares.
 - Evaluate cube roots of small perfect cubes.
 - Know that $\sqrt{2}$ is irrational.
 - Use numbers expressed in the form of a single digit times an integer power of 10 to estimate very large or very small quantities.
 - Express how many times as much one is than the other.
- Perform operations with numbers expressed in scientific notation.
 - Use scientific notation and choose units of appropriate size for measurements of very large or very small quantities.
 - Interpret scientific notation that has been generated by technology.
- Understand the connections between proportional relationships, lines, and linear equations.
 - Graph proportional relationships.
 - Interpret the unit rate as the slope of the graph.
 - Compare two different proportional relationships represented in different ways.
 - Use similar triangles to explain why the slope m is the same between any two distinct points on a non-vertical line in the coordinate plane.
 - Derive the equation $y = mx$ for a line through the origin
 - Derive the equation $y = mx + b$ for a line intercepting the vertical axis at b .
- Analyze and solve linear equations and pairs of simultaneous linear equations.
 - Solve linear equations in one variable.

Include problems where both decimal and scientific notation are used.

Transforming into simpler forms until an equivalent equation of the form $x = a$, $a = a$, or $a = b$ results.

Including, equations whose solutions require expanding expressions using the distributive property and collecting like terms.

Points of intersection satisfy both equations simultaneously.

- Give examples of linear equations in one variable with one solution, infinitely many solutions, or no solutions.
- Show which of these possibilities is the case by successively transforming the given equation into simpler forms.
- Solve linear equations with rational number coefficients.
- Analyze and solve pairs of simultaneous linear equations.
- Understand that solutions to a system of two linear equations in two variables correspond to points of intersection of their graphs.
- Solve systems of two linear equations in two variables algebraically.
 - Estimate solutions by graphing the equations.
 - Solve simple cases by inspection.
- Solve real-world and mathematical problems leading to two linear equations in two variables.

III. Functions

The graph of a function is the set of ordered pairs consisting of an input and the corresponding output.

Represented algebraically, graphically, numerically in tables, or by verbal descriptions.

Including reading these from a table or from a graph.

- Define, evaluate, and compare functions.
 - Understand that a function is a rule that assigns to each input exactly one output.
 - Compare properties of two functions each represented in a different way.
 - Interpret the equation $y = mx + b$ as defining a linear function (a straight line).
 - Give examples of functions that are not linear.
- Use functions to model relationships between quantities.
 - Construct a function to model a linear relationship between two quantities.
 - Determine the rate of change and initial value of the function from a description of a relationship or from two (x, y) values.
 - Interpret the rate of change and initial value of a linear function in terms of the situation it models.
 - Interpret the rate of change and initial value of a linear function in terms of its graph or a table of values.
 - Describe qualitatively the functional relationship between two quantities by analyzing a graph.
 - Sketch a graph that exhibits the qualitative features of a function that has been described verbally.

IV. Geometry

- Understand congruence and similarity using physical models, transparencies, or geometry software.
 - Verify experimentally the properties of rotations, reflections, and translations:
 - Lines are taken to lines, and line segments to line segments of the same length.
 - Angles are taken to angles of the same measure.
 - Parallel lines are taken to parallel lines.
 - Understand that a two-dimensional figure is congruent to another if the second can be obtained from the first by a sequence of rotations, reflections, and translations.
 - Given two congruent figures, describe a sequence that exhibits the congruence between them.
 - Describe the effect of dilations, translations, rotations, and reflections on two dimensional figures using coordinates.
 - Understand that a two-dimensional figure is similar to another if the second can be obtained from the first by a sequence of rotations, reflections, translations, and dilations.
 - Given two similar two-dimensional figures, describe a sequence that exhibits the similarity between them.

- Use informal arguments to establish facts about the angle sum and exterior angle of triangles.
- Use informal arguments to establish facts about the angles created when parallel lines are cut by a transversal.
- Use informal arguments to establish facts about the angle-angle criterion for similarity of triangles.
- Understand and apply the Pythagorean theorem.
 - Explain a proof of the Pythagorean Theorem and its converse.
 - Apply the Pythagorean Theorem to determine unknown side lengths in right triangles in real-world and mathematical problems in two and three dimensions.
 - Apply the Pythagorean Theorem to find the distance between two points in a coordinate system.
- Solve real-world and mathematical problems involving volume of cylinders, cones and spheres.
 - Know the formulas for the volumes of cones, cylinders, and spheres and use them to solve real-world and mathematical problems.

V. Statistics and Probability

- Investigate patterns of association in bivariate data.
 - Construct and interpret scatter plots for bivariate measurement data to investigate patterns of association between two quantities.
 - Describe patterns such as clustering, outliers, positive or negative association, linear association, and nonlinear association.
 - Know that straight lines are widely used to model relationships between two quantitative variables.
 - For scatter plots that suggest a linear association, informally fit a straight line, and informally assess the model fit by judging the closeness of the data points to the line.
 - Use the equation of a linear model to solve problems in the context of bivariate measurement data, interpreting the slope and intercept.
 - Understand that patterns of association can also be seen in bivariate categorical data by displaying frequencies and relative frequencies in a two-way table.
 - Construct and interpret a two-way table summarizing data on two categorical variables collected from the same subjects.
 - Use relative frequencies calculated for rows or columns to describe possible association between the two variables.

Teachers: Effective instruction in science requires not only direct experience and observation but also book learning, which helps bring coherence and order to a student's scientific knowledge. Only when topics are presented systematically and clearly can students make steady and secure progress in their scientific learning. The Science sequence for the middle school grades aims for more intensive and selective study of topics, a number of which were introduced in earlier grades. The *Sequence* continues the practice of studying topics from each of the major realms of science (physical, life, and earth science). Students are expected to do experiments and write reports on their findings.

I. Contact Forces

A. Motion

- Measures of motion:
- Speed: distance per unit of time
- Velocity: distance per unit of time in a particular direction
- Changes in velocity can involve changes in speed and/or direction

B. Contact Forces

- A force is a push or pull on an object.
- A contact force is a push or pull on objects that touch each other.
- A force has both direction and magnitude.
- Newton's mathematical expression of force; a newton is the measure of force in the metric system, pound-force in the English system.
- If an object is at rest or there is no change in its movement, then the forces acting on it are balanced.
- Unbalanced forces result in changes of an object's velocity.

C. Collisions

- The kinetic energy of a moving object is related to its mass.
- Newton's Third Law of Motion can be applied to collisions.
- The forces acting on object in a collision, and the change the motion of the objects, involves the velocity of each object and its mass.
- The use of engineering design processes can help us design ways to minimize damage when objects collide.

II. Sound Waves

A. Sound Waves and Sound

- Difference between a sound and a sound wave: Sound is the result of sound waves. E.g., a ringing bell causes a sound wave, which a person recognizes as a sound.
- Vibrating objects establish sound waves when not in a vacuum.
- Common vibrating objects: human voice box, siren, bell, parts of a cell phone or television
- Sound waves, when interacting with matter, can be reflected, absorbed, or transmitted.
- Because sound waves transmit energy, they can often interact with matter to cause it to move, such as making our eardrums vibrate.
- Like all forms of energy, a sound wave can be transformed into another energy form—the engineering basis for many practical devices.

- Characteristics of a sound wave include:
 - Speed
 - Frequency
 - Amplitude

III. Forces at a Distance

A. Non-Contact Forces

- A force is a push or pull on an object.
- A non-contact force is a push or pull on objects that do not touch each other.
- Examples: magnetism, electrical forces, gravity
- Non-contact forces involve fields that surround object, magnetic fields, electrical fields, gravitational fields.
- If an object is at rest or there is no change in its movement then, the forces acting on it are balanced.
- Unbalanced forces result in changes of an object's velocity.

B. Magnetism and Electicity

- Magnets exert a non-contact force on objects made of certain metals.
- A metal object becomes magnetic when all its electrons spin in the same direction.
- Some objects are naturally magnetic, others can be made by subjecting certain metals to an electrical field.
- All magnets have two poles, north and south.
- Similar magnetic poles repel; opposite magnetic poles attract.
- The entire Earth is a magnet, and therefore surrounded by a magnetic field.
- Electrical forces are the result of charged particles acting upon one another.
- Electrical and magnetic forces can be described by the activity of the field associated with each force.

C. Gravity

- Gravity is a force that acts upon any two objects in the universe.
- Gravity results because any mass causes the space around it to curve.
- Newton's law of universal gravitation
- Effects of universal gravitation on objects in the universe

IV. Earth in Space

A. Earth, Moon, Sun

- Earth, the moon, and sun form a system.
- Earth revolves around the sun and the moon revolves around Earth
- Solar and lunar eclipses are the result of Earth, moon, sun system.
- Day, night, and seasons are the result of the earth in relationship to the sun.
- Tides are the result of the interaction of Earth and moon.

B. Solar Systems

- Solar system: at least one star and its orbiting objects
- Objects in a solar system include planets, moons, asteroids, and comets.
- Origins of solar systems
- Eclipses, lunar phases, and seasons: results of the cyclic patterns of movement of the sun, planets, and moons

C. Stars and Galaxies

- The sun is a star.
- Red giants and white dwarfs
- Life cycle of the stars, including novae, supernovae, black holes, and quasars
- The apparent movement of stars is a result of the rotation of Earth.
- Constellations such as the Big Dipper and Orion, are visual groupings of stars into imagined images.
- Definition of light year
- Galaxy: enormous number of stars held together by gravitation
- About 125 billion galaxies in the universe
- Our knowledge of stars, solar systems, galaxies, and the universe is the result of observations and data collected by earth-based instruments, space-based instruments, and spacecraft.

V. Genetics

A. Genetics

- Gregor Mendel's experiments with purebred and hybrid peas and subsequent discoveries about inherited traits
- Role of genes (segments of DNA on a chromosome) in inherited traits
 - Traits of an offspring are the result of half of an offspring's genes coming from the mother, and half coming from the father.
 - Alleles, dominant and recessive
 - An offspring
- Role, structure, and organization of DNA
- DNA is the template for RNA, which in turn directs the development of proteins

B. Mutations

- A mutation is a structural change to a gene.
- Mutations can be harmful, neutral, or beneficial.
- Mutations change the structure of DNA, which in turn can affect RNA and thus the formation of proteins.

C. Sexual and Asexual Reproduction

- Sexual reproduction results in offspring with a mixture of genes from each parent.
- Sexual reproduction results in new combination of genes and thus results in variation of traits in offspring.
- Asexual reproduction is not the result of the combination of genes and thus does not result in genetic variation between parent and offspring.

VI. Natural Selection and Common Ancestry

A. Natural Selection

- Definition of natural selection
- Definition of population, and a knowledge of variation of traits among individuals
- Percentages of genes and alleles in a population
- Abiotic and biotic changes in the environment and their favorable or unfavorable effects on individuals with certain traits
- Survival and greater reproduction of individuals with favorable traits, or adaptations
 - Others will not reproduce as effectively or will die; pass on their genes at a lower rate changing the genetic structure of a population over time.

B. Evidence of Common Ancestry

- Many lines of evidence indicate all living things have a common ancestry.
- Fossil evidence, rock strata and chemical dating process show that the processes of evolution: from origin to extinction, were the same in the past as they are now.
- Comparison of structural similarities and differences between fossils and between fossils and living organisms is one basis for the common ancestry of all living things.
- Comparison of the DNA of differing organisms and other cellular chemical analyses indicate concept that all living things have a common ancestry.

C. Evolution

- Definition, theory, and process of evolution
- Study of the process of evolution includes the comparing genetic makeup and biochemistries of large numbers of different organisms, comparing the anatomy of organisms living and past, and comparative embryology.
- The history of the study of how organisms are related goes back to the beginning of scientific thought.
- Charles Darwin, and his *On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life* (1859) and historical and scientific importance

VII. Science Biographies

- Albert Einstein — advancements in the study of space, matter, energy, time, and gravity
- Dorothy Hodgkin — structure of vitamin B12
- James Maxwell —the basic laws of electromagnetism
- Charles Steinmetz —the theory of electric power

Why Listening and Learning are Critical to Reading Comprehension

Appendix A: Why Listening and Learning are Critical to Reading Comprehension

Those who follow education know all too well that concern about poor student achievement in literacy has reached levels that border on desperation. By every standard measure, it is clear that large numbers of students are leaving American schools ill-prepared to pursue higher education or careers due to poor literacy skills. On international comparisons of reading achievement, the United States ranks below nearly all other countries, surpassed by the likes of Finland, Korea, Japan, and even Hungary and Poland. Longitudinal test results from the National Assessment of Education Progress (NAEP) show little or no growth over a period of decades.

Some progress has been made over the past two decades in the early elementary grades, thanks to the Reading First initiative and several legislative acts (i.e., No Child Left Behind [NCLB], Race to the Top, and Every Student Succeeds Act [ESSA]) that underscored the importance of explicitly and systematically teaching decoding skills. Since the inception of these proposals, test scores in the very early grades (K–2) have risen. This improvement reflects the benefits of explicit instruction in phonemic awareness, systematic phonics, and the development of fluency.

Unfortunately, however, these initial improvements have proven unsustainable. As these very same students moved into the upper elementary grades, their test scores have dropped or flatlined. The conclusion is inescapable: the explicit teaching of decoding skills is necessary, but not sufficient to achieve the goal of full literacy. While systematically teaching decoding leads to improved performance on early reading evaluations, which focus on decoding skills, American educators have yet to find an analogous remedy that leads to improved test scores in the latter grades, when the focus shifts to assessing whether students understand what they read. The approach currently favored by most language arts programs, hours of instructional time given to teaching and practicing an ever expanding collection of reading comprehension strategies, has proven ineffective. Current research suggests that teaching reading strategies has value in helping students recognize the purpose for reading and may lead to a slight boost in reading comprehension scores, but not the sustained improvement that would be indicative of true literacy. Something is still missing.

What's missing is background knowledge. "Most of us think about reading in a way that is fundamentally incorrect," observes University of Virginia cognitive scientist Daniel T. Willingham. "We think of it as transferable, meaning that once you acquire the ability to read, you can read anything. But being able to decode letter strings fluently is only half of reading. In order to understand what you're reading, you need to know something about the subject matter. And that doesn't just mean that you need to know the vocabulary—you need to have the right knowledge of the world," he says.

The successful experience of schools using Core Knowledge during the past 30 years demonstrates the importance of background knowledge to reading comprehension. Time and again, schools implementing content-specific Core Knowledge curriculum have noted that even though state and standardized tests are not tied to the *Core Knowledge Sequence*, student performance on such tests improves at statistically significant levels when students are exposed to core knowledge over several years. Instead of scores dropping or flatlining at the upper grade levels, these students' test scores actually rise! "General reading comprehension ability is much more than comprehension strategies," wrote Core Knowledge founder E.D. Hirsch, Jr. in his 2006 book *The Knowledge Deficit*; "it requires a definite range of general knowledge."

In order to understand what is read, it is absolutely necessary to have knowledge of relevant things that are not explicitly stated. Reading is a two-lock box, and opening that box requires not only adequate decoding skills but also language, vocabulary and background knowledge that provide a foundation and underlying context for students to understand what they are reading.

There is “truly a mountain of data that students must have content knowledge to read effectively,” says Willingham. Unfortunately, existing language arts programs have not been designed to build this foundation of language, vocabulary and background knowledge. This is why the Core Knowledge Foundation created the *Core Knowledge Language Arts* (CKLA) program.

Language—Listening, Speaking, Reading, and Writing

Traditional language arts instruction has typically paid little attention to listening and speaking. This failure to focus on the development of oral language in language arts instruction is a serious oversight. The ability to read and write written language is highly correlated with students’ oral language proficiency, and the ability to understand a text read aloud is a prerequisite for making sense of the same text in printed form. It is essential that children build listening and speaking competency while also developing reading and writing skills.

Linguists distinguish between receptive and expressive language. Receptive language is language that we take in, process, and understand. Expressive language is language we generate and produce. Oral language is spoken language or speech. Written language is print. Oral language is primary. Written language builds upon it.

	Receptive Language	Expressive Language
Oral Language	Listening	Speaking
Written Language	Reading (two keys: <i>decoding</i> + <i>comprehension</i>)	Writing (<i>handwriting, spelling, written composition</i>)

Researchers who study the development of language in young children point out that oral language development precedes and is the foundation for written language development. Children’s oral language competence is strongly predictive of their facility in learning to read and write. A child’s listening and speaking vocabulary, and even mastery of syntax, set boundaries as to what they can read and understand no matter how well they can decode.

It is important to note that for young children in preschool and the early grades, *receptive and expressive abilities do not develop simultaneously or at the same pace; receptive language generally precedes expressive language*. Science confirms what common sense suggests: children need to be able to understand words before they can produce and use them. The groundbreaking work of Hart and Risley (1995), who studied young children in the context of their early family life, found the number of words they heard before they arrived in kindergarten predicted how many words they understood and how fast they could learn new words in kindergarten. Even more significantly, five years later, in third grade, early language competence still predicted language and reading comprehension. The preschoolers who had heard more words, and subsequently learned more words orally, became better readers.

Source: T. G. Sticht and J. James, “Listening and reading,” in P. Pearson, ed., *Handbook of Research on Reading*. New York: Longmans, 1984. (1984)

This finding offers a profoundly important lesson for educators. *Early language disadvantage persists and manifests itself as illiteracy when educational practices fail to recognize the importance of oral language.* A meta-analysis of research by Thomas Sticht (1984) reinforces the importance and primacy of oral language, suggesting that it endures well past the time during which most children have started reading independently. Sticht's analysis strongly suggests that children's listening comprehension outpaces reading comprehension until the middle school years (grades 6–8).

The takeaway message is clear and obvious: we must devote at least as much time during the language arts block to reading aloud to young children as we currently devote to providing children with the skills they will need to decode and encode language. This is one of the fundamental premises of the Listening and Learning (Knowledge) Strand of the CKLA program.

Building Listening Comprehension and Content Knowledge by Reading Aloud

Written text makes use of richer vocabulary and more complex syntax than conversational language. It is important that young children be exposed not only to the language of everyday conversation but also to the richer and more formal language of books. This is best done through frequent reading aloud. Children's ability to understand what they hear far outpaces their ability to independently read and understand written text. By listening to stories or nonfiction selections read aloud, children can experience the complexities of written language without expending cognitive energy on decoding.

Helping young children develop the ability to listen to and understand written texts read aloud must be an integral part of any initiative designed to build literacy

Choosing Read-Alouds

Not just any read-aloud(s), however, will do. First, careful consideration should be given to the selection of text read aloud to ensure that the vocabulary and syntax presented is rich and complex.

Furthermore, to make efficient use of instructional time, read-alouds must also be selected that build a broad knowledge base, while simultaneously building listening comprehension and language skills. To do this, the selection of *read-alouds within a given grade level and across grade levels must be guided by a coherent, sequenced approach to building knowledge.* This can be achieved by selecting fiction and nonfiction read-alouds from grade level topics identified in the *Core Knowledge Sequence*. The topics for read-alouds in the Listening and Learning (Knowledge) Strand of the CKLA program have been chosen on this basis.

By reading a story or nonfiction selection aloud, we allow children to experience written language without the burden of decoding, granting them access to content they may not be able to read and understand by themselves. They are then free to focus their mental energy on the words and ideas presented in the text, gaining the language and background knowledge that will be needed to tackle rich, written content on their own.

Domains and Staying on a Topic

Building knowledge systematically in language arts is like giving children various pieces of a puzzle in each grade that, over time, will form the big picture. As noted above, read-alouds—within and across grade levels—need to be selected around topics or domains that systematically build knowledge. A domain is an area of knowledge, such as the human body, plants, astronomy, Native Americans, civil rights, and so on. It is strongly recommended that daily read-alouds focus on a single domain over a sustained period of time—about two weeks—rather than intermingling randomly selected read-alouds on a variety of topics. The read-alouds for the Listening and Learning (Knowledge) Strand are organized by domain.

Staying on a topic or domain increases the chances that students will receive multiple exposures to key vocabulary words. For example, in the kindergarten Plants domain, students get multiple

exposures to key words from this domain, such as *nutrients*, *photosynthesis*, *crop*, and *harvest*. Hearing these kinds of words used in meaningful contexts over the course of a domain, efficiently and exponentially increases the rate at which children acquire new vocabulary.

Acquisition of both language and knowledge will also be enhanced if, following each read-aloud, children participate in rich, structured conversations with an adult in response to the written text that has been read aloud. In this way, they can begin to orally practice comparing, analyzing, and synthesizing ideas in written text in much the same way as they will be expected to do as independent readers in the later grades.

Ensuring Coherence

The knowledge children have learned about particular topics in early grade levels should then be expanded and developed in subsequent grade levels to ensure an increasingly deeper understanding of these topics.

The *Core Knowledge Sequence* is designed to provide schools with a coherent, cumulative and content-specific curriculum. In Core Knowledge schools, teaching and learning are more effective as teachers help students build upon prior knowledge and make more efficient progress from one year to the next. All students enjoy more equal educational opportunities as they are motivated by consistently challenging content. And all children are prepared to become members of the wider national community, respectful of diversity while strengthened by the shared knowledge that helps unite us on common ground.

To learn more, visit *The Case for Content-Rich Curriculum* on our website (www.coreknowledge.org/our-approach/knowledge-based-schools/case-content-rich-curriculum/).

Appendix B:

Using Trade Books to Supplement and Enhance the Core Knowledge Sequence

Appendix B: Using Trade Books to Supplement and Enhance the Core Knowledge Sequence

In the spirit of the Core Knowledge approach, the purpose of providing this list is to highlight texts that will support vocabulary and literacy development, as well as promote the continued building of background knowledge. These titles are intended to be used as additional teacher read-alouds in the early grades and/or as part of grade level classroom libraries for supplemental reading. Some titles align with domains/topics that are covered in multiple subject areas which affords the opportunity to make cross-curricular connections. This appendix is not meant to be an exhaustive list of all trade books pertaining to the specific domains and topics outlined in the *Sequence*.

Grade	Subject	Domain/Topic	Trade Book Title
K	American History	Symbols and Figures	Eggers, D. (2017) <i>Her Right Foot</i> ISBN 9781452162812
		Presidents, Past and Present	Grimes, N. (2012) <i>Barack Obama: Son of Promise, Child of Hope</i> ISBN 9781442450776

Appendix C:

Teaching History and Geography in the Middle School Grades

Appendix C: Teaching History and Geography in the Middle School Grades

The *Core Knowledge Sequence* was designed to deliver content in a coherent and cumulative fashion. Topics introduced in the earliest grades at a surface level are reexamined in later grades—each time in greater depth and with more precision. The content spiral of the *Sequence* exemplifies the most fundamental tenet of the Core Knowledge approach—it sets the stage for knowledge to build on knowledge.

A Survey of American and World History

Compared to previous *Sequence* editions, surveys of American and world history in Grades 7–8 offer students the opportunity to expand their knowledge and apply higher levels of analysis to previously taught topics. It affords a tighter knowledge-building spiral. Students learn new perspectives, uncover novel detail, and come to recognize shades of nuance. This new knowledge not only leads to greater understanding, it also draws lines of sight between the past and present. See the examples below.

Note: Another Benefit Associated with the Study of American/World History: Students, new to Core Knowledge, now have an opportunity to fill in any knowledge gaps through general instruction.

Connections Across American History Content

Using CKHG to Implement the Sequence

The **Core Knowledge History and Geography (CKHG)** program (www.coreknowledge.org/curriculum/history-geography) addresses all of the history and geography content specified by the *Core Knowledge Sequence*. In addition, as described below, the middle school program's design, optional activities, and pacing offer multiple pathways to bring this *Sequence* to life.

Flexibility and Options for Implementation

The *Sequence* offers middle school teachers' ultimate flexibility in providing students with access to coherent, rich content. While it outlines a survey of American history in Grade 7 and a survey of world history in Grade 8, this content is considered to be suggestive rather than prescriptive. The Core Knowledge Foundation not only acknowledges that state-level middle school social studies standards are often content-specific, but also recognizes that the content focus greatly varies state-to-state. That is, at these grades, there is little agreement across states as to what content should be studied. In addition, based on countless conversations with middle school educators, the foundation has become increasingly aware that many students who did not benefit from Core Knowledge instruction in earlier grades, often struggle to grasp the depth of twentieth and twenty-first century topics. Thus, for Grades 7–8, the *Sequence* provides educators various ways in which they can plan and deliver history and geography content in line with the Core Knowledge approach.

Taking a Deeper Dive

Educators who feel their students possess adequate knowledge of all/most topics introduced in K–6, may prefer to focus instruction on a narrower set of topics. This can include:

- Centering instruction on a period in history (e.g., precolonial to reconstruction or late nineteenth to early twenty-first century). Teachers can chart the course of key events within that timeframe while analyzing the corresponding social, political, and environmental developments and challenges.
- Targeting a subset of sizable topics that afford more in-depth study, such as:
 - The American Revolution, the founding of a new nation, and the Constitution
 - Civil War
 - Industrialization
 - World War I
 - World War II
 - Civil Rights
 - Political, social, and environmental challenges of the twenty-first century

Using CKHG to Facilitate Deeper Study

CKHG can support both aforementioned efforts. For example, the program's "learning lab" affords opportunities that enrich the learning experience. These include additional research, writing, and discussion topics based on specific content. By partaking in these activities, students engage in new experiences with the content or take a deeper dive. The amount of time spent in each chapter's learning lab is flexible. Guidance provided in the program's pacing guide suggests how many days, or weeks, one could devote to the learning lab and additional activities.

Selecting Topics Based on Standards

In order to better align with state standards, some middle school educators may need to select and/or move topics between grades. In these situations, it is important to consider both the coherent and cumulative implications.

A **coherent** sequence presents and explores topics through an orderly flow. It moves from one idea to the next, one unit to the next, in a logical fashion. When considering the subject of history, this would require each grade level to study events in chronological order.

A **cumulative** sequence builds across grade levels. Topics introduced in early grade levels (e.g., K–2) serve as the foundation for later learning (e.g., 3–5). When identifying topics for Grade 8, one would need to consider what prerequisite knowledge students would bring from Grade 7. For example, if the topic of the Cold War were taught in Grade 8, it would be important for students to first study World War II in Grade 7 in order to understand the events that occurred during this war, and the subsequent relationship between the US and Russia that led to the Cold War. Likewise, if World War II were taught in Grade 8, then it would be important for students to study World War I in Grade 7. Some reasons for this are that the state of Germany at the end of World War I served as one factor in the rise of the Nazi party, and that the brutality of World War I left many Americans reluctant to join the war effort.

Using CKHG to Implement a Redesigned Sequence

The design of the CKHG middle school program lends itself to be used in a flexible manner. Each chapter focuses on a specific topic, and can be taught in isolation. That is, the chapter content and corresponding activities do not rely on previous chapters. Thus, if educators redesign the Grades 7–8 sequence (e.g., moving select topics from Grade 8 into Grade 7 and vice versa), they can still use CKHG to support instruction. It would require identifying which corresponding chapters from CKHG correspond with their grade level topics, and then utilizing the corresponding pacing material to determine the amount of time to allot to each topic (chapter).

Appendix D

Knowledge and Social Skills: Powerful Synergy for Productive Citizenship

Appendix D: Knowledge and Social Skills: Powerful Synergy for Productive Citizenship

Citizenship Readiness

Core Knowledge's instructional materials are designed to ensure that all students acquire the broad knowledge and skills needed to become responsible, productive citizens. While much of the education arena focuses on all students becoming college and career ready, Core Knowledge focuses on college, career, and citizenship.

The United States is a diverse nation. Its citizens include immigrants and descendants of indigenous people or individuals who (willfully or by force) migrated from around the world. Thus, being citizenship-ready necessitates the ability to speak with, listen to, and respect different perspectives of people from across this country. How does the *Core Knowledge Sequence* support this? It highlights the myriad ways in which different cultures, at different times, have scientifically, politically, and artistically enriched each other. Students build awareness and appreciation for cultures different from their own.

Citizenship-readiness also requires an understanding of America's past, and the lasting impact on its citizens. Through content outlined in the *Sequence*, students learn about our country's laudable and troubled history. This includes the opportunities and levels of freedom America afforded many of its citizens over the centuries, as well as its struggle to extend the principles of liberty and equality to **all** people.

The Role of Social Skills in Productive Citizenship

While shared knowledge is power, it, in and of itself may not be enough to break barriers that hinder productive citizenship. That is why we at the Core Knowledge Foundation advocate that educators couple a content-rich curriculum with a framework designed to cultivate character education and social skills (e.g., expressing empathy, developing ethical awareness, building character, making responsible decisions, relating across differences, etc.). This synergy of knowledge and skills can promote effective communication. Working together, the two can build bridges through understanding and respect.

Sample Standards and Frameworks

The Core Knowledge Foundation encourages educators to identify specific social skills that could be applied to Core Knowledge instruction as a means of fostering citizenship-readiness. While not an exhaustive list, the standards and frameworks listed below offer varied pathways toward this goal. Specific examples of each are provided as a starting point. It is recommended that educators engage in further research in order to determine which approach, or approaches, would work best for their schools.

This latest edition of the *Core Knowledge Sequence* represents our pursuit to include more voices and cultural contributions that have impacted American society. We hope that this body of knowledge will cultivate understanding, foster tolerance, and facilitate citizenship readiness.

Character Education

A Framework for Character Education in Schools provides a holistic approach to character development, including the acquisition and cultivation of intellectual, moral, civic, and performance virtues. (www.jubileecentre.ac.uk/527/character-education/framework)

Social Justice Standards

Learning for Justice: A Framework for Anti-bias Education provides a roadmap for anti-bias education. (www.learningforjustice.org/frameworks/social-justice-standards)

Social-Emotional Learning Standards

CASEL's SEL Framework works within the classroom and wider school community to develop knowledge and skills across five competences: self-awareness, self-management, social awareness, relationship skills, and responsible decision making. (www.casel.org/sel-framework/)

Culturally Responsive-Sustaining Education

The Culturally Responsive-Sustaining (CR-S) Education Framework aids teachers with creating learning environments that: 1) recognize students' cultural identities; 2) establish high expectations; 3) support students in connecting across differences; 4) provide access to traditionally marginalized perspectives and voices; and, 5) promote social action. (www.nysed.gov/crs/framework)

Appendix E:

Core Knowledge Resources

Appendix E: Core Knowledge Resources

The Core Knowledge Foundation offers content-rich curriculum materials for preschool through grade 8, including the Core Knowledge Curriculum Series™. Most materials are available via the Core Knowledge Bookstore  (www.coreknowledge.org/store/) and/or can be downloaded for free  (www.coreknowledge.org/curriculum/download-curriculum/).

Getting Started/Building Buy-In

Availability	
Leader Starter Kit	
Leader Starter Kit	

Instructional Resources

Core Knowledge Curriculum Series™ (www.coreknowledge.org/curriculum/) Kindergarten–Grade 8*

The Core Knowledge Curriculum Series™ provides comprehensive, content-rich learning materials based on the *Core Knowledge Sequence*. Student Readers, Teacher Guides, Activity Books, and other materials are available for Language Arts, History and Geography, and Science.

Availability	
Core Knowledge Language Arts™ (CKLA)** (www.coreknowledge.org/curriculum/language-arts/)	  While K–5 CKLA is sold through Amplify, grades 6–8 will be sold through CKF.
Core Knowledge History and Geography™ (CKHG) (www.coreknowledge.org/curriculum/history-geography/)	  Student texts also available as interactive eBooks in English and Spanish; Visit bookstore for more details.
Core Knowledge Science™ (CKSci) (www.coreknowledge.org/curriculum/science/)	  Student texts also available as interactive eBooks in English and Spanish; Visit bookstore for more details.

*At the time of this publication, CKLA (Grades 7–8), CKHG (Grade 8), and CKSci (Grades 6–8) are in development.

**CKLA offers a preschool program
